#### THURSDAY, JUNE 4, 1874.

#### The Normal School.

Are we doing any thing about th Normal School? It will not do to let the matter lie idle for a single day if we intend, seriously to secure such an institution here. There is nothing in the way as we can see but want of will. No other section is making a move in this direction, and hence we are wholly without opposition. And throughout the country. why is this? No other county can present such inducements of locality as can Monroe, and this is conceded by the silence relative the past week. to the matter on all sides. Let us go to work then with a will, and see if we cannot by next spring, if not before, have the buildings ready for the reception of students, and the certainty of a noble paying Educational Institution duly inaugurated. And why not? What is to hinder? Certainly crowded out. not the want of means. It is not as though the \$60,000 required for the purpose is to be paid at once and sent away to benefit some other locality. On the contrary the whole sum, and the State appropriation of \$35,000 besides, is to be expended right here at home. The payments of course will be called for in instalments, and in the natural course of things it cannot be otherwise than that a portion of each instalment will for labor or material flow back to its source in time to meet subsequent instalplace without every body receiving, in the due course of trade a share of it.

And then again the question of special locality. This should not even prove a Monday afternoon, May 25th. Some of the retarding, much less a preventative consideration. The precise point of locality is a matter of little moment in connection with the great object to be obtained. The institution should certainly be located some where near the great business center of the

main thing in the work, to have the necessary and December. number of dollars assured. After this the vote as the best possible plan.
