#### Again! Aye, Again.

President Grant has spoken once more, and again his words have the ring of the true metal. About a week ago he furnished Senator Jones, of Nevada, with a memoranda of his views on finance. On Friday last, as the Telegraph informs us, he notified root of the evil and doing something to per manently cure us of our financial illness their hobbies were only calculated to afford temporary relief and, in the end, add to our difficulties-and this, too, in violation of the most solemnly asseverated pledges of a former Congress, of both the great political parties and, as well, of President Grant. It seems was fluttering over the White House, or that his spirit had returned to guide President group by Jessie R. Graves. Grant most emphatically in the right. It is indeed refreshing to witness such little episodes in our onward march, and to learn that though usually reticent our hero President can speak out, and that too in language not to be mistaken when occasion requires.

In some quarters this action of the President is denounced as a usurpation unwarranted and without precedent. And yet it is neither, and to the country generally it will be received with every mark of rejoicing. It is not a userpation at all, because it is a right inherent in the office, that its occupant not learn from our exchanges that nearly only may but shall from time to time com every other town in the State extensive as As the lady lost the fan a few days ago, municate to Congress his views of matters well as expensive arrangements are being while out riding, I hope she will receive this before it, or which touch the well being of made for a proper observance of the day, as a pleasant reminder of the paragraphs it the country. ### What I saw on a Fan.

Happening to be a lingering guest at the Fireman's festival last Thursday evening, by laying on a table, and being very warm l picked it up thinking I might cool my burning brow with its assistance. Upon opening it I discovered that it was completely covered with various inscriptions from near and dear friends. Affectionate he must be, for he says, "there's not an hour of day or dreaming night, The lot was knocked down to Wm. Wallace but I am with thee, There's not a word for \$250 and taxes and costs.
