Republican Address.

tee has just issued a long address to the but a summary of its principal points.

to power. The work is performed with a cleaning times. vigor which could scarcely be looked for in midsummer, and we should think it no washed. Their rosy countenance, bright Republican who will not feel a deep interest | with exuberant health, have been further his party played so conspicuous a part, has depicted them suffering with colds as familias turn pale, perhaps from peculiar he has been delivered to the officers of Bow The course of the Democrats prior to 1861 one result of their baths. At the same parental instinct, for it cannot be denied street Police court, London. His family gold coins. is traced, not without many caustic touches, time their complexion forms an agreeable that a marmot, when served at table, is went with him. No news has yet been and we can quite imagine that the Demo- contrast to the three behind the tub who rather suggestive of a plat which is now, cratic press generally will pronunce this have not yet been bathed. This is finely we believe, the exclusive privilege of some address to be one of the worst ever issued. done and cost a world of labor. The awkward point about it is that there! The whole forms an agreeable contrast

It is shown that the Democratic party dream-like peace. did not provide us with either a capable, ceived adequate attention. There were an has ever been presented. life-like manner. Also, great attention | the latter was "scattered in remote seas" | from prominent individuals: when the nation most needed it. "In all Charges reasonable. Pat- al character had not been raised an inch. Lorler's new holldling, opposite Analo-Lorler's new holldling, opposite Analo-East Strondsburg, Pa. (july 11, 77a, fallen constantly lower and lower." Then caught the measles from looking at it." came the remarkable treachery of 1861, Ben. Butler. and the Rebellion. From that period the he is fully prepared to make artificial teeth in beautiful and life-like manner, and to fill depublic credit has been maintained, the deout e ssation, and at a rate never known before. "It will require a great deal of degree. No woman ought to be allowed to rhetoric," remarked the committee, "to have seven children."-Victoria Woodhull. three per cent., and has nearly trebled its taking the Journal. surplus productions.'

The address deals with these great changes in a trenchant and animated spirit. The course of the Democratic party in op- Opinions of an Experienced Veterinary position is afterward traced, but not in a way which will be satisfactory to the Demo-Farms, Timber Lands and Town Lots cratic leaders. But as before, the facts presented are undeniable-if there had been any answer to them we should have been favored with it long ago; but there is no answer. The Democrats do indeed ery out that the Republican party is no better than their own-that dishonest men are in our ranks as well as in theirs. But this kind of talk is effectually disposed of by the address. "Every time a rogue has been punished the opposition has shouted, 'See how corrupt Republicans are.' It is as if, whenever a doctor removes a tumor from his patient the mob shout, 'How very rotten the doctor must be." All this has been pointed out many times before, but the work is done once more, with almost a superabundance of force and imagery in

the present address. Finally, the committee make a very strong appeal for the renewed support of the people. They show the absurbity of the cry that the "mission" of the Republican party has been "accomplished." They show how much remains to be done-in securing fast what has gained, in reforming the currency, in dealing with the vast question of transportation. Into the latter subject the committee enter at some length, and it would be unjust to the argument made to attempt to condense it here. The address can hardly fail to have a marked effect on political affairs.

MOTHERS.

Mothers, you stand at the fountain, with the lightest trace of your finger on the yielding soil, you can give a direction to the infant stream, you can send it gliding down through verdant fields and flowery lawns, imparting new fertility and beauty, and anon contributing its strength to propel the complicated machinery of industry; or you can send it dashing, foaming over precipices, to join with other impetuous headlong streams, carrying devastation in their course; or you can suffer it to roll its sluggish way into some stagnant pool, affording refuge for loathsome reptiles, and poisoning the atmosphere with its pestilential vapors. In infancy and at home the deepest and most lasting impression are made ; your children may have had able and faithful instructors but there are many lessons of practical wisdom which are not taught in schools. The mind of your child is constantly busy-it will be learning a lesson of you when you least think of it.

your opinious, sound doctrine; and your word a law-your child is learning a lesson from every look and action-but, most of all, your example is educating your child; lay a book constantly open before it which it is constantly studying. Be careful, fond mother, that you insert no page which hereafter you may wish to tear out, no line you may wish to bolt; be careful that you admit into that much read volume no sentiments which you are unwilling child should transcribe on the fair tablet within its own innocent bosom.

To your child, your remark is wisdom :
