An Abstract of the Summers Work.

The following abstract of Prof. J. P. Lesley's report to the board of commissioners at their meeting on the 4th instant, will give the public a good idea of what the

survey corps has done during the summer. last meeting of the board to report on the August and September, returned to Boston, after making further researches.

Mr. M'Creath has finished all the analysis of 1874, and has made good pro gress in the analysis for 1875.

Mr. Allen has traveled through the state collecting and arranging data for our vol ume of railroad and other levels, and has connected them with the levels of surround-

Dr. Genth has pursued his chemical studies of minerals and rocks, and is at present entirely occupied with nice and difficult Dr. Genth and Mr. McCreath answer al

mineralogical inquiries made by citizens of Dr. Lesquereux has examined the collections of fossil plants in vrrious places and is now writing desciptions and making drawings, for the volume which will con-

for Pennsylvania and for the United States.

tain his report. It is to be a hand-book

Prof. Prime, aided by Dr. Clarke and Mr. Kent, has completed the limestons belt of Lehigh county and will finish the limestone belt of Northampton county, before snow falls. We shall then have a complete contour-line map, with all ore banks, ore shows, limestones and outcrop exposures and Delaware Water Gap maps and secfrom Alburtis to the Delaware river, with | tions, was detailed to a special close study special studies of the larger mines.

SOUTH PENNSYLVANIA GEOLOGY AND ORES.

Prof. Frazer, aided by Mr. Lehman, and lines. Mr. Edwards, has made section surveys across the South mountain, and will soon have completed the first draft of a complete contour-line map of the mountain mass, from side to side, and for five or six miles north and south of the Gettysburg-Chambersburg pike. Mr. Frazer's district is the most difficult in the state, as yet occupied. Much of his time has been spent in revising his sections across York county, preparatory to printing his first report of progress, which therefore includes a good deal of 1875. Dr. Hunt's knowledge of the rocks service in helping to explain some of the difficulties; but most of them are inherent out in detail instrumentally, by the party. CENTRAL PENNSYLYANIA, MAPS, GEOLOGY cilities happened to present themselves.

AND FOSSIL ORES. Mr. Dewees has continued his survey of every opening along the entire extent of the fossil ore outcrops; and he has nearly finished all that lies in Union, Mifflin, Ju-Selinsgrove, on the Susquehanna, to the south end of Black Log mountain, i. e. the entire length of Jack's mountain and Shade | in the spring; price, paper, 75 cents. mountain, with the intermediate lines.
