Dear Sir.—I have been a dyspeptic sufferer for about ten years, and have resorted to various medicines for relief without success, until I made use of your "Oxygenated Bitters." I have used about two bottles, and find myself restored to perfect health. The forms in which the disease showed itself, in my case, were, great acidity of the stomach, bus of appetite, extreme flatulence, severe constitution of the bowels, and violent headache. Feeling desirons that a knowledge of your valuable remedy may reach others similarly afflicted. I take great pleasure in recording my testimony to its curative power; and would also remark that while on a visit at home a short time since, I administered a part of a bottle to a number of my afflicted friends, with great success. They are desirous that you should extablish an agency at Pittsburg, or inform them where the medicine can be obtained. With an caractic desire for your prosperity and happiness, I subscribe myself, truly your friend.

In presenting the public with a remedy for the treatment and cure of Faven and Adva and other bilious diseases, no apology is needed. Vast numbers in the United States, who suffer from these affections in their varied forms, are compelled to seek relief from other sources than the immediate prescriptions of the regular physician. It becomes therefore an object of humanity, as well as of public interests, to bring before them a remedy prepared from much experience, and which may always be relied upon as sare, perfectled, and Markhess to the Cholagogue. That such is the true character of the INDIA CHOLAGOGUE, is amply attested by the universal success with which it has been employed.

DETROIT, Oct. 21, 1840.

DOCTOR CHARLES OSOOOD,
Dear Sir,—I have read with much interest, your little
TREATIAE upon the "emuse, treatment and cure" of the
febrile diseases which have so extensively prevailed in our
country during the last few months—an interest increased
no doubt, by the fact that I have individually suffered so
mach from them. Though I feel myself very incompetent
to judge safely upon a subject so entirely professional, yet
your theory seems to me well reasoned, and your conclusions just, and I think withal, that your pamphiet is calculated to produce much practical good.

Bpeaking of the medicine he says:—It fully justified your
dattering expectations, and as a safe, convenient, and popular remedy, my own experience, so far, induces me to believe that it will prove a great public benefit. I am pleased
to learn that you have recently established several agencies
for its disposition—though I regret that, with a view to a
more general dissemination of it, you should have found it
necessary to remove from your present residence among us.

With much respect I have the honor to be, sir,

Your obliged servant.

Sir—you wish me to inform you what I know of Dr Ongcor's badin Chologogue, or unti-bilious medicine. I de beisew that if the virtue and efficacy of this medicine were generally known, the FFVER AND AGER would disappear is filchigan. reactally knows, the revel and act would mapped to dichigan.

I have recommended this medicine in numerous instance, and when the disease had become fixed and builded the still of physicians; and I have never known it full. I has universally produced the most happy effects, and I bet like it has never been exceeded by any medicine in removing the bilious diseases of the climate.

PAMACMA THE ONLY RADICAL CURE FOR CONSUMPTION!

qr. Druke's Panneen is recommended as a certain remedy Not one instance of its failure has ever occurred when free by used! It cares the disease and at the same time impart vigor to the whole system. Scrofulous persus can never pay too much attention to the state of their blood. Its purification should be their first aim; for perseverance will accomplish a cure of EVEN MEREDITARY disease.

Scurvy, Southstie Affections, Tumors, White Swelling, Prysipelas, Utcers, Cancers, Running Sores, Scabs and Biles, Dr. Drake's Panacea cannot be too highly extelled it scarches out the very root of the disease, and permanent INDIGESTION OR DYSPEPSIA.

No medicine perhaps has ever been discovered which gives so much tone to the stomach and causes the secretion of a healthy gastric juice to decompose the food as Dr. Drake's Panacea

FOR ERUPTIONS OF THE SKIN.

Dr. Drake's Pannean is tiled with the greatest success in Rheumatic Complaints, especially such as chronic. It cure by driving out all impurities and foul humours which have accumulated in the system, which are the cause of Rheumatism, Gout, and Swellings of the joints. Other remedies sometimes give temporary relief; this cutively eradiented the disease from the system, even when the limbs and bones are dreadfully swollen.

CONSUMPTION. CONSUMPTION.

Consumption can be curren.—Coughs, Catarrh, Bronchitis, Spitting of Blood, Asthma, Difficult or profuse Expectoration, Hectic Flush, Night Sweats, Pain in the side &c. have been cured, and can be with as much certainty as any other disease. A specific has long been sought for, but in vain until the discovery of Dr. Orake's Panacea. It is mild and safe but certain and effications in its operation, and cannot possibly injure the most delicate constitution. We would earnestly recommend those afficied to give it a trial—and we believe they will not have occasion to regret. The system is cleansed and strengthened, the ulcers on the lungs are healed, and the patients gradually regain their usual health and strength. Read the following:

TESTIMONY.

PRILA., Dec. 14th, 1847.

DEAR SIR:—In reply to your question respecting the use of Dr. Drake's Passacea, I will say, that although a perfect disbeliever in the existence of a Passacea, or cure for all diseases, however valuable it may be in certain conditions of the system, still I have believed that a cure for Consumption would be discovered sooner or later, and currosity led not to try your modicine in two very inveterate cases. They were pronounced by the attending physicians to be FCLMONARY CONSUMPTION, and also doned by them as in creature. One of the persons had been under the treatment of several very side practitioners for a number of years, and they said she had "old fushioned Consumption combine with Scrotola," and that she might linger for some time but could not be permanently referred. In both cases the effect of the Panacea has been most gratifying. Only four or five bottles were used by one of the persons before she began to improve rapidly. The other took about tent. I will only add that familiar as I am with consumption by inheritance and by extensive observation as a study, and knowing also the injurious effects in nine cases out of ten of tar, boneset, and other vegetable tonics, as well as of many of the expectorants and sedatives, I should never have recommended the use of Drake's Panacea if I had not been acquainted with the ingredients. Suffice it to say that these are recommended by our most popular and acientific plysicians, and in their present combined state, form probably the best alterative that has ever been made. The cure is in accordance with a theory of Consumption broached in France a few years ago, by one of her most eminent writers on medicine, and now established by facts which admit of no dispute.

Very Respectfully Yours, L. C. GUNN. TESTIMONY. PHILA., Dec. 14th, 1847.

mit of no dispute.

Very Respectfully Yours, L. C. GUNN. To use the language of another, "Dr. Drake's Pannees in always salutary in its effects—never injorious. It is not as Opiate—it is not said Expectorant. It is not intended to lull the invalid into a fatal security. It is a great remedy—a grand healing and curative compound, the great and only remedy which medical science and skill has yet produced for the treatment of this hitherto unconquered malady, what no person afflicted with this dread disease, will be just to himself and his friends, if he go down to the grave without testing its virtues. A single bottle, in most cases, will produce a favorable change in the condition of any patient, however low."

TO THE LADIES.

Ladies of pale complexion and consumptive habits, and such as are debiliated by those obstructions which females are inbie to, are restored by the use of a bottle or two, to bloom vigor. It is by far the best reasedy ever discovered for weakly children, and such as have bad humors; being pleasant, they take it. It immediately restores the appetite, itrength and color.

Nothing can be more surprising than its invigorating effects on the human frame. Persons, all weakness and lassitude before taking it, at once become robust and full of energy under its inducesc. It immediate counteracts the nervelessuess of the female frame.
