THE PRIZE FIGHT-DEFEAT OF TANKEE

BALTIMORE, Feb. 8-9 o'clock, A. M. The fight between Hyer and Sullivan took place last evening, about five o'clock, on Rock Point, in Kent county, ten miles below Pool's Island. There were but sixteen rounds fought, occupying twenty-one minutes. Sullivan had the advantage on the first three rounds, and knocked Hyer down on the third round, which was the only leveller that occurred. The blow inflicted was a severe one in the neck. Hyer drew the first blood from Sullivan, and on the fifteenth round wrenched his right arm. Both of Hyer's eyes were bruised, and Sullivan's right eye was terribly hurt. Hyer, on the sixteenth round, caught Sullivan's head under his arm and punished him until he was satisfied that he was done for, and then dropped him. Sullivan was then forcibly taken from the ring by his friends, his face presenting the oppearance of a butcher's block. Hyer claiming the victory. as he did not come up again in time. It was terribly cold, and both suffered from it, as well as from the race they had from the au- scribers as can conveniently enter, single tayern at New York. thorities during the day. The struggle was file, between this and next Christmas. nearly one continued fight.

There were but few spectators to witness the brutal exhibition. There is a dispute between the judges and referees, but there seems to be no dispute as to the fact that Hyer was too much for Sullivan.

Soon after the parties 'eft the ground, Hyer proceeded to Frenchtown in his boat. He is party. not much disfigured about the face, except the disfiguration of his right eye.

The steambout Boston, with the military on board, is still ashore on Poel's Island.

Further particulars of the \$10,000 Prize Fight -The result-Incidents-Arrest of the Seconds-Sullivan not Expected to live! BALTIMORE, Feb. 8-A. M.

This shameful affair is settled, despite the efforts of the police to the contrary. Hyer and Sullivan having been tracked to and surprised at Pools Island by a large police force, bended by the sheriff, succeeded in builling the officers and went to Rock Point, which is about twelve miles below, on the Eastern Shore of Maryland. The ground was selected by the Seconds, and at a few minutes after 4 o'clock all the arrangements were completed, and the two men stepped into the ring ready for action-each confident of his apperior powers.

Sullivan was over sanguine and wasted his fight of it. During the first one or two rounds he struck some tremendous blows, but they did not seem to tell. On the third round he made a slight feint and fetched flyer a heavy blow on the left temple, which laid him flat. In an instant Hyer rallied with much determination, striking Sullivan over the mazzard and throwing him on the ropes. He recovered before he fell, and as he came up he got a blow between the two eyes which shut the left one. This disconcerted him and he began to fail-Uver perceiving this kept him up to quick time, dealing heavy blows about

On the last round Sullivan came up slowly. evidently bewildered, and received a blow on the face which lifted him entirely off his feet. He fell to the ground, striking his head severely, like a sack of sand, and was picked up by his second in a state of insensibility and completely blinded with blood! Restoratives were applied, and in a few minutes the parties left in their boat. Sullivan had to be carried off by his friends. Hyer left for Frenchtown. He did not appear to be much hurt, though his face was covered with blood.

What may appear amusing, the owner of the ground on which the fight took place had left home on the previous day to go to Balti- the services of a capable and experienced more to see the sport.

DISCOVERY OF A NEW MOUNTAIN PASS .- A Texan hunter gives the following account of a connect with the road from that place to new pass through the great chain of mountains which traverse the continent:

He states, according to the Houston Telegraph, that there is a broad pass between the south and the Rocky Mountains or Cordilleras of the north, that extends quite peross the continent, from the valley of the Rio Grande to the valley of the Rio Hianni. This pass, he by Fremont, and the ascent to the summit of carriages and loaded wagons can pass fron the valley of the Rio Grande to the valley of the Hiaqui as easily as they can past over the undulating prairies of western Texas .-The distance from one valley to the other he estimates at only five handred miles. The pass he says, about in the latitude of twenty-Monelova and the Coches.

SATURDAY, PEBRUARY 17, 1849. H. B. MASSER, Editor and Proprietor.

SUNBURY.

Persons indebted to the office of the Ameri can up to April 1848, are notified to make final settlement with H. B. Masser, in whose hands the books of the late firm are left for collection.

REMOVAL .- We have removed our office to the white frame building, recently occupied by Dr. J. B. Masser in Market Street nearly opposite the Post Office, where we shall be happy to see all our

The first room below will be occupied as a law and editor al office, 'rom whence we shall endeavor to dispense legal, as well as political opinions, that will be satisfactory we trust, to the candid and liberal minded of all parties, especially to the winning

OUR NEW SIGN .- Having removed our office, we have thought proper to procure a new sign, with the portrait of Franklin, the distinguished representative of the art in this country, in the centre. On the back ground is a Printing Press-the Pennsylvania Coat of Arms-a Globe-Telescope, books, inkstand, &c. The design is a good one and has been well executed by the artist, Mr. Hillen of New Berlin. We trust the "outward sign will prove a token of good works within," and ecome profitable, peconiarily as well as otherwise, to ourselves as well as our readers and patrons.

The Superintendent of the Common Schools, at the request of the Legislature has reported the amount due to certain non-accepting school districts, on the first strength in expectation of making a short day of November 1845. The whole amount due the different non-accepting districts in the State is \$297,772 85.

> We find the following sums due the non accepting districts in this County, viz :

Coal (South)	\$168,92
Jackson	1,923,30
Little Mahonoy	451,97
Upper do	2,838,10
Lower do	2,794,20
	88,176,49

This now amounts to a handsome sum and would be sofficient to build a number of excellent school houses if the districts of this Company, and glean from it the folcould manage to get possession of it.

OUR SENATOR AND THE ERIE AND OHIO RAIL ROAD. It is with feelings of regret and mortification that we are obliged to refer to the course of Robert M. Frick, our Senator, in relation to this important improvement. Our readers will recollect, that in opposing the election of Mr. Frick, we stated that there were important improvements, in which we were interested, that required Senator. We referred at the time to the Railroad from this place to Harrisburg to York, now in progress, which would connect us with Baltimore by Railroad. This once accomplished, the railroad to Pottsville would soon follow. After which the great vast ranges of the Anahoac Mountains on the Railroad project from this place to Erie would not long slumber. Although we were aware that Mr. Frick could not aid the table lands of Mexico is there so gradual that huge corporation, the mis-called Centhat is appears like an extended plain, and tral Rail Road, that has been brought into existence to ruin our main line of canal. and thus increase the state taxes of our already over burdened citizens. This corporation and its friends, having refused to of the route to Shamokin to be made during road to Erie, have got up a bill to repeal a This Report is accompanied by a map of the nine degrees extends between the valley of law, authorising the people of Erie to make route, and is appended to the Report of the a road Westward into Chio; and in favor of this wicked and most unrighteous bill, A Mr. Baldwin, of London, has discover- Mr. Frick has voted, in opposition to nineteen-twentieths of his constituents, at least of your road to the Gap at Ashland, is 134 from Northumberland County. [Correspondence of the Public Ledger 1 FROM HARRISBURG.

HARRISBURG, F. b. 10, 1849. Dean Sins:-We have had a singular ses sion this day. Not much was done, but a great deal said--much, indeed, that had better have been left unsaid. The bill to repeal the Ohio and and E ie Railroad, was Erie shivered lances against each other in a most furious tilt. Immediately after the reading of the Journal, Mr. Swartzwelder, of Pittsburg, moved to suspend the orders of the day for the purpose of taking up the bill to & Co., and T. B. Peterson, Philadelphia, repeal the charter of the Erie and Ohio Rai'road. The yeas and navs were called upon this, and resulted -- 68 yeas to 18 nays.

Mr. Ball, of Erie, then took the floor, and in a most deliberate, emphate, and solemn manner, entered his protest against the repeal. He warned the House of the probable consequences. He declared, that let the action of the Legislature be what it might, the Railroad would nevertheless be made. The people of Erie county had pledged themselves to each other, to stand shoulder to shoulder and purse to purse, and complete this improvement. They conceived they had the right, and they would exercise the right make the road, on their own soil and with their own money, and not all the power of the Legislature por of the State could prevent it. They were ready to abide all the consequences-ready to resist, if needs be, any effort to compel them to desist from carrying into effect the law now about to be in such hot haste repealed. It might be that citizens of the Commonwealth, from other sections, would be sent among them to force compliance with this mandate of Philadelphia and the Central Railroad. But the people of Erie county had made their determination, and would be ready to meet the issue in any shape it might be presented. They were a quiet, sober, law-abiding community-such was their known character-and deep would be the responsibility of those who forced them to assume any other character, by thus trampling upon their rights, and sacrificing hem, not to the preservation of the interests of the State, but to local, sectional, and rival

prosperity. Mr. McCalmont followed on the same side. He deprecated the manner in which the bill was being harried through the House; before it was even printed, and members had an oppostunity of examining it, or the bill it proposed to repeal. He spoke of the interests of the Northwestern section of the State as having continually met the opposition of Philadelphia, and alluded with alarm to the growing influence of the Central Railroad Corporation, for the benefit of which mammoth monopoly there was danger that the interests of every section of the State would he successively sacrificed.

Mr. Swartzwelder said that in making his motion he had not expected to start so violent a discussion.

Mr. Smith, went into a recapitulation of the arguments in favor of the repeal; but as they have already been so often given in the Philadelphia press during the discussion in the Senate, I shall not repeat them.

Mr. McCalmont made some further observations in opposition to the repeal; and was then followed by Mr. Bull in a speech "against time," occupying over an hour and a half, in opposition to the reneal. It was an old medley, and varied most truly "from grave to gay, from lively to severe." He said a great many good things and some very dull ones. He was very severe on Philadelphie, and especially upon Philadelphia borers, one of whom he characterized as "the spectacles of the Central Railroad." He dipped into the Bible, talked about the Indian wars, execriated Mr. Tyson for saying that "Erie was the gate of the Lakes, and the gate must be kept closed," said that Philadelphia thought Erie the chimney top of Pennsylva-

nia--a kind of devil's play ground, &c. Mr. Ball talked until the hour of one arrived, when the Committee of the Whole rose. and on the question, "shall the committee have leave to sit again !" the yeas were 39, One gray Horse, the mays 48.

comfort. Five votes of a change would de feat the repeal. The friends of the North Branch have no disposition to abundon the original bill for its

CALIFORNIA GOLD! SIGNOR D'ALVEAR'S GOLDMETER!

GOLD SEEKER'S GUIDE! Secret Art of finding Mines of Gold, Silver

ral Riches. THE first discovery of Gold a "lifornia was made ty DON JOSE D'ALV. 'R, an eminent Spanish Geolog st, Chemist an Natura Philosopher, by means of a newly invent. 'Magne-

THE GOLDOMETER OR GOLD SEEKER'S GUIDE!

Signor D'Alvear has just arrived at New York, from the Gold regions of Cal fornia, by way of Panama, Chagres, and New Orleans, bringing with him a very large quantity of Gold ore, valued at nearly one million of Dollars, which he collec-ted there, long before the existence of the Gold mines became known to the residents of California generally.
HISTORY OF THE DISCOVERY!

Signor D'Alvear went out to California nearly two years ago, in consequence of certain informa-tion which he had received of the geological charic'er of that country, with the firm belief that vast mines of precious metal would be revealed there upon careful investigation. He was encouraged o this enterprise, also by his confidence in the powers of a certain Magnetic instrument which be had invented, called "Goldometer," by whose aid he expected to be directed at once to the "Gold Placers." if any such existed. Nor were his expectations disappointed. His scientific calculations proved to be found in truth and profound wisdom, and his new instrument, the "Goldometer," fulfilled his highest hopes. In less than two months after reaching California, he struck upon one of the richest gold mines in that country, upon an descure branch of the Sacrato river in a gorge hills extremely to key and difficult of access, and seldom visited by the native Californians. Dis-guising his object under the pretence of purely cientific research, he obtained the aid of some fifteen or twenty simple and faithful Indians, and steadily pursued his task, collecting often more than \$2,000 worth of gold in a single day, which he concealed in a deep ravine, without exciting any suspicion whatever, until after the discovery of old at Captain Sutter's Mill, when the mountains were ransacked by gold seekers, and Signor D'Al-year's "gold placer," the richest in all California, was beset with greedy adventurers. It is now found that the real mines or sources of the gold, lie in the gorges of the mountains, and not in the beds or sam's of the rivers. Previous to leaving California, Signor D'Alvear sold his instrument, the Goldometer, a very imperfect one, for \$3,000. The person who purchased it confidently expected to make a hundsome fortune, by simply finding "gold placers" and selling out the right of digging

to the gold workers, MANUFACTURE OF THE GOLDOMETER PUBLICATION OF THE GUIDE. Signor D'Alvear, in compliance with the request f numerous scientific gentlemen, has commenced he manufacture of his new Magnetic Instrument, he Coldonicter, which he now offers for sale, in he United States at the remarkably low prine of each accompanied by full instructions for use.

and a variety of Philosophical hints drawn from the ancient and modern science or the ART OF FINDING MINES OF GOLD! Silver, Platinum, Quicksilver, Coal, Iron, Cop-per, Lead, and other Mineral Riches, the whole be-

ing given in a publication called the
GOLD SEEKER'S GUIDE! This new work, and the Goldometer, are both

The Goldometer is so simple an instrument. that a child may learn to operate with it in five minntes. It is not affected by climate, moisture, or any other known cause, (except the natural magnet.) and will retain its power of pointing out mineral riches in the earth for any number of years. By the aid of the Guide any person may

use the instrument at ance with perfect success.

FARMERS AND LAND OWNERS. Farmers and Land Owners throughout the Uni ted States, who have reason to suspect the existence of any kind of Mineral riches upon their ade should avail themselves of this to test that fact, by the surest of all known tests, before the abundance of discoveries in all parts of the country shall have lessened this source of

wealth in their estate.
ADVENTURERS TO CALIFORNIA. Persons going to California cannot make a better investment than by purchasing one of these instruments which will not only be worth fifty times its value there, to sell again, but will be or inestimable worth to those who go in search of Gold, as has been proved by the most abundant experiment both in California and the United States

TESTIMONIALS. Signor D'Alvear does not does not deem it neessary to encumber this notice with a long list of testimonials, in proof of the value of his GOLD-OMETER and GOLD SEEKER'S GUIDE. The brilliant results of his labors in Culifornia, and the discovery, this very week, of fresh veins of Gold in Virginia and beds of Coal in Rhode Islaud, by it use, are alone sufficient to stamp it as the greatest discovery of the age. Nothing but the extreme cheapness of the instrument, and his desire to see t used for the benefit of mankind induces him to dispose of it at the low price of which he offers it. Besides this, his own desire for wealth is nearly satisfacfied.

The following Testimonials, in proof of the value of the Goldometer, selected from a great number equally satisfactory, must suffice for the Asron Horse, N. Y., Dec. 21, 1848.

The undersigned, having this day withessed the practical operation of Signor Jose DeAlvear's newly invented magnetic instrument the Gorn-omoren, feel entirely satisfied that it posseses the extraordinary power of desecting Mineral ores hidden beneath the surface of the earth, and have no doubt that it will prove invaluable aid in the dis covery of the Mineral resources of the United States and the world.

J. R. Duapen, Jr., Chemist, L. S. TIERMANN, Magnetic Ins. Maker, G. S. DANA, Geologist.

Los Angetos, California, Aug. 1848. This may certify that the understrated is fully convinced that Signor Jose De Alva was the first discoveror of the Gold desposites of alifornia and that this discovery was made by t c aid of a Magnetic instrument called the Gol ometer, which have seen successfully applied to the discovery of veins of Gold ore, places where no indications T. W. SHERMAN, Lieut, 3d Artillery, U. S. Army, NO AGENTS.

In consequence of the didiculty of finding faithful agents, and of preventing frauds, where articles of this nature are sent out for general sale, Signor De Alvear has determined to sell none of his works or instruments unless ordered by letters sent di-ectly to him, when the desired publication, or in-strument, will be forwarded under his signature and seal, so that all doubt as to its genuineue may be removed.

BEWARE OF ALL IMITATIONS of this Instrument which may be reafter appear, as the secret of imparting the Gold Detecting power s known to no person whatever, except the oricinal inventor 18 The GOLDOMETER and GOLD SEEK-

ER'S GUIDE, will both be sent by mail, closely enveloped and scaled, and heretofore, not subject to inspection by Post-masters for the sum of l'HREE DOLLARS, sent post paid to SIGNOR JOSE DE ALVEAR, Box 2713, New York City. The instrument is very light, and the Guide is printed on this paper—so that the charge by mail or express will be very small to any part of the United States.—The Price of the GODD SEEK-ER'S GUIDE alone, is ONE DOLEAR, sent as

above. Address, SIGNOR JOSE DE ALVEAR, Box 2713, New York City. GUIDE and GOLDOMETER, No. 38 Centre New York City, where visiters may see several casks of California Gold, in the rough state, as ex-tracted by Signor D'Alvear from the Sacramento Mines, and also witness the operation of the fluence of the precious metal, and unerring ner in which it indicates the presence of that other metallic substances. AND A VARIETY OF OTHER DISEASES ARISING FROM IMPURITIES OF THE BLOOD, AND OBSTRUCTIONS IN THE ORGANS OF DIGESTION.

Experience has proved that nearly every Disease originates from Impurities of the Blord or derangements of the Digestives Organs; and to secure Health, we must remove those obscruct mor restree the Blood to its mutual state.

The averson to taking medicine is most effectually removed by Charkeria's Veneraria Fernarytes Plats, being a motively eavel poed with a counting of pure white Sugar, (which is as distinct from the internal ingredients as a nut shell from the kernel) and lave us taste of medicine.

But are as easily swall wed as bits of enady. Moreover they might provide the middle of the state of the st shed from the kernel) and have no bate of medicine. But are as easily swell weed as bits of candy. Moreover they neither quescrate or gripe in the slightest degree, but operate equelly on all the discussed parts of the system, inscead of confining themselves to, and racking any particular region. Thus, if the Liver be affected one ingredient will overate on that particular regan, and, by elemaning it of an Excess of Bits restore it if the natured state. Another will regent on the Board and remove all impurities in its circu-Excess of Bile restore it 17 its naturel state. Another will operate on the Board and remove all impurities in its circulation; while a bird will effectually expel whatever impurities may have been discharged into the stomach, and hence they strike at the root or disease remove all Impure Humars from the body, open the neres externally and internally; separate all foreign and observious particles from the cityle, a that the hirsel may be the maghly pure—thus securities a free and healthy acts into the Board, Lungsand Liver and thereby they restore health even when all other means have failled.

The entire trait of the above and the strike of the size of the

have failed.

The entire truth of the above can be ascertained by the trial of a sharle box; and their virtues are so residue and certain in rest ring Health, that the propriety blads himself to return the many read for them in all cases where they do not give universal satisfaction.
