GEN. TAYLOR'S BENEVOLENCE .- A Washington letter-writer tells the following story of Gen. Taylor :- A venerable white headed man, 105 years old, having tottered up to the White House, early in the morning, had the good fortune to meet the President almost at the threshold. The centennarian introduced the threshold. The centennarian introduced himself; told Gen. Taylor that he was fee-ble, and that his blood was almost dried up in his veins, for the snows of one hundred and five winters, and the effects of hard sor-vice in the wars of our country, had left him but a short remnant of the evening of his long and eventful life. General Taylor, moved by the patriarchial years and voice, and simplicity of the man, shook him warm-ly by the hand and said : "Well, grandfather, I am glad to see you. Have you been to breakfast ?" The old man replied that he had not. "Well, then, you must come and take some breakfast with me." "No, your time is too precious. I desired only to pay you my respects; and I shall get a breakfast at the market house, for I am a stranger among these people, and an old man must be satisfied to do the best he can." "Well, then, you must come and breakfast with me.29 "No; your time is too valuable, and I will not tresspass upon it; good morning, General, and may Providence guide you." "Well, if you will go," said Gen. Taylor, extending his hand and slipping into that of the old man three half eagles-"if you will go, God bless you ; and see that you have a good cup of coffee for breakfast, and come up and dine with me before you leave the city."-And, leaning upon his staff, the old man, older than this republic of twenty millions of people, by thirty years, went, with a grateful recommended for sobriety industry and honesty. GOLD SEEKER'S GUIDE! Secret Art of finding Mines of Gold, Silver, Iron, Lead, Copper, Coal, and other Mine-ral Riches.

THE COLUMBIAN CALCULATOR.—This work is already introduced into some of the best Acadamies and a large number of Schools, where its use has given decided and universal sa-tisfaction, both to teacher and pupil. It is purely American in its character, based upon our own beautiful decimal system of currency. It contains more, the arrangements are better, and it is the easiest and cheapest work of the kind now in use; and it is so considered by hundreds of the most competent teachers and men of science in the Uni-on, who have recommended it. The brilliant results of his labors in California, and the discovery, this very week, of fresh veins of Gold in Virginia, and beds of Coal in Rhode Islaud, by it use, are alone sufficient to stamp it as the greatest discovery of the age. Nothing but the extreme cheapness of the instrument, and his desire to see it used for the benefit of mankind induces him to dispose of it at the low price of which he offers it. Besides this, his own desire for wealth is nearly

satisfactied. The following Testimonials, in proof of the value of the Goldometer, selected from a great number equally satisfactory, must suffice for the
