intery, I confess I never had any curiosity visit the Inquisition, taking it for granted hat every thing was carried on there fairly and honestly, as I was led to believe by people worthy in other respects of implicit trust Besides, the place itself is out of the beaten track of all strangers, and in a sort of cul de see behind St. Peter's, where it naturally retired to perform its blushing operations, and "do good by stealth." I was struck with the outward appearance of civilization and com-fort displayed by the building, which owes its erection to Pius V, author of the last creed but, on entering, the real character of the concern was no longer dissimulated.

A range of strongly barred prisons formed the ground-floor of a quadrangular court, and these dark and damp receptacles I found were only the preliminary stage of probation, intended for new-comers as yet uninitiated into the Eleusinian mysteries of the establishment. Entering a passage to the left, you arrive at a smaller court-yard, where a triple row of small barred dungeons rises from the soil upwards, somewhat after the outward look of a three-decker, "accommodating" about sixty prisoners. These barred cages must have been often fully manned, for there is a supplementary row constructed at the back of the quadrangle, on the groundfloor which faces a large garden. All these cellular contrivances have strong iron rings let into the masonry, and in some there is a large stone firmly imbedded in the centre with a similar massive ring. Numerous inscriptions, dated centuries back, are dimiv legible on the admission of light, the general tenor being assertion of innocence; "Iddio ei liberi di lingua calumniatrice," "lo Domenico Gazzoli vissi qui anni 19," "Calumniatares mendaces exterminabuntur." I read another somewhat longer, the drift of which is, "The caprice or wickedness of man can't exclude me from thy Church, O Christ, my only

The officer in charge led me down to where the men were digging in the vaults below; they had cleared a downward flight of steps, which was choked up with old rubbish, and had come to a series of dungeous under the vaults deeper still, and which immediately brought to my mind the prisons of which cannot fail to recommend itself to every or masonry, unsymmetrically arranged, five skeletons in various recesses, and the clearance had only just begun : the period of their than a century and a half. square ascending perpendicularly to the floor BEDSTEADS, of every pattern and price, of the building, and ending in a passage off the hall of the chancery, where a trap-door lay between the tribunal and the way into a suite of rooms destined for one of the officials. The object of this shaft could admit of but one surmise. The ground of the vault was made up of decayed animal matter, a lump of which, held imbedded in it a long silken charnel-house should be contrived under the dwelling, passes my ken.

But that is not all : there are two large subterranean lime-kilns, if I may so call them, shaped like a bee-hive in masonry, filled with lavers of calcined bones, forming the substratum of two other chambers on the ground floor in the immediate vicinity of the very mysterious shaft above mentioned. I know not what interest you may attach to what looks like a chapter from Mrs. Radcliffe, but had I not the evidence of my own senses, I would never have dreamt of such appearances in a prison of the Holy Office; being thoroughly sick of the nonsense that has for years been put forth on that topic by partisan peas. But here the thing will become serious, for to-morrow the whole population of Rome is publicly invited by the authorities to come and see with their own eyes, one of the results of entrusting power to clerical hands Libels on the clergy have been manifold during the last four months. and have done their work among the masses. MORE MINERAL WEALLH IN PENNSYLVAta .- A rich bed of manganese, heretofore und in this country only in Vermont, has een discovered in Greenwich township, arks county, on the farm of Mr. John Kohst, jr. The ore is of the richest quality, ielding 90 per cent. of pure metal. Messrs. endeareich & Co., and R. Bast & Brother ave made a contract for working the mine, nd have thus far obtained from eight to ten as of ore daily. Manganese is much in win the manufacture of porcelain ware and a coloring glass. It is a substance rather rhiter than cast iron, granular in texture, and may be reduced to powder by pounding.

AN INVALUABLE MEDICINE.—We have frequently heard the Celebrated German Bitters, manufactured by Dr. Heoffund, spoken of in terms of commendation, and we know deservedly so. It is a too common practice, in certain quarters, to paif all manner of useless trash, but in the above Bitters, hundred, are hiving witnesses of their great moral and physical worth. As a medicine of the Laver Complaint, Jamadice, Nervous Debility and Dyspepsia, it has been found invaluable, effecting cures and the rughly eradicating diseases, when all other medicines have failed. We feel couvinged, that in the use of the Gorman Bitters, the patient does not become debilitated, but constantly gains strength and vigor to the frame—a fact worthy of great consideration. The Bitters are pleasant in taste and small, and can be administered under any circumstances, to the most delicate stomach—Indeed, they can be used by all persons with the most perfect safety. It would be well for those who are much infected in the nervous system, to a moreove with one tea spoonful or less, and gradually increase. We speak from experience, and are of caurse, a proper judge. The press for and wide, have united in recommending the German Bitters, and to the afflicted we must cordinally advise their use.

GOLD HILL -We have been furnished with some interesting particulars about the Mine at Cold Hill, in Rowan county, It is said to have been discovered 18 or 20 years ago, but that no gold of large amount wasob. tained until within the last five years; since which it is calculated that \$350,000 per apnum is obtained. Three engines are in operation, which cost \$25,000; and two others are being erected. Eight different mining companies are working the mines at Gold Hill, and a large amount of capital is invested, estimated at \$300,000. There are some 700 inhabitants in the village, and the houses are wood; some neat white frames, and many merely log cabins. There are three stores, one tavern, six smith shops, a sadler, shoemaker, five physicians, a lawyer -There is no resident clergyman, nor any church immediately in the village .- North Carolinian.

EXPLOSION OF STEAM BOILERS .- Mr. Burke, late Commissioner of Patents, in his interesting report on this subject, attributes the bursting of steam boilers mainly to the use of cast iren boiler-heads, and the absence of such guards as inventive genius has furnished .-It is more than twenty years since the Government of France passed a law prohibiting the use of cast iron boiler heads, after some Vegetable Pills a valuable remedy in cases of General De-nility of the system, and in all Billious disorders.
