CRESCENT CITY. ONE MONTH LATER FROM CALIFORNIA

One Million and a Half in Gold Dust-En couraging Accounts from the Mines-Execu-tion on Board United States Frigate Savannah The Ships Susan G. Owens and Mason at San Francisco.

NEW YORK, Dec. 7-11 P. M. The steamship Crescent City, Captain Stoddard, arrived here about noon, brings dates from San Francisco to the 2d of November The Crescent City has on board 160 passengers, among whom is J. P. Judd, Minister to the King of the Sandwitch Islands.

The Crescent City has in freight one millien of dollars in gold dust, in addition to about four hundred thousand dollars in the hands of passengers.

The news, generally, from California, is unimportant.

The accounts from the mines continue encouraging, gold was still found in abundance. The health of the miners is generally good, with the exception of some who are subjected to slight attacks of dysentery.

It is estimated that there are at least 80,-000 persons at the mines.

Vessels continue to arrive in large num bers from the United States and all parts of Europe. There are now about 100 British vessels in the Bay of San Francisco.

Thirteen hundred passengers passed through Chagres on the 25th and 26th ult. There are now over 100 passengers at Cha-

gres awaiting passage to California. The Isthmus is perfectly healthy and tra-

velling good. A naval execution took place on board the United States frigate Savannah on the 23d of October. A sailor was hung at the yard arm for making an attempt to murder one of his officers. The names of the mutineers were John and Wm. Black, both Englishmen, shipped some time since at Valparaiso, in the United States schooner Ewing. There were five persons implicated, but the above named men having confessed the crime and acknowledged their guilt, the other three were sentenced to hard labor for the remainder of their term of service, viz : three years.

The constitution for the State of California has been agreed upon and published.

Among the passengers in the steamer Crescent City is the Hon G. P. Judd, Minister to His Highness the King of the Sandwich Islands, accompanied by Alexander Lahihiho, heir apparent to the Hawailian throne, and his brother, Lot Kamehambeha. The object of Mr Judd's visit to the United States and Europe at this period has reference to the late outrages of the French at the Sandwich Islands.

The bubble, if it can be so called, from all appearances, will outlive its worst enemies.

PLACER INTELLIGENCE. SHERLOCK's DIGGINGS, Mariposa, Sept. 27. We muster about 1500 strong in this neigh-

Sherlock has gone lute the mountains, no to decamp, which they did forthwith. We all intend to winter here, as we can easily make comfortable quarters. This place is distant 11 miles from Fremont's discovery, and is much the richest of the two deposits. Many large pieces have been recently found here, averaging from 1 to 8 pounds, pure gold. The finest pieces usually are worth gion of "big lumps."

THE PROSPECT DURING THE WINTER. A correspondent of the Courier, writing from San Francisco, says:

The tide of emigration is rapidly turning homeward, and sailing vessels for Panama are filling up more readily than did the same ships on their departure from the States .-Comparatively few will return enriched, but by far the greater number must come back to their father-land impoverished and disheartened.

I wrote very disparagingly of the mines in my last correspondence, but the homeward emigration for the next three months will fully substantiate my opinion. The sufferings in California during the approaching winter cannot be estimated. The first heavy rains will drive thousands of miners from the mountains into the cities in hopes to procure shelter and employment. By the middle of December the avenues to the mines will be closed, and of course the demand for labor will nearly cease during the rainy season -Imagine, then, the condition of a crowded population, dependent upon their labor, receiving daily accessions to their numbers by fresh arrivals, unsheltered, sick, jelle, and with too fair a prospect of a general failure in provisions and breadstuffs, and you may lraw your own conclosions.

Provisions of all kinds have risen enor mously within a week, and the market is quite destitute already of flour and pork, the two great staples for the miners. The supplies for the immense number who purpose wintering in the mines is also very limited, and my own opinion is, that in three weeks after the roads close, thousands will be compelled to leave the mines and return to Sacramento city, Stockton, or San Francisco, to procure fond

SUCCESSFUL NEW YORKERS.

A party of ten from New York, turned the current of a small stream, and they gathered the first day an average of \$1500 in gold dust each. They then continued their labors for five weeks longer, and the result was an average of \$100 per day, for each man.

THE PARKMAN CASE.

The Boston Mail, of Thursday, speaks of the following discoveries having been made at Professor Webster's house:

Owing to information, obtained, it is said by some person employed at the jail over hearing a conversation between Professor Webster and his counsel, officers Clapp and Hopkins were despatched last evening to make a general examination of the house of

the professor at Cambridge. Mrs. Webster received them politely, and interposed no objection to the search. On now and then of crim. cons., di-d elopements. Our fashionable cir-covered beneath a quantity of other papers, the identical note for \$487, which Professor e of some five or six celestial ladies Webster has stated he took up on the Friday that Dr. Parkman was last seen to enter the Medical College. So far as the finding of this note is concerned, it only corroborates what Prof. Webster has stated in regard to taking it up. But a further search produced evi-

dence of a more startling description. Also, another note payable to Dr. Parkmen, for \$2400, dated in 1847, and becoming due in 1851! The note was secured by mortgage. We could not learn the month or the day of the month the note was dated, but the fact that a note for the above sum, running five years and payable in 1851, was yesterday liscovered among Prof Webster's papers, is true and beyond question. The back of this last named note contained numerous endorsements, but to what amount, or whether sufficient to cover the face of it we have not been sheet able to learn. Another statement is, that the ments on the back, and that the note for \$487

During last week several checks drawn by Dr. Webster, on the Cambridge Bank, were presented at the counter of that institution ne knows where, and we have elected a for payment, but the teller's invariable annew Alcade, who, the day of his installation swer was, "Mr. Webster has no money here, into office, issued an order for all Mexicans nor has he had for some time." We were shown a check yesterday, drawn in favor of Mr. Cummings, blacksmith, in Cambridge street, for \$9 15, that was refused some ten days since.

The Transcript of Friday says :

We learn that the facts quoted yesterday from the Mail in regard to the notes found at Dr. Webster's house were not fully stated .-about 50 cents, so you perceive this is the re- One note for \$400, dated 1842, was past due, cancelled and filed away. It had no endorsement, and had, to all appearance, been taken up by payment or renewal.

With regard to the second note due 1851, which was for \$2400, and endorsed, it is believed to have been secured by a mortgage on Dr. Webster's mineralogical cabinet. which cabinet was sold within a year for \$3000, to an association of gentlemen, who presented it to Harvard College. The fair presumption and belief is, that the note was prepaid, on the sale of the cabinet.

Thus far the public suspicion appears have run in one direction; but by the following from the Cambridge Chronicle, it will be seen that something may be said on the other

There are many circumstances, which, if properly considered, tend much to relieve he terrible position of Professor Webster .-Not only has no positive evidence been brought to show the agency of Prof. W. in the death of Dr. P., but many of the strong lowance. facts already are proved to have no foundation. The spots of blood said to have been discovered upon the floor and stairs, is found to be only tobacco juice! The pants, with Prof. W.'s name upon them, and stained with blood, are those which he wears in his laboratory, stained with acids! The tin box ordered at Waterman's, 3 feet long, dwindles conte 18 inches long, 18 wide and 13 inches deep, and of such description as another individual states he has often made for him .-As to the matter of the receipt which has been so much insisted upon, who ever heard of a receipt being given on the payment of a

That any individual should have known him to be at the Medical College late on Friday night, when he is known to have come home early and been engaged in spending a social evening with Judge Fay and other friends, is, to say the least, remarkable .-And it is no less remarkable that the janitor of the college, or any other individual, should have observed such unusual appearances about his rooms, as to have excited their suspicions, not only when he was thus absent, but so soon after the disappearance of Dr. P., and only divulge those suspicions at so late an hour. How great importance is to be attached to the pretended secrecy of Prof. W.'s apartments, may be inferred from the that a few weeks has effected, is truly mar- fact that it was the duty of the janitor to take care of the entire building, and of course had ready access to each room. Cures very many of the most strongly marked and developed cases of Pulmonary Convengelon—next, undoubted cases of afterated and diseased LUNGS—such Applets eases as were never before caused by any other medicine. So utterly hopeless were some of the milliered persons, as to have been prenounced by physicians and friends to be activately pixtus. Some who had their hurial-clothes made, have been carred, and yet live—others who it was said would not live smeller day, are now as well and heavy as they ever went.

It possesses all the cleaning and purifying virtues meatly an powerful and active as the preparation which we call

BRANT'S INDIAN PURIFYING EXTRACT. This differs from that, because this possesses segmal other Medicarbons which are possibled adopted to, and are desertially accounts, to cure

Coughs and Consumptions, and all discusses of a pulmonary nature—such discusses a usually prove so fatal under ordinary treatment, when they attack that
