A MONTH LATER FROM CALIFORNIA. ARRIVAL OF THE STEAMSHIPS EMPIRE CITY AND GEORGIA.

50,000,000 of Gold on Board the Cherokee. The Empire City brings about thirty passengers, but no gold.

The steamship California left San Francisco on the afternoon of the 1st April, with the regular mails and 450 passengers.

The great depression in business affairs, noticed when the previous steamer arrived, has not been removed, and matters continue to look down.

The miners are commencing their summer operations. It is estimated that over one hundred thousand are either in or on their way to the mines.

Money continues the scarcest of any article, the exorbitant sum of 10 per cent. per month being still the current rate of interest.

Under the head of advancement the Alta California says that—the condition of San Francisco is as progressive as a locomotive engine under a full head of steam.

The information from the Southern mines generally is quite encouraging. Those who worked faithfully during the winter in the gulches around the Mokelumne and between the Stanislaus and the Tuolumne, have done well.

THE HORSE WAS SAVED.—The following anecdote was related by an individual from Clarence, N. Y. A splendid horse belonging to his neighbor, had his fore leg below the knee badly broken—after laying three weeks, and nothing done for it, the animal in the mean time by thrashing about in his agony, had worn the leg nearly off.

The owner with axe in hand was about to put an end to the sufferings of his favorite beast, when our informant solicited and obtained a present of the horse, and with help got him home. He suspended him in a sling, replaced the bones, and applied faithfully, Merchant's celebrated Gargling Oil, which caused the bones speedily to unite and imparted strength to the limb.
