Digestion is chiefly performed in the stomach by the mid of a finid which freely exades from the inner cost of that organ, when in a state of health, called the Gastrie Juice. This fluid is the Great Satvent of the Food, the Paritying, Preserving, and Stimulating Agent of the stomach and intestines. Without it there will be no digestion—no conversion of food into blood, and no intrition of the besty; but rather a foul, torpid, prinfut, and destructive condition of the whole digestive apparatus. A weak, half dead, or injured stomach produces no good Gastrie Juice, and hence the disease, distress and debility which ensue. It is also found in the stomach of mirrads, as the ox, calf, &c. It is the material used by formers, in making classes, called Remort, the effect of which has long been the special wonder of the dairy. The caroling of milk is the first process of dipestion. Remort pressures astomishing power—The stomach of a calf will cardle nearly one thousand times its own weight of milk. Baron Laclog states that, "One part of Pepsin dissolved in sixty thousand parts of water, will digest meat and other food." Discussed stomachs produce in good Gastrie Juice. Remort or Pepsin. ## NOTICE TO HEIRS.

NOTICE is hereby given given to the heirs of Henry Fetter, dec'd., late of Upper Mahonoy, to appear at an Orphans' court, to be held at Sunbury, in and for the county of Northumberland, on the first Monday of November next, then and there to accept or refuse the real estate of the said dec'd, at the valuation fixed upon the said real estate by an Inquest duly awarded and confirmed by the said court, or shew cause why

preparation. There are few higher anthorities than Dr. Percira.

Dr. COMBE, in his valuable writings on the "Physiology of Digestion." observed that "a dimination of the dae quantity of the fastire Juice is a prominent and all-prevailing cause of Dyspepsia;" and he states that "a distinguished professor of medicine in Lemion, who was severely afflicted with this complaint, finding every thing else to tail, had recourse to the Gastrie Juice, obtained from the stounch of iving animals, which proved completely successful."

Dr. GRAHAM, author of the famous works on "Vegenable Die," says: "it is a remarkable fact in physiology, that the stounchs of animals, uncertaid in water, impart to the fluid the property of dissolving various articles of flood, and of effecting a kind of artificial digestive process."

Dr. SRAON'S great work, the "Chemistry of Man," (Lea & Blanchard, Phila, 1846, pp. 221-2) says: "The discovery of PEPSIN forms a new era in the chemical history of Digestion. From recent experiments we know that food is dissolved as rapidly in an artificial digestive fluid, prepared from Pepsin, as it is in the natural Gastrie Juice itself." the same should not be sold, &c.
