

California News

TWO WEEKS LATER FROM CALIFORNIA.

The steamer Crescent City, which left Chicago on the 11th, and Kingston on the 13th of March, bringing San Francisco dates to the 15th ult., and having on board \$517,370, \$1 in gold dust, arrived at New York, on the 21st inst.

The Alta California, of Feb. 15th, says:—Since our last review we have had a continuance of fine weather, and for the first week in February a decided improvement in the amount of business done, and on some articles an advance has been established; but for a few days past, owing to the non arrival of the mail steamer overdue eight days, there has been a hesitancy, and less business doing, and at least part of the advance lost.

We have no unfavorable news from the mining regions, and we do not think the interior is overstocked with goods, and we anticipate at least a fair amount of business, not only from the interior, but as steam communications are now open and regular both up and down the coast, we calculate a very considerable accession of demand from those sources.

Since the departure of the last steamer for Panama, the Indian difficulties have been on the increase rather than otherwise, and murders, robberies, and reports of hostilities, collisions and battles, have been rife.

Efforts have been made in the Legislature to raise funds and State troops for carrying on the war. One of the Governor's Aids, J. Kelly Johnson, Esq., has been despatched by the Legislature to the scene of disturbances to act on the part of the State. Authority has been given to raise a force of volunteers.

The Commissioners have also left Stockton with an escort of some hundred of United States troops, and it is confidently believed they will be able to form treaties with the various tribes, and thus give quiet to the country.

The weather has continued dry, and, for inter, wonderfully warm. The rain now is what we shall have more rain, the consequences of which will be severe disappointment to those engaged in the dry diggings and those that fall to the stock and agricultural interests.

The health of the state is one of the most serious descriptions. There are scarcely a death or sickness in any part of the State.

The excitement about the gold bluffs has died out, but much subsided. It yet remains for the companies engaged there to see whether the amount of gold there can be made profitable to them.

The Klondike, South's river and other fields in the extreme north of the State, seem to bear the palm in the faith of our people in their riches.

State laws having been found inadequate to the wants of some localities, the people have been dispensing justice under the code Judge Lynch.

Not a flake of snow has fallen the past winter at Nevada city or Rough and Ready, so mountains contiguous are covered with light hoar, which is fast melting under the rays of a bright sun.

Rich diggings are said to have been discovered near Bear River. The gold is taken in decomposed granite, near Sheep Hollow, says the Times.

The Times says, of thirteen miners who were working for a year on Feather riv., at Long's Bar, have averaged \$3130, — most made by any one person is \$5449, — tinuous labor is the only surety of success here.

ALMOST MARRIED.—At Hudson, Erie county the 3d, there was a curious attempt at marriage.

It appears that relations of intimate friendship had existed between Dr. B. and Miss — for some two years, which resulted in her presenting herself at the Episcopal church for the purpose of marriage. The portion of the services, embracing the vows of the bridegroom, were promptly refused to him. The officiant, to which promptly answered "No!" The minister asked her if she was in earnest in what she said. "Yes, sir," said she, "has he not himself trifled with the affections of me, and I have had done him justice!" — turning round she took a gentleman's hand and left the church. The doctor says he "understand it, and declares his innocence."

ORPUS CHRISTI SALT.—The evidence of great resources of Western Texas are every increasing. Yesterday a specimen natural salt, found eight miles from Cor. Christi, was hauled in which appeared entirely pure, while it is stated that the salt is inexhaustible. Carts are sent out the salt is shoveled in with little labor expense. What gives it increased value so is that the salt, which is raised so modestly in that section, can be much more easily cured with this salt than any other, as it takes or absorbs the salt with the best facility. It is further thought that article, when ground, will make a fine for the table, and for all cooking purposes.

NEW PORT AU PRINCE.—By the Brig Mil. Capt. Harper, at New York, brings date to 3d inst. Coffee was selling at \$76 per 1000 lbs., logwood, 40 per 1000 lbs. The coffee was comparatively quiet; although the discovery of the conspiracy against government, a great many removals were in place, and a number of arrests of the persons of the island. The government is keeping the troops marching from place to place, with a view of separating them. There is a commission of four appointed to confer with Mr. Walsh and the rich and English consuls, respecting the affairs of the Eastern part of the island, but its date nothing had been done.

There were no American vessels of war at Port-au-Prince, nor had there been since the one sailed for Cape Haytien.

Provisions were growing scarce, and was beginning to come into the market in rather large quantities.

FRESH WATER FROZEN BENEATH THE SEA.

SEA.—Fresh water was found frozen into solid ice in the lead which conveys the Coboticut water under the sea, water of Boston harbor to East Boston, and which pipe is 36 feet below the surface of the water. The explanation of the phenomena is that fresh water freezes at 32 deg. F., while sea water requires a reduction of temperature 44 deg. lower, or to 274 deg. before it solidifies. Thus the salt water was doubtless cooled below the freezing point of pure water, and conducted away the heat from the lead pipe, so as to lower its temperature sufficiently to cause a film of ice to form on the inside of the pipe, and by successive layers of ice the pipe was gradually filled.

A SERIOUS JOKER.—In the reign of Edward the Fourth, the sign of the "Crown" in Chesapeake was kept by one Walter Walker. This person had observed in joke that he would make his son heir to the Crown. The words reached the jealous ears of royalty; the foolish equivocal was construed into the crime of high treason, and the man was hanged opposite to his own door.

A MAN KILLED.—On Saturday last a German man named Charles Imms, from the vicinity of Funkstown, says the Chambersburg Whig, was committed to jail in that place for killing a man named McFarren, by cutting him in the back with an axe.

POSSESSOR RICH.—At Boston, an auction sale of twenty-five tierces of rice, damaged by the water on India wharf was stopped on Friday, by the Mayor, in order to ascertain whether a sloop or other person in the wharf had impregnated it.

ROBBERY IN LANCASTER.—The collector's office in Lancaster, Pa. was entered and robbed on Friday night of \$800. About \$200 of the stolen money, consisted of old torn Relief notes, and about \$300 in gold funds.
