THE LEBANON VALLEY RAILROAD .- The Lebanon Courier is again orging the Lebanon Valley Railroad as the natural route for conecting Philadelphia with the West. It takes the report of Mr. Edward F. Gay to our Legislature, showing the cost of improving the curves on the Columbia road, which will be necessary on the completion of the Pennsylvania railroad to the Ohio. Mr. Gay proposes to make changes and lessen the curves to the extent of 24 5-8 miles, at a cost of \$1,058,585, or nearly as much, the Courier says, as it would require to construct the whole Lebanon Valley Railroad. The Courier says, that as the Pennsylvania road will have to compete with good modern built roads in the State, both North and South of us, it is clearly of the utmost importance that the Lebanon Valley Railroad should be so constructed and adopted as a part of the great thoroughfare, in consideration of the great superiority in grades and curves it possesses over the Columbia road. It refers to the report of the engineers who surveyed the route in which its advantages are set forth.

CHERRY PECTORAL:

For the Care of COUGHS, COLDS, HOARSENESS, BRON-CHITIS, CROUP, ASTH-MA, WHOOPING-COUGH AND CONSUMPTION.

The uniform success which has attended the use of this preparation—its salutary effect—its power to relieve and cure affections of the Lungs, have gained for it a celebrity equalled by no other medicine. We offer it to the afflicted with entire confidence in its virtues, and the full belief that it will subdue and remove the severest attacks of disease upon the throat and Lungs .-These results, as they become publicly known, very naturally attract the attention of medical men and philantropists everywhere. What is their opinion of CHERRY PECTORAL may be seen in the following :

VALENTINE MOTT, M. D., Prof. Surgery Med. College, New York, soys :-"It gives me pleasure to certify the value and efficacy of Ayer's CHERRY PECTORAL,

which I consider peculiarly adapted to cure diseases of the Throat and Lungs." THE RT. REV. LORD BISHOP FIELD. writes in a letter to his friend, who was sinking under an affection of the Lungs :- "Try the CHERRY PECTORAL and if any medicine can give you relief, with the blessing of God that

CHIEF JUSTICE EUSTIS. of Louisiana, writes "That a young daughter of his was cured of several severe attacks of Croup by the CHERRY PECTORAL."

ALBANY, N. Y. April 17, 1848.
Dr. Ayer, Lowell—Dear Sir.—I have for years been afflicted with Asthma in the werst form; so that I have been obliged to sleep in my chair for a larger part of the time, being unable to breathe on my bed. I had tried a great many medicines, to no purpose, until my Physician prescribed, as an experiment, your CHERRY PECTORAL. At first it seemed to make me worse, but in

weeks, the disease is entirely removed. I can sleep on my bed with comfort, and enjoy a state of health which I had never expected to enjoy. GEORGE S. FARRANT. MEPARED BY J. C. AYER, CHEMIST, LOWELL, MASS, to Sold by Henry Masser, Sunbury; Mary A. McCay, Northumberland Dr. Gearhart, Se-

ANOTHER SCIENTIFIC WONDER. PEPSIN! DIGESTIVE FLUID,

GASTRIC JUICE! A GREAT DYSPEPSIA CUEER, repared from RENNET, or the fourth Stommen of the Ox, after directions of BARON LIEBIG, the great Physiological Chemist, by J. S. HOUGHTON, M. DIGESTION. DIGESTION.

Digestion is chiefly performed in the stomach by the hid of a fluid which freely exudes from the inner cont of that organ, when in a state of health, called the Gastrie Juice. This fluid is the Great Salvent of the Food, the Parriying, Preserving, and Stirmlating Agent of the stomach and intestines. Without it there will be no digestion,—no conversion of food into blood, and no nutrition of the body; but rather a foul, torpid, painful, and destructive condition of the whole digestive apperatus. A weak, half dead, or migred stomach produces no good Gastrie Juice, and hence the discusse, distress and debility which cause.

PEPSIN AND RENNET.

PEPSIN AND RENNET.

PEPSIN is the chief element, or great Digesting Principle of the Gustrie Juice, it is found in great abundance in the solid parts of the human stomach after death, and sometimes causes the stomach to digest itself, or eat itself up—
It is also found in the atomach of animals, as the ox, colf,
Ac. It is the material used by farmers in making cheese, called Remet, the effect of which has long been the special wonder of t bedairy. The cording of milk is the first process of digestion. Remet possesses astonishing power.—
The stomach of a calf will cardle nearly one thousand times its own weight of milk. Baron Liebig states that, "One part of Pepsin dissolved in sixty thousand parts of water, will digest ment and other food." Diseased stomachs produce no good Gustre Juice, Remet or Pepsin. To show that this want may be perfectly supplied, we quote the following

SCIENTIFIC EVIDENCE! SCIENTIFIC EVIDENCE!

BARON LIEBIG, in his celebrated work on Animal Chemistry, says: "An Artificial Digestive Fluid managements to the Gostre Juice, may be readily prepared from the macous membrane of the stomach of the call, in which various articles of food, as ment and eggs, will be softened, changed, and digested, just in the same manner as they would be in the human stomach."

Dr. PEREIKIA, in his famous treaties on "Food and Diet," published by Fowlers & Wells. New York, page 35, states the same groat fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira.

Dr. COMBE, in his school-

preparation. There are few higher anthorities than Dr. Pereira.

Di. COMBE, in his valuable writings on the "Physiology of Digestion," observed that "a dimination of the date quantity of the Gastrie Jaice is a prominent and all-prevailing cause of Dyspopeia;" and he states that "a distinguished professor of medicine in London, who was severely affined with this complaint, finding every thing else to fail, had recourse to the Gastrie Jaice, obtained from the stomach of living animals, which proved completely successful."

Dr. GRAHAM, author of the famous works on "Vegetable Diet," says: "it is a remarkable fair in physiology, that the stomachs of animals, unoversated in water, impart to the finid the property of dissolving various articles of food, and of effective a kind of artificial digestion of them in no wise different from the natural digestive process."

Dr. SHON'S gent work, the "Chemistry of Man," (Lea & Blauchard, Phila, 1846, pp. 321-3) says: "The discovery of PEPSIN forms a new era in the climical history of Digestion. From recent experiments we know that food is desselved as rapidly in an artificial digestive finit, prepared from Pepsia, as it is in the natural Gastrie Juice itself." tened upon me. I became emaciated, could not sleep, was distressed by my cough, and a pain through my chest, and in short had all the alarm Professor DUNGLISON of the Jefferson College, Phili-

delphia, ia his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gentric Juice obtained from the living human stomach and from a minusa-are well known. "In all cases," he says, "digestion occur red as percetty in the artificulus in the natural digestions." AS"A DYSPEPSIA CURER, Dr. HOUGHTON'S preparation of PEPSIN has produced the most marvellous effects, caring cases of Debility, Emaciation, Nervous Decline, and Dyspeytic Consumption, supposed to be on the very verge of the grave. It is impossible to give the details of cases in the limits of this advertisement, the market of the safety of the product of the safety of the possible to give the definite of classes in the limits of this advertisement—but nuthenficated certificates have been given of more than TWO HUNDRED REMARKABLE CURES, in Philadelphia, New York, and Boston alone—These were nearly all desperate cases, and the cures were not only rapid and weatherful, but permanent.
