LETTER FROM PATHER GAVAZZI TO THE EDI-TOR OF THE NEW YORK L'ECO D'ITALIA.

QUEREC, Canada, June 8, 1853. G. F. SECCHI DE CASALL-DEAR FRIEND -I only write a few particulars of the shock ing case which happened the day before yesterday; you will perceive it more amply described in the papers I send you. I will begin by saying that the appearance of the assailants was most despicable, for they came dirty, torn and in their shirt sleeves, the better to show their origin. It was their aim to secure me alive, in order to murder me without the church; but not having succeeded they attempted to kill me within the church. Many were led to believe it, when they had by repeated blows felled Paoli to they said, "this is the very man." Another by turning the gas keys, for by so doing, from their concerted plan, they would have of me, seizing at the same time, every one present, mostly ladies and children. But man proposes and God disposes. It was not possible to turn the gas key, nor so easily to

Having rid myself of my first assailant by throwing him over the pulpit, I took off my as a true Italian crosader. But again a gang of the outward assailants. to the number of more than seven hundred, rushed into the church. This is owing to another unpardonable mistake of the police; the stairs and parapet were assailed with renewed violence. The artillery sergeant feeling his equilibrium fail, clung to Paoli, who, amid the great throng of assailants, could no longer mangevre his stick; meanwhile two of the savages had seized Paoli to overthrow him from the stairs; he cried out to me fifteen feet.

This was to have been the hour of my death, and could have been. The falling with such violence might have sufficed to crush my skull; but God was there to protect his poor, but confident servant. I fell on a floor of enemies' heads and shoulders, and it was afterwards said that as I was of iron disposition, I weighed also as iron itself; but I sustained no wound from my fall. The crowd then dispersing, I found myself stretched out on the ground, with a legion of sava: ges over me, overjoyed at being able to slay me. I then received a kick on my chin, which has produced a slight wound, and a contusion on the jaw; as the great crowd prevented the use of sticks, they endeavored to supply it with their feet. I perceived that nothing but a gigantic effort could save me, and I employed it accordingly. I rose in spite of them, and by blows opened a passage to the staircase which leads to the subterraneous place where the Sunday Schools are and having met assassins on the stairs. overcame them; the last, who from his size impeded my passage as it were a barricade, and threatened me with his large stick, calling me by the vilest names; I very coolly rolled down the stairs, and jumping over him. reached the entry of the Sunday School.

Fortunately the school was dark; having examined it in the morning I became acquainted with its structure. I took the left path, among an innumerable quantity of benches, while the savages, who were still pursuing me, were obliged to delay before they could teach the door. It was then I heard the cry of Pauli, "God help me," which led me to believe that he was assaulted and beaten again by the assassins. Being left half dead, he would have been killed by the people had not an unforescen hand conveyed him to the subterraneous school, where he found bimself, as it were, miraculously saved from a certain death. After five or six minutes of fatal suspense, some one of the police came. The lights were again lit, but this did not prevent the assailants from breaking all the windows of the school, by throwing large stones, one of which hit Paoli on the breast while Dr. Douglass was examining his wounds. But fortunately the military arriwed, and the assassins were dispersed. Paoli was the first to be led home. I followed this is a coach, with the Mayor of the city and all the streets was protected by strong patrois On examining our bodies, it was discovered that poor Paoli had received eigth wounds from sticks, one of which is six inches long. I was found to have a wound on my head from a stone, and another on the occiput, from the blow of a club. They, however, gave no pain, as I contrived to let them my setting out from New York.

REMARKABLE ESCAPE -The Montreal Gazette, of the 1st in a postscript, makes simple mention of a very remarkable escape of three hundred passengers from the consequences of a steamboat explosion. That number of persons had just landed from the steamer St. Pierre, when the boilers exploded, killing eight persons-all that remained on board of the boat. The destruction of the vessel was so complete, that very few of the three hundred could have escaped, if the explosion had occurred five minutes sooner.

Caution, Caution.

Caution, Caution.

Take Notice,—The public in general, but especially those who suffered by the swindling operations of a set of scamps who, during the Spring and Summer of 1853 were industriously engaged in putting up as called—LIGHTNING RODS. A new phase or mode of swindling has been all pited by the same gang of operators. It is this. They are travelling about the City as well as the Country, selling what they represent to be my magnetic points, or something still better. In some instances they have succeeded in guilling the unsuspecting by taking off the Pewter Point and placing one of their valuable and highly improved points in its place. But strange to say, on examination the new point proved to be similar to these taken down. They are made of Pewter, "Lead, Copper, Cast and Wrough iron. Some of Briss with zine bairs. There may be many mere kinds offered to the public, but the above I have been called on to examine, and I free is sushed the former company, and yet the points they carry fit the tops of the rosts examily, and even the thread of the screw is the some. I have conversed with two of these gentry within a slow days, and I know them to be the sine men that put up the same kind of rods has sees un only in a different section, and under different immes.
