2,500 Acres Timber Land

FOR SALE. SEVERAL VALUABLE TRACTS OF TIMBER LAND, comprising about 2,500 acres, part of which is rituated on Tobyhanna Creek, and part on Muddy Creek, within three miles of Lehigh River, in Penn forest township, Carbon County, one of the great Coul Counties of Pennsylvania, can be had at a bargain, if ap-

plication be made soon.

These lands are thickly covered with the best timber of that region. While it is believed that 75,000 feet of lumber to the sere, can be cut from a large portion of the land, the balance will average not much less than this figure. Tha kinds of timber found on the land are Hemlock, Spruce or White Cedar, White Oak, White Pine and Chestnut but principally made up of White Pine and Hemlock.

The Tobybanna and Muldy Creeks are large The Polystanna and Muddy Creeks are large and rapid streams, yielding is vast amount of water power, and are capable of driving a large number of saw milfs. They empty into the Lehigh, which stream, with the Lehigh Canal affords an outlet to the most desirable lumber markets.—
There is, too, under contemplation, a callway leading to the citeriof New York and Philadelphia which runs within one mile and there quarters of the land. Through these avenues lumber can be belivered in either of the cities saused, for about \$7-per thousand feet—thus enabling persons engaged in the teade to derive greater preits than

attend investments generally.

In addition to the timber, convertible into every shape of lumber, there is much that will answer for spars of vessels—a sort of timber that ship builders have been obliged to purchase in Maine, or at other distant points.
Unlike most of the lands on the Lehigh there has, as yet, been no culling of the timber on this property. It stands undisturbed by the weadman's axe. It is, therefore, the more valuable. The lumber trade of the Lehigh has been carried on to such an extent for years past, that a scarcity of good timber is beginning to be felt. Ever season necessarily increases this difficulty. The consequence must be an enchancement of the value of timber lands. Those im-culled tracts
