TASHIONS AND FURS.

Louis and and

rage for fors was never greater, perthen the present season promises. For ber of years the trade has gradually ind in extent and importance, till furs to have become an almost indispensable is of ladies' apparel. The style has ed since the last season, by the widenthe "victorine" into a cape, so that, in cases, it is substituted for cloaks and 8. Tailors ingeniously contrive so to heir styles, particularly as to the length its and waists, as to compel an obserof their whima.

like manner, furriers create a demand w patterns, by rendering the former antique and distasteful, and many who, since, provided themselves altogether fashion, and under the necessity of furoutlay and the aid of the furrier. The sable, or American mink, has suddenly de very popular, from its resemblance to Russian sable, and will be the fur most this winter. Though costing not more one third as much as the real sable, its arance often gives it a preference. The commonly known as the Russian sable, illy the Hudson Bay sable, and which or \$300 to \$500 per cape-choice, as us \$800.

ie genuine Russian sable is very seldom in the United Stats and a set-muff, and cuffs-cots \$1400 to \$2000. The e martin, from Germany and Greece, the r being the best, is still much worn, in capes, and is among the handsomest Good sets are to be had from \$30 to); extra \$125. Ermine costs \$4 to \$500 set. The oppossum (mountain martin) the staple for medium priced furs, particu-for the country trade, and black fox silfox, squirrel, &c., are cheaper still. The e of all kinds of furs are slightly in adce of last year. The mink is very much dvance, and the manner of making up all riptions still further enhances their cost, Y. Jour Com.

OFFEE IN MAINE .- The Rural Intelligenstates that a friend, residing at Mount mon, Maine, has raised in the open air, his place, for the last three years, the verde coffee plant, the seed of which was ught thither five years ago from Cuba .-grows about two feet high, and produces berries in pods something like peas. The nts, he says, have matured, even this senand the berries ripened without injury m frosts.

HOW TO BREAK UP A COLD. Dr. Hall, in his Medical Journal, gives the lowing directions for breaking up a cold : bad cold, like measels and mumps, or ter similar ailments, will run its course out ten days, in spite of what may be done it, unless remedial means are employed thin forty-eight hours of its inception. any a useful life may be spared to be inasingly useful, by cutting a cold short off. the following safe and simple manner. On e first day of taking a cold there is a very pleasant sensation of chillness. The moit you observe this go to your room and v there; keep it at such a temperature as It entirely prevent this chilly feeling, even it requires a hundred degrees Fah. In adtion, put your feet in water half leg deep, bot as you can bear it, adding hotter water om time to time, for a quarter of an hour, that the water shall be hotter when you ike your feet out than when you put them 1, then dry them thoroughly, and put on arm, thick, woolen stockings, even if it be ummer, (when colds are most dangerous,) nd for twenty-four hours eat not an atom of ood, but drink as largely asyou desire of any and of warm tens, and at the end of that ime, if not sooner, the cold will be effectually roken, without any medicine whatever." This theory is no doubt, good for weak conditutions, but for a hale hearty person we rould recommend the substitute of cold water irinks in the place of hot tea.
