Such is the case in the work before us. It treats the subject, though not a novel one, in a more sensible and practical mouner than we have eyer known it done before, and so interests us, that we do not seem to be reading a story, but beholding living characters, and scenes passing, as it were, in a punomma before us. The style is elevated, the plot effective, and filled up in a masterly manner. The moral lessons inculcated in it are such as to give it a claim to the favor of all the good. The characters are drawn with a close eye to enture, and marked and distinct in their delinentions. The scenery of the pacture, its lights and shades, are true to life. The betoine, sweet Kate, is a model of all that is loveable in woman, combined with firmness of purpose and rectitude of character, sufficient to bonish even the cherished one from her heart, when found pursuing the
