LANTIC RAILROAD AN ACCOUNT PROM AN EYE-WITNESS.

The community was started on Saturday night by the varied rumors of a fearful collision on this road. The following account was chtained by our reporter from one of the passengers, and we consider it reliable:

The regular afternoon express train started at a quarter after 4 o'clock from Cooper's Point, and was reprinted at a grant of the cooper's cooper and are started at a cooper started at a grant of the cooper's cooper and was reprinted at a grant of the cooper's cooper started at a grant of the cooper started at a gra

Point, and was running at a very rapid rate of speed, and had reached a point about six miles below Hadonfield, and twelve miles below this city, when the passengers were alarmed by a violent concussion and surging to and fro of the cars. Our informant was, sented with several friends on the very last seats of the leave as The force was so great that he the last car. The force was so great that he says, their seats were rocked violently and were crushed under them. The middle car escaped without injury. As we jumped from the cars a sight was presented, appaling the stoutest hearts. Two large locomotives, sevcraf freight or wood cars, the first passenger cars, tender and baggage car were piled, literally one on top of the other, to a height of thirty or forty feet. Some of the inmates of the first car crept out from the ruins, and others were dragged out, covered with their own blood or that of others who had been injured near them. Many of those uninjured worked manfully in relief of the poor sufferers who were speedily carried among the bushes growing along the track. The sight was a very painful one. On either side the poor fellows were lying, surrounded by percons endeavoring to recognize or assist them. It was soon discovered that the loss of life was not so great as we feared,

Incidents.—The first person we saw was the fireman, whose body lay among the bushes, with the head almost severed by a long and deep gash, from his shoulders. The ension was inevitable, gave an alarm and jumped clear of the falling mass around him, but his fireman was caught amid them, and no doubt was struck by a piece of iron from the locomotive and thus killed instantly. The engineer picked bim up and carried him to the car which was speedily fitted up for the sufferers

Donnelly, the conductor of the express train, was most terribly mangled; his legs, below his knees, were actually torn and mashed into ribbons of flesh and muscles. He bore his agony with great fortitude, and seemed more auxious to know "Who was blamed ?" A scene occurred here that brought tears to every eye. The poor fellow had his wife and children on the train for a trip to the ocean. The poor woman was in the third car with her children, and, as she came near the spot where her husband lay bleeding and dying, unknown to her, she suddenly recog-nized him and threw her arms around his body, and frantically entreated "My dear William" to speak to her. Dr. Pitney, of Abse-cum, whose activity and kindness to sufferers entitle him to the warmest praise, dressed his wounds, and used all possible skill in his efforts to save him, but in vain, as he died be-

fore we reached Camden.
The down way-train coming about an hour behind us, took all of us on board, the dead, wounded and unharmed, and after several tedious delays, prudently scade to avoid meeting the excersion to start down at 7 o'clock, we reached Camden about half-past eight o'-

The persons who were mostly seriously injured were all in the front car, and fortunate-

ly all the ladies escaped.

The Cause. - The decided opinion of all at the wreck was, that it was entirely the fault of the Conductor and Engineer of the up train or wood train; indeed no one there or at Haddonfield seemed to think otherwise.— There is no doubt the up train was behind time according to the road time table, at least twenty minutes, and according to rale, should have waited at the last turn out below; but instead of doing this, came on, when an express train was known to be coming down the road at a rapid rate. The Engineer of the express train came on them just as we passed a curve, and even before the brakes were 1 at down. The Conductor of the up train diaggeared immediately after the colli-For, as there was a disposition among the more violent to lynch him .- Philada, Lea-

THE OCEAN-CROSSING TELEURAPH .- During the unsuccessful attempt to by the cable peross the Atlantic before it broke, there was an intercuption for some time of the communication with the shore, which was afterwards as misteriously renewed. This was not explained in any of the reports furnished from the other sale Liutenant Brooke, of the United States Navy, however, gives the following explanation in the National Intelligencer, which may be the real cause, though it is singular if so

The conducting wires broke; the gutta percha, stretching with the outer wires, drew the broken ends apart, continuty was then interrupted. But when that portion of the cable approached the bottom it became slack. The cable will be desposited in waves upon the bottom." Then the gutta percha relievtracting, drew the broken separated ends of the conducting wires together, and continuity was re-established. This re-establishment of continuity is a striking proof of the fact that the coaducting wires were broken, while the gutta percha remained unharmed. Had it not been re-established the interruption would have been generally attributed to the abrasion of the gutta percha and the error of construction would have remained unexposed.

We see, by the latest intelligence from Liverpool sent by the Associated News Agency, that the attempt to lay the cable has been postponed till next year and the company mean to sell the cable which failed and bave one constructed three thousand miles long.

THE MOON.—A recent discovery by the Astronomer Hansel, whose study of the moon's motion continued for many years, has established the fact that the centro of gravity of the moon, instead of being like that of the earth, at the centre of figure, is beyond that centre and farther from the side next to the earth than it is from the other side by seventy-four miles. The nearer side of the moon therefore, is a vast expanded protuberance or mountain, seventy-four miles high; and any fluid whether air or water, would flow downwards from the nearer to the further side of the moon, for aught we know, intelligent living beings may exist. The nearer side of the moon cannot be inhabited, at least by beings to whose exitence air and water are assential as is the case with all terristrial animals .--The late mathematician, Gausss, preposed as a means of settling the question whether the moon is inhabited, that a huge monument, should be erected on the Steppes of Siberia, as a signal to the inhabitants of the moon, in the hope that they might be induced to erect a similar signal to apprise us of their existence. The discovery of Hansel shows that such an experiment would be attended with no success inasmuch as the inhabitants of the moon, if there are any, being on the further side, could never see a monument on

CONTRACT AWARDED .- The Secretary of the Treasury, on the 2d inst., contracted with Thos. Aguew, of Baltimore, Md., for the construction of the custom house at Indianopolis Ind., at a cost of \$98,983,79, being the

THE LOWEST BIDDERS .- The contract fo the work of the Croton Aqueduct, New York has been given out to the lowest bidder. One offers to do it for \$614,298, and another \$729,-

807, a difference of \$115,500. The original manuscript of Walter Scott's Peveril of the Peak was lately sold at auction

THE WORK ON THE CAPITAL EXTENSION .-The extension of the Capitol at Washington The extension of the Capitol at Washington is an extensive and magnificent scale. The cost of some of the items is given in the Washington Union. The windows of the north and south fronts \$1,950 each. The marble workmanship on each of the eastern front doorways \$4,075. The two figures of stationary to be placed over each door are estimated at \$6,260. The doors bronze, and bearing bas-relief of designs illustrative of American history, will cost \$13,200 for each

American history, will cost \$13,200 for each wing. They are designed by Crawford. It is the intention to have one executed at Munich, and the other, for the promotion of American art, in this country. The door opening from the old hall of the House of Representatives into the corridor leading to the new hall will also be of bronze, bearing bas-relief designs illustrative of American history and will it is estimated, cost \$16,416 -designed by Randolph Rogers. The statuary intended for the eastern pediment of the north wing of the Capitol, designed and modeled by Mr. Crawford, it is estimated will cost \$46,260. For the design and model of the Statue of Liberty, intended to surmount the new dome of the Capitol, Mr. Crawford is to receive \$600, the Indian Girl \$429, and the mantel piece for the Senate reception

THE CHINESE SUGAR CANE. - A gentleman n New York has sent the editor of the Post a sample of very good brandy, made from the syrup of the new sugar plant, the Sorgho, or Chinese sugar-cane. He says it costs about 30 cents per gallon to produce, and is worth in the market from \$1 to \$2 per gallon, oc-

The manufacture of spirit from the sorgho may now be carried on by our farmers in the winter : eason, when there is no other occupation for them, at the rate of a gallon of fermented syrop. This will find ready sale at the rectifier's, who will turn it into alcohol for camphene and other purposes. The quantity of alcohol now used for purposes of flumination alone, to say nothing of varnishes, chloroform and medicinal extracts, is enornous, and was beginning to have a serious effect on the price of bread, owing to the wholesale destruction of the careals required to produce it. Now, however, we have found a substitute, which besides supplying syrup and alchohol, will also yield from the same crop a large amount of forage and grain for the fattening of stock.

DESTURCTION OF A SUSPENSON BRIDGE,-The lestruction of the suspension bridge over the Desjardies canal at Hamilton C. W., has already been mentioned. The disaster occurred on the 28th ult., during a violent thunder storm. A gust of wind caused the guys to part and the bridge, being as it were lifted up in the centre was turned upside down and descended with a crash, and borne by the wind, fell some fifty feet nearer the lake than it would have done from the force of gravity alone. The structure was 230 feet above the level of the water. It was built by the Great Western Railway Company, for the Canal Company but the latter refused to accept it, on the ground that it was not in a safe condition.

VOLUNTEER CANDIDATE.

To the Voters of Northumberland County. AT the solicitation of many friends from different parts of the county, the undersigned date for the office of COUNTY COMMISSION. ER at the ensuing election. Should be be successful, no effort shall be spared upon his part to perform the duties of the office with fidelity promptness and impartiality. JOSEPH VANKIRK.

Point township, September 5, 1857 .- te.

To the Electors of Northumberland County. THE subscriber hereby offers himself as

candidate for PROTHONOTARY.

Having always been a steadfast Democrat, and considering himself competent to perform the duties of the office, he would respectfully ask of the Democratic party of the county a nomination at the primary election. Among other qualifications, a thorough knowledge of the English and German languages would enable him to attend satisfactorily to all having business in the office.

Trevorton, June 20, 1857.

Candidate for Prothonotary.

To the Voters of Northumberland County. AT the solicitation of many friends from dif-ferent parts of the county, the undersigned has consented to become an Independent Candi-date for the office of PROTHONOTARY at the ensuing election. Should be be successful, no effort shall be spared upon his part to perform the duties of the office with fidelity, promptness and impartiality.

JAMES BEARD. Sunbury, August 8, 1857 .- te.

Candidate for Sheriff,

To the Voters of Northumberland County. A T the solicitation of many friends from dif-ferent parts of the county, the undersigned has consented to become an Independent Candidate for the office of SHERIFF at the ensuing election. Should be be successful, no effort shull be spared upon his part to perform the duties of the office with fidelity, promptness and impartiality.

JAMES VANDYKE. Northumberland, June 27, 1857. -

Volunteer Candidate. To the Electors of Northumberland County THE undersigned hereby offers bimself as a Volunteer Candidate for

COUNTY TREASURER. At the ensuing election. His motive for so doing, is that approaching old age, and an injury caused by a broken collar bone, renders him unable to work at his trade, of Carpenter. Believing himself capable of performing the duties of the office, he earnestly solicits your support. PETER HILEMAN.

Sunbury, July 18, 1857 .- tf A CALL TO FARMERS. Purmers, drop your Tools, Pause a little Read this and Reflect!

THE FARMER'S PROMOTION BOOK. A new such Scientific Manuring System, for the Cultiva-tion of all kinds of Scials, Grames, Fodder and Pasture, upon all kinds of Scial; Proved by actual Experiments and lessed on evident truths; Designed to improve Agriculture in all its branches; represented by upwards of one hundred and fifty engravings of the most valua-ble Grasses and Plants connected with the system. By Dr. C. G. REINHOLD,

BOALSBURG, CENTRE CO., PA. In this treatise it will be seen that the object has been to give the Farmer that kind of information which combies him to make practical application to fertifize his lond and increase his grain, fodder, and posturage. The decrinease a taught by this manuring, and fodder and pasture collivation system are rational, clear and evident, and ture cultivation system are rational, clear and evident, and suggest an improvement in the mode of agriculture hither to unknown to our farmers, and which, if adopted and carrefully practiced, cannot fail to advance the interests of the farmong community. Such a work has been much wanted, as it fills a void which has long been felt, but which there has hitherto been no attempt to supply, and as farmers of Centre and Huntingdon countres, we recommend the work to every farmer, as we fully believe that they will reap the greatest possible benefit from it.

HUSSEY'S AMERICAN REAPER FOR CUTTING BOTH

GRAIN AND GRASS. GREAT improvements for 1857.—This Machine was put in successful operation in 1833 and continued to be the only Reaping and Mowing Machine in the World, of any practical value up to 1845—twelve years after its introduction. Other Reapers are now offered with glowing ad-

vertisements, Certificates, Diplomas, Gold and Silver Medals, &c. But the Farmer in search

of the best Reaper, and not posted in the mafter, had better see a little further. If there is any value in 24 years experies in building Reapers, and using them in the har-vest field, and in the improvements made during that long period, OBED HUSSEY, the Father of Reapers, can claim it. All who are satisfied with the Best Reaper and Mower, nan be supplied by sending their orders early in the season, as the crops indicate a large demand, and we can not have over 200 Ready for the vast harvest of 1857. We guarantee that this Reaper and Mower can not be beaten on fair trial by any other Reaper that may be brought into the harvest fields in 1857, and we also insure it to be the strongest and most durable machine in use. We would respectfully invite Farmers to examine

the machine thoroughly before purchasing, and satisfy themselves of its superiority over all During the last four years, the subscribers have sold between 500 and 600 of these Machines, to the best and most successful Farmers in Montour, Union and the neighboring counties, (whose names are too numerous to insert) to whom we

respectfully refer. The subscribers have the exclusive right in the following counties: Montour, Union, Snyder, Northumberland, Columbia, Luzerne, Perry, Mifflin, Centre, Clinton and Lycoming. All orders thankfully received and promptly attended to. GEDDES, MARSH & CO., Lewisburg, Union county, Pa.

SUPREME COURT NORTHERN DIS.

TRICT. NOTICE is hereby given that the Supreme Court for the Northern District of Pennsylvania, will hold it session on October Term for said District, in Williamsport, Lycoming county agreeably to the following order of said Court, as

certified by the Prothonotary of the Eastern Dis-trict. CHARLES PLEASANTS, Prothonotary, S. C. N. D. Prothonotary's office, June 27, 1857.

In the Supreme Court of Pennsylvania: NORTHERN DISTRICT. AND now, June 23, 1857, It is ordered that a Special Term of the Supreme Court be held under the Act of 26th April, 1855, a Williamsport, Lyceming county, to commence on the first Tuesday of October next, for the purpose of hearing arguments on writs of error, appeals, &c. from the counties of Lycoming, North and Mentour, and such other causes from any of the counties composing the Northern District as may be by mutual consent argued at the said time and place. The said special term to con-tinue as long as may be necessary.

Certificate from the Record. In testimony whereof I have hereunto set my hand and the seal of the said Supreme Court at Philadelphia, this twenty-fifth day of June, A.D.

THE ACKNOWLEDGED OHAMPION! THE RECENT TRIALS at

Groceries,

Reading have endorsed the current of public opinion, and continued the verdict of more than 200 -coid death fires, proving conclusively that "Herrings" is the only SAFE; that will not burn.

Extract from the Committee's Report on the Trial of from Safes at Reading:

Report on the Timi of Irou Sarcs at Reading:

"On the 26th of February all the members of the Committee met to witness the Safes and books and papers, (pinced in them) and were porfectly satisfied that all was right. The day following the burning took place, under the superintendence of the Committee. After a fair and impartial barning for five hours, the Safe of Messra, Evans & Watson was first opened, the Safe heing on five maide, and the contents partially constuned, while the contents in the Safe of Messra, Furrels & Herring were an good condition, and no fire lunde."

Reading, March 2, 1557.

Signed.)

H. F. PELIN.

P. N. COLEMAN.

Committee.

And endorsed by aver 50 of the best men of Reading.
The above Safes can be inspected at 31. Walant Sarcet, where the public can satisfy themselves of the great superiority of the "Herring's Patent Champion." over the defeated and used up "inside from Door Salmander."

Farrels & Herring.

Farrels & Herring,

34 Walnut St., Philada. Only makers in this State of Herring's Patent Champion Stres.

The attempt male by other parties to bolster up the reputation of a Safe which has failed an signally a needental fires in Philadelphia. (Hanstead Phios.) by taking one out of an agent's store. (H. A. Lantz.) made double thickness, refferent from those they self to burn out of the true reward. Herring's (half is thick) has met with its true reward. Herring's Safe could not be birnt, proving concinatively that the only reliable Safe now made as "Herring's" of which over 15,000 are now in actual use, and more than 360 have been tried by his without a single loss.
