The Pacific Mull Steamship Company's steamer Northern Light, from Aspinwall, with a fortaight's later news from California, had arrived at Havans, and sailed for New York on the 25th inst. She has on board twa millions of dollars in treasure.

Mr Harasthy, late refluer in the Mint, had

been indicted for embezzling \$150,000.

The news of the protest of Mezzrs. Sather & Church's drafts at New York had cauzed a run, which compelled the firm to close. Several attachments had been made. There was also a run on Messrs. Tallant &

Weld, and several others, but none of them had closed at the sailing of the steamer.

The accounts from the mining districts were good. The markets were inactive. Haxali flour quoted at \$14.

In view of the difficulty of appr aching Salt Lake from the east, by reason of the many and easily defended mountain passes, it is supposed that if the Federal Government resolves on active hostilities, it will have to depend principally upon soldiers raised in California, to march upon the Saints from the West. Another grove of mammoth trees have been discovered in Mariposa county. The ordinary size of these trees is 300 feet in height, and from 10 to 30 feet in diameter. The discoverers of this last grove had no instrument for measuring the trees with them, but they thought some of the trees to be larger than the largest in the groves previ-ously discovered. This is the third mammoth grove in Mariposa ; that first discovered has 427 trees, the second 30, and the last 86.

LATER FROM UTAH-BRIGHAM YOUND'S DE- of said day when the terms of sale will be made CLARATION OF INDEPENDENCE.

Mr. Power, recently arrived at San Francisco, from Utab, says he had a conversation with one of the Mormon soldiers, an Englishman. He referred in bitter terms to the treatment the Mormons had received in Illinois and Missouri, reflected on the injustice and tyranny of the people of the United States, and said that the time was come to get even. He said they were on their way to meet General Harney, to see what he was coming for. "If he was coming peaceably we will let him come, but if not we will drive him back," were the words used. Another Mormon, named Killion, an old man who lives about seven miles from Salt Lake City, spoke bitterly against the United States, denounced Judge Drummond and all the Federal officers, and rejoiced that the time had come when the Saints would be avenged on their enemies-that men were found who for the purpose of making Partition of or could face the enemy, and that Harney, with valuing and appraising the Real Estate of his 2500 men, never would enter Salt Lake City. He also stated that Governor Brigham Young had ordered the people to prepare for war ; that they should not sell emigrants anything; that they must lay up provisions; that the men and women must not dress up in store clothes any more, but that all must be saved to forward the cause of the Church against the common enemythat the men must be content with buckskin instead of broadcloth, and have plenty of guns and ammunition.

DECLARATION OF INDEPENDENCE.

On the 17th of August, passed through the city of Salt Lake. Remained only three or four hours. Had a conversation with a merchant-a Gentile-who stated that on the previous Sunday, Brigham Young had declared, in the temple, that henceforth Utab was a separate and independent Territory, and owed no obedience or allegiance to any form or laws but those of their own enactment, and called upon the people to stand together and support him in maintaining the cause of God and the Church. Was told that the house of Gilbert and Garrison had orders i

their value in the United States. CHILL.

Mr. Bigler, U. S. Minister near this Gov-Gov. Johnson has granted a full pardon to erament, was received in public andience by Jose T. Lafaente, the Spanish editor, see. the President on the 6th inst., the customary speeches being exchanged in the most friendly terms.

SPRING EED. (Gould's Patent, September 2d 1856.)

ETOR which a diploma was awarded at the Eighth Exhibition of the Mass. Charitable Mechanic's Association.

This is an entirely new application of spiral springs to beds, making a more coinfortable, neat-er, and cheaper spring bed than has been offered to the public, applicable to old as well as new edateads.

The peculiar position of the springs elevate the head slightly, saving the trouble of building up the head with extra bolaters.

The construction is so simple, and every part so exposed, that bugs have no hiding places, and the most inexperienced can take out each for washing, as they are only fastened by a button. The Springs used are made expressly for these
