When I am old I shall actione. Yorked with Bowers my ruled halo rough by he cam begin of stone In such and reath, doesn't be a now a saight lewest and the brightest gold Will chiston me googld - when I man a When I am old, my directs will be Or also their bedies fourth the soil Their spinic dwelling mis term God, The old absorbed working baye notes Above the rost-when I am old.

When I am out I'd rather bend-Than see them less the carness could That marks the discideling of our youth I will be so and to have their cold Or stronge to me - when I am aid

When I am all -O how it seems Like the word binney of dreater. To picture in prophetle thame That dom, for distant, shadowy time to domain that it seems o'er bold Even to say -"When I am old."

When I am old ?- perhaps ere then I shall be missed from hounts of men-Perhaps my dwelling will be found Deneath the green and quiet mound, My name by stranger hands enrolled Among the dead-ere I am old.

Ere I am old ! . that time is now, For youth sits lightly on my brow; My limbe are firm, and strong, and free Life has a thousand charms for me; Charms that will long their influence hold Within my heart-ere I am old

Ere I am old -O let me give My life to fearning how to sive Then should meet with willing beart An early summone to denore. Or find my lengthened days one ded By God's sweet peace -when I am old.

MRIMETS LICENTIMENT. ANALYSIS OF LYON'S CATAWBA

Training Blackberries.

Hovey in the April number of his Magn. zine of florticulture, has a good article on blackberry culture, in which he recommends the horizontal training of blackberry stalks nience for picking the fruit when ripe,

All who have cultivated or observed the natural habits of the blackborry know that, although the root appears to be personnial, the plant is in fact blennial; that the stock grows one year, bears fruit the next, and dies. He would for instance take those that grew last | Catawba and Isabella Grapes. year and this spring bend them down horizonthis season. In the meantime let the young shoots that start up this spring grow up straight perparatory to being tied down horizontally next spring. The following are his directions in the arti-

cle referred to : "The plants should be cight or ten feet strength to throw up for vigorous shoots these should be cut into four five feet and trained wood. horizontally) in the spring to stout stakes. Their horizintal position chasts every eye to break and produce an abundance of fruit.

During the senson the new growth or pronounce this to be pure Brandy, and free from abling purchasers to make a good selection to the bearing word for the next year occupies the all adulteration. centre, and 'n no way interferes with the gathering of the burries. If the cames grow on tall and heng over from their weight, the tops may be pinched off at the height of five or six feet, by which means they become stronger. Only four shoots should be allowed to grow annually; all the others being cut also, ESHELBY'S STILL AND SPARKin the same way."

Aprova, Ind., has contributed the results of a substitution who require a gentle stimulant, and for sacramental purposes. mir disease which has prevailed so extensively among hogs for the two last seasons.

It appears from the investigations that the disease in question has been developed almost berland county JOHN F. CASLOW, ties, and that, when produced, it seemed to spread by contagion from one drove or form to another. If diseased hogs are placed among those that are healthy, the latter are commonly attacked by the malady in a period varying from thirteen to twenty days. Then, again, when healthy hogs are placed in a pen oning one where diseased bogs are liept, the disease is communicated to them. I seems, also that healthy hogs will acquire the melady in question if they are placed in a pen which had previously been ouropied by those | Bullitt & Fairthorns, | Diehl & Wertz, that were diseased.

There are the results of several careful observatious and experiments, made at the distillery of the Mesara, Groots, et Autora, It follows from this, that the disease may be prevented by each farmer keeping his hogs in an inclosure so arranged that they cannot come near those of another names, The in | ARESTVARES, of all kinds and endless terposition of a fence is not enough, some distance musi intervene.

As to the nature of the d'sease, it may be regarded as a meather settled beyond all doubt that it is not cholors. Numerous examinations have been made, from which it appears that the disease consists essentially in a diffase inflammation attacking various parts of the body; sometimes the buing of the intestimes, and then producing choleraic discharges sometimes the mucus membranne of the stomach, and then producing comiting ; comethere that of the viscout or lungs, causing great burry and difficulty of the breatling. and oversate ally the tongue is swellen or pretousled, or the shir is extensively inflamed. In short, the disease appears to resemble ergapelas of the human subject both in the man. Matts and a separar selicle og Bruggest, nor of its propagation, and the organs it at - 1sec 26, 1857. DRIGHT & tions. It also reaembles very closely the opinortic diseases of cattle. In view of these facis, as well as the results of some experihogs, and in Europe on cattle we would adments which have been made in this State on vise farmers, on the first appearance of the disease to make use of magnitic acid, arcenic. or the sulphate of iron as a preventative. Of the muristic acid, a full grown hog should get about 15 draps, largely diluted with water, daily, or one twentieth of a grain of arsenic twice a day; or 5 grains of the sulphate of iron twice a day. These means, with careful seperation of the discused from the health; esals, have proved very serviceable in pre-Vinting the spread of murrain in cattle, and so far as they have been tried, equally effica-

Potatoes and Peas. A writer in the London Agricultural Gazette relates the following curious experiment worth the attention of agriculturists:

"I tried a curious experiment with a few polatoes this season. Twelve months since I saw a letter from a farmer stating the great success that had attended an experiment the writer had made the previous season. It consisted in inserting a pea in each potato set and planting the potato in the usual way. The result, he stated, was a yield of peas and a splendid crop of potatoes. But the most important result was the entire freedom of the potatoes so treated from any disease, while these planted in the usual way in the same field were extensively deteriorated. It was led, by this statement to try the experiment on a small scale in my own garden this season. I planted not quite half a peck, only fifty sets, in ranks, cutting a peice cut of each at putiling a pea firmly in. The peas grew and described well and last week I dug the potatoes. They were parfectly free from all tolot or speck of disease and very fine and large while in the same bed close o them was another bu planted in the same old style, nearly bull of which were rotten. I leave your readers to draw their own conclusions.

WAONDERFUL COINCIDENCE.

HOLLOWAY'S OINTMENT.

The anniversary of the introduction of Holloway's Contract ought to be a jubilee forever. It has saved countless multipules from disfigurement, paralyzation, multipules, may be a few form the surface to which it is applied, its healing baim finds its way through every coating and ligament of the body, to the very source and busis of all eruptive, uleerous, tumerous, and cancerous diseases. It distinguishes the febrile principle that feeds them, and the outward symptoms fade, heal, and pass away with a rapidity incredible to those who have not witnessed it. SCROPULOUS ERUPTIONS AND ULCERS.

The pulson of scrofula has nover been neutralized or expelled by any of the remedies of the pharmacopula. The sole untidote to this virulent and destructive element is Holloway's Guitment. Majendle & Brodie, the great French and English surgeons, do no deny or dispute this great fact. There is no form of scrofula that may not be controlled and cared by this balancie remedy. CANCERS AND TUMORS.

The baife or caustic may remove a cancer or tumor, but the seeds of the terrible excrerence remain in the blood, and it is asson reproduced in a worse form than before. Holloway's Omtment, on the countrary, penetrates into the circulation, and pervades every infected vesicle, and it is the disease by destroying the corrosive principle that generated and sustains it. INFLAMMATIONS OF THE SKINS.

Just call for any thing you want. I am deter All rushes and ordinary eruptions, as well as Erysipelas, Acue, Ringworm, Carbundles, Scald Head, Salt Rheum, Leptons, Prickty Heat, &c., are removed by a few brick applications of the Ohitment. that may be made, reasonable or unreasonable ACCIDENTAL INJURIES,

WOUNDS, Sprains, Bruises, Scuids and Burns are immediately relieved by its application. The inflamma-tion quickly subsides, fover and lockjaw are prevented, and under a persevering use of the preparation, the pro-cess of heating is soon accomplished. SALAMANDER FIRE AND THIEF-PROOF SAFES.

The largest assortment in the United States. Warranted to be equal to any now made, and will be sold on as Good Terms, as can be obtaincd from any other house in the Country, at EVANS & WATSON'S 26 South 4th Street, Philadelphia.

Truth is Mighty, and Must Prevail. Report of the Committee appointed to superintend the Burning of the Iran Safes, at Reading, February 27, 1857.

READING, March 4. The undersigned, members of the committee, do respectfully report, that we saw the two Safes originally agreed upon by Farrels & Herring and Evans & Watson, placed side by side in a furrace, viz: The Safe inuse by the Paymaster of the Philadelphia and Reading Railroad Compa-ny, in his office at Reading, manufactured by Farrels & Herring, and the Safe in use by H. A. Lantz, in his store, manufactured by Evans & Watson, and put in books and papers precisely

Half French Spring Mahogany and Walnut Parlor mittee. The Safes were then cooled off with Rocking Chairs—various designs, in Hair, Cloth and Plush.

Rocking Chairs—various designs, in Hair, Cloth and books and papers taken out by the Committee books and papers taken out by the Committee books and papers. tendence of the subscribers, members of the Comand sent to H. A. Lantz's store for public examined and marked by the Committee. The books and papers taken from the Safe manufactured by Farrels & Herring were in our judgment, damaged fully fifteen per cent, more than those taken from Evans & Watson's Safe, We believe the above to have been a fair and impartial trial of the respective qualities of both

> JACOB H. DYSHER, DANIEL S. HUNTER. Having been absent during the burning, we fully coincide with the above statement of the condition of the papers and books taken out of

HERRING'S SAFE

CHAMPION !! THE RECENT TRIALS at Reading have enforced the furence of public ordinen, and confirmed the vertice of more than 200 feet dental fires, proving conclusively that "Herring a" is the only SAFE that will not burn.

Extract from the Committee's Report on the Trial of Iron Safes at Reading:

On the 26th of February all the memlers of the Committee met to witness the Safes stid books and papers, (placed in them) and were perfectly satisfied that all was right. The day following, the berming took place, under the superintendence of the Committee. After a fair and

The attempt made by other parties to bulster up the reputation of a Safe which has failed so signally it accidents fires in Philadelphia, (Ranstead Phick,) by taking one out of an agent's store, (H. A. Lantz.) made double thickness, (effected from those they sell) to "burn up one of Herring's (half as thick) has met with its true recward. Herring's Safe could not be burnt, proving couch sively that the only reliable Safe now made is "Herring's of which over 15,000 are now in actual use, and most than 200 have been tried by fire without a single loss.
