Some few cases of rowdvism only are reported. The Mayor, has stopped, further arrests, and discharged, all those crrested.

LATER FROM MEXICO. Tobasco Bombarded and Tuken by the Govern-

ment Troops. The New Orleans Picayane has full details

of the attack by Zulonga's forces on the city of Tobasco. The city was bombarded from the 9th of April to the 10th inst. The houses suffered

very much from the fire of both parties, and the American Consul's house especially, which was in a right line between them. Mr. Johnston, however, afforded what protection he could to all who asked it of him, and he had at least some three hundred women and children at the Consulate. To provide for much respect for him that on his appearing in the streets, they suspending firing until he had passed the lines.

The Government captors, on taking pos-

session of it, were fortifying and strengthening the city by every means in their power. The steamer Guerrero, whose revolt from the Constitutionalists has already been announced, with her subsequent blockade of Vera Cruz, arrived at Tobasco on the 26th.

Tampico and Tobasco are now in the posses-sion of the Zulonga government. With respect to Tampico, private communi-

eations with which we are favored announce, in addition to the defeat of Garza, that Miramon's force, in San Luis, has been increased to 4000 men and twenty-four pieces of artil-lery, (probably including the force under Gen. Mejia, which had advanced to Tampico and routed Garza) The result is that through Tampico as a port of entry, merchants can introduce goods to the dity of Mexico and adjacent populous territories. By Vera Cruz the Rio Grande, or any other point, they would have double duties to pay-one to the Liberal forces and the other to the Central Government-by this route they have only one. SHOCKING TRAGEDY IN TEXAS.—A correspondent of the Richmond (Va) Despatch, writing from Belton, Texas, under date of May 18th, says that two families, consisting of ten persons, residing in Brown county, in that State, were inhumanly butchered a few days before, by four men from Lamposas county, for the sake of their money. The murderers were disguised as Indians, but a green, little girl, of eight years old, who escaped to Dim woods and lovellest spots of earth, they wind, a neighbor's house, recognized one of the party; and the people of the vicinity trailed the marauders to their residences, where they were captured, after a desperate resistance, and taken to the scene of the crime, under a guard of forty armed citizens. They will, no

doubt, be summarily dealt with. EDITORIAL CORRESPONDENCE. Jones' Hotel, Philadelphia, June 8, 1858.

The warm season has suddenly sprung upo us, and every body complains of the heat except the retailers of ice and cooling beverages served up in their various forms. Already Philadelphia begins to assume the appearance of large cities during the heat of the summer solstice, and already preparations are making by those who have not been too

severely affected by the late financial crisis

to leave for the country and the fashionable

water places. Business is dull and has been so during the entire season. The prospect of fair crops, of which there seems to be a favorable indication, will, no doubt, give an impetus to the fall trade. There can be no better evidence of the derangements of the commerce and trade of this country than the fact that money is still scarce among the business men of the city, although the banks and capitalists bave more than they can find use for.

Notwithstanding the tightness of the times some bandsome improvements are going on in the city. The great Hotel, at the corner Railroad Company commenced laying down of Ninth and Chesnut streets, is progressing slowly. It will be a noble structure when in this place, on Tuesday last, to connect completed. Bailey & Co. have put a beautiful marble front on Chesnut street for their

> In coming to Philadelphia I passed, for the first time, over the Lebanon Valley Railroad The route by the Northern Central and Lebanon Valley and Reading road is, and will remain, a popular one. The trip on the packet is at this season not an uppleasant change, but the days of the packet are almost numbered. The present month will in all probability be the last.

> Taking the packet, opposite Sunbury, after A. M., we arrived at Port Trevorton in about two hours-then taking the cars, it was not long before we reached the bridge at Dauphin, a noble structure, which has cost the company over two hundred thousand dollars. The cars then continue on the Northern

Central to Bridgeport, opposite Harrisburg. and cross over on the Cumberland Valley bridge-arriving at 20 minutes before 12 M. At 5 minutes before 3 o'clock the Lebanon Valley train leaves for Reading, and at that place connects with the Pottsville train to Philadelphia at about half-past 5 P. M. The Lebanon Valley is perhaps the most substantial, as well as the most expensive Railroad in the Union. Mr. Osborn, the engineer is an Englishman, and using English capital, spared no pains or expense in its construction. OFESTION. HOUSE OF REPRESENTATIVES, 1 Washington, May 31st, 1858.

EDS. MINERS' JOURNAL :- My attention | Schoylkill-R R. bas been called by a friend, to an article in your paper of the 22d inst., which reflects upon my official course in Congress by accusing me of dodging the vote on the resolusing me of dodging the vote on the resolu-tion of my colleague, Hon. E. Joy Morris, relative to the modification of the present tariff, so as to meet the wants of Pennsylvania and other States in a judicious alteration

of the revenue laws. I suppose you will do me the favor to cor-Washington, on the day on which Mr. Mor-ris introduced his resolution, I having been absent, accompanying my family on their way home, in Northumberland county, and that if I had been in the House, I would have voted with my democratic colleagues, Messrs, Ahl, Leidy and White, for the suspension of the rules to enable Mr. Morris to introduce his resolution.

That I am an advocate for a judicious modification of the existing tariff laws, I have only to refer you to the fact, that as early as the 16th day of March last, I had the bonor to offer in the House the following resolu-

"Resolved, that the Committee of Ways and Means, be instructed to inquire into the expediency of so altering the revenue laws as to increase the duty on Coal and Iron." Mr. Letcher of Virginia objected, and the resolution was passed over. I did not move

the suspension of the rules and call for the clution, as I believe that a vote of two-thirds could not be obtained. But if I had entertained the hope that it could have been se-cured, I certainly would have moved a suspension of the rules.

I assure you, gentlemen, that I am as much in favor of a judicious amendment of the existing revenue laws, as Mr. Morris, or any other Pennsylvanian. I doubt not you will be willing to do me justice in this matter.

Very respectfully, Your ob't servant,

W. L. DEWART.

Certainly. We have no intention of doing the honorable gentleman injustice in this nor any other matter. We give him the full benefit of his explanation, by publishing his letter. We do not question that Mr. Dewart would have voted had he been present, for a suspension of the rules, to permit Mr. Morris interested in or friendly to the nasty but to introduce his resolution; but even if he had been present, and had voted for the suspension, we cannot say after the gentleman's very vacillating course on the Lecompton swindle business, that we would have entertained much confidence in his course. But after all, a vote for or against is a matter of small moment. An automaton could do as much, under the influence of master minds. Unfortunately up to this period, and we regret that we cannot except the present Rep.

resentative, the Democracy have sent invariably, to Congress from this District, men in point of ability, even below the average. As in the case of Mr. Dewart, if they offer a resolution, it is marked by a selfish policy, which arrays every other section against us. It is folly to get up in the House, and ask for special Protection for Coal and Iron, when New Bugland has interests equally impor-tant with our own, which should be fostered by legislation. We of Pennsylvania cannot ope for satisfactory action in this matter, until we have men in Congress who looking beyond Pennsylvania, will include all American manufacturing operations in the benefits of Protection. Our representatives in Congress must discard selfish policy, before we can hope for support from other sections While therefore, we heartily accord Mr. Dewart all the honor he can glean from apparently good intentions, we protest against the idiotic movement of asking everything for Pennsylvania, while all beyond our boundaries are ignored. It has defeated all we hoped to gain heretofore, and will continue to blast our hopes, until we have men in Con-gress who will join hands with other sections

THIS REGION.

The state of affairs here is unprecedented. While nearly all the collieries are idle, other Regions are increasing their production of Coal, and putting that article into market at from 25 to 50 cents cheaper than we can, at even the low wages ruling here. The whole loss of the season so far has been from the Schuylkill Coal Region, and yet combinations are still active,-urged on by men who have their selfish schemes to compass and care not for either the welfare of the workmen or the prosperity of the Region,—to keep down our product, when at this time especially, mutual interest demands harmony of action between workman and operator. Wages are low, we yeas and nays, as Mr. Morris did on his reg. know. But miners can make seven and eight dollars per week, which under the circumstances, cannot be called bad wages. if wages were advanced, as some of the miners ask, it would not result in any advantage to the workmen, for diminishing orders would soon cut down the demand. The fact is, af-ter calmly reviewing the condition of affairs here, we are forced to condemn the policy adopted as most wretched, and the action of the instigators as exceedingly reprehensible. They are working irreparable injury to the County, and sending scores of workmen away to other localities. Wages cannot be increased, and benefit be derived therefrom.—Miners' Journal.

SWILL-MILE INVESTIGATION,-The Commiton Monday week, when a number of persons profitable swill-milk business, gave in their testimony. One or two new facts came out, such as that nearly all the cows, when no longer valuable for milk, are butchered and sold as number one beef by some of the most prominent dealers in Washington and other first bottle I found gr markets. Another point is, that these abused have wrought a cure.

IMPORTANT RAILROAD CONNECTION. We have intelligence of the most reliable character that the Northern Central Railway Company will complete their road to Sunbury in ten days from this time. At this point a connection will be had with the Sunbury and Erie road, which road connects with the Williamsport and Elmira road at Williamsport, completing the great North and South road between this city and Lake Erie. We also learn that there are now is progress, and nearly completed, arrangements for running trains between this city, Bullaio and Ningara Falls under a time schedule which will not consume over sixteen hours between the points mentioned. The advantages in the saving of time and cost of fare to the traveling public will be apparent when this route is compared with those now frequested, besides great facilities will be rendered the business and commerce of the country in the trausportation of the mails through the instrumentality of this chain of railway, the completion of which has been looked for with much anx-

The Post Office Department, alive to the importance of direct and central railway routes for the safe and regular transportation of the mails, has distinguished its manage ment by the perfection of an arrangement which is to go into operation on the 1st of July, for the transportation of the great southern mail, with the central roads now completed through the States of Virginia and Tennessee; and we have reason to hope the Department will avail itself of the advantages which will be afforded by the completion of the Northern Central road to Sunbury, and will make similar arrangements with the lines forming this route for a speedy and regular transportation of the mails between t national capitol and the North and Northwest. The route in question is not only destiped to be one of great industrial and commercial importance, but also of rapid and agreeable travel to the pleasure-seeker and those generally journeying to and from the lake region .- Baltimore Sun, 8th inst.

SELECT SUMMER GOOD

San Tunn.
People who would economize and save t dimes will do well to call and see how very ch goods can be had, and should they not conclu o purchase from us, they will be more convesant as to the actual value of all kinds of Goods There are a great many reasons why people should closely examine our stock, and while it is clearly demonstrated that the "obvious meaning and imports" of this multitude of reasons referr directly to the BEAUTY OF TEXTURE, and chespness in price of goods, it will at the same strike the mind of the observing

ECONOMIST. that a state of things combining a great and diversified supply, with low prices, must bring about a "consummation devoutly to be wished" in making the POOR MAN RICH, and the rich

man opulent.

And although we may digress, yet permit us to add that nothing would afford a better ground work for a summer evening's entertainment, than for the kind mother who is presumed to have ex-amined our stock, to gather her little flock around her, and tell them of BRIGHT & SON'S beau-tiful goods, the handsome Silks from France and Italy, the Ribbons and Luces from Lyons, the Merinos from France, the prints from Manchester, the Lineas and Lawis from Glasgow and Dublin, and a thousand things of great beauty and utility. But to be a little more practical, we will state for the good of the country, the rising generation, and the full grown, more in detail the goods we retail, in very large or smaller slices, at very greatly reduced prices! and though we may regret we said it, we'll sell our goods our six months credit, at the end of which the people "flush," will come and pay us with a rush, for none can feel so unconcerned about a debt so fully carned, as to be guilty of prograstination, to the hazard of their reputation

Then Gentlemen and Ladies fair, hearken, if you've the time to spare, and hear of New Goods rich and rare, received and being opened. OF CLOTHS.

There's brown, and black and blue, Yea Cloths of almost every hue.

OF CASSIMERES. We've got just what you need, of mixed and striped "first rate" Tweed, for those exposed or named as sick, we've Cassimeres both strong and thick! for those who by fashion think to win, we have the beautiful French Doeskin an ar-

ticle, we do expect, sir, can't be excelled in point of Texture. OF VESTINGS,

Silks and good black Satins, of every variety of patterns, for weddings, parties, or the street, for gentlemen married, or less discreet, whom we will furnish from Hat to Boot, with a cheap and

charming wedding suit.

But Ladies! pardon this dereliction, and do not deem this all a fiction, for surely we are bound to say, we love to turn from grave to gay, from dull old bachelors, dreadful dropes, when fashionable etiquette disowns, who, in a word, are sluggish wights, in human huppiness, neophytes. Gentlemen, we bid you all adjeu-the adies are waiting for something NEW;

Cashmeres-Delaines-Silks-Berege-Debeges-Robes-Ginghams—Lawns—Challes— Tissues—Chintzes—Planes—

of every pattern, and latest styles, so rich that that they excite a smile—suited for Ladies of DOUBTFUL age, as well for those who would Ex-GAGE-pretty for the maid becoming for the mother, and offered cheap to the one or the other. Ribbons embracing one hundred pieces, beautiful Belts suited for "Neices," Ginghams, solid, plaid and stripes assorted, and "Aquilla Robes" just imported. And the undersigned with modesty reverts, to corded flounced and steel booned Skirts- and well reconciled we trust the ladies faces, will gaze with fond delight upon our hand some Laces-Insertings, Edgings, of Jaconett and Swiss, affording beauty to those who offer bliss! three hundred pieces of good pattern Prints, and very handsome styles of new French Chintz, white, mixed, and brown Cotton Hose, much cheaper than some people would spool Cotton, Tapes. Pins, Buttons, and in profusion: Bubbin, Cord, Bonnet Wires. bland Illusion. Then come one, come all. find us very handy, in showing each the "modus

operandi" of buying and selling cheap. E. Y. BRIGHT & SON Sunbury, June 12, 1858 .-
