THE WAR.

In regard to the war, there can be but little doubt that the war has commenced. In all probability there was a sharp action at the bridge of Ballona, on Thursday, the 28th ult. It is reported that the Austrians, after a considerable loss, took it at the point of the bayonet.

PARIS, Sunday, May 1.—The Monitor publishes a circular note, dated 27th of April, addressed by Count Walewski to the Diplomatic Agents of the Foreign Powers. It details the present position of political affairs, and expresses much satisfaction at the conciliatory spirit of England, Prussia and Russia.

It states the wish that the other powers which compose the Germanic Confederation may not allow themselves to be misled by reminiscences of epochs quite distant from the present, and hopes that the statesmen in Germany will perceive that it depends on them to put limits upon the extension and duration of a war which France conscientiously feels that she had not provoked.

The following is the official letter of Prince Gortschakoff to the British Government: "I do not deny that there may exist a written engagement between France and Austria, but I can assure you in the most positive manner that such arrangement contains nothing that in the most distant manner could be interpreted as constituting a hostile alliance against England. If Lord Almondey should insist on the British Government to give its confidence in the above sense, and I give you my personal guarantee that the declaration will not be falsified by the facts."

THE NEWS OF THE STEAMSHIP VIGOR.

St. Johns, May 16. The summary of the steamship Vigeo's news was made up on board the steamer, and hence is not as complete a synopsis as the one usually prepared by the Liverpool agent of the Associated Press.

STRANGE HISTORY OF A MURDERER.—It was mentioned a few days ago that Felix Sanchez, a Cuban sailor, who, in January last, killed his father-in-law, and stabbed his wife and mother-in-law in New York, had been arrested at New Orleans. The Bee further informs us: He was hid away in a Spaniard's house some fifteen days in New York. The Spaniard then took him to Baltimore, and by reason of his naturally dark skin managed to sell him as negro for \$1,400. He was subsequently taken to Mobile, where he was sold to Mr. Brooks, and subsequently to Mr. Ladd, who sent him here to be sold by Mr. York. The latter put him in the parish prison for safe keeping, where he was previously identified as the alleged murderer. Sanchez is said to be the child of a free negro in Cuba, and the son of a wealthy Cuban planter. He has a wealthy uncle, he says, in New York, who has a Trinidad de Cuba. The accused born here had submitted to being sold as a slave to prevent being exposed as a murderer.

Scrofula, or King's Evil.

It is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks. It is a disease which may not destroy. The scrofulous taint is invariably caused by mercurial disease, in its various, disordered or unhealthy form, impure air, filthy and filthy habits, the depressing action of cold, above all, by the venereal infection. While ever be its origin, it is hereditary in the constitution, descending from parents to children and children to their posterity. It is indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by depuration from the blood corrupt, which is the source, which in the lungs, liver, and internal organs, is formed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which enters in the blood, depresses the energies of life, so that feeble constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers are discarded from the world, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination, and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S COMPOUND EXTRACT OF Sarsaparilla.

The most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is composed from the most active remedies that have been discovered, and is especially adapted to the disorder from the blood, and the removal
