ORIGIN OF THE WAR IN EUROPE. The impending hostilities in Europe have created a desire in among the people of this country to know the exact cause of the war about to break out. Our readers are aware that the main cause is the attempt on the part of Austria to increase her influence in the Italian States, and the determination of those

That journal says : "The Italian Peninsula, with and area about equal to that of New York and New England combined, and a population of nearly twenty and the fortresses, and they have spread five millions, occupies a position in Europe themselves along the line of the river Sesia, that were it united under one authority, or and upon both banks they are throwing up lengued in one interest, it must carry with it defences as though they contemplated a proacted occupation. No ruler could trust his brother ruler with what Richelieu called the "Key of the World," and all the rulers were resolved that the Italian people should not hold it. Itsly was there-fore divided as follows: To the restored King of Naples was given his own realm, the Italian inheritance of the Spanish Bourbons. Upon an area nearly equal to that of New York this sovereign was to rule over ten millions of subjects, and the whole Southern re gion of the Peninsula. To the Pope was confined an area equal to that of Maryland and Massschusetts with three millions of people, in the centre of Italy, and stretching from sea to sea. An Austrian prince, of the young branch of the House of Hapsburg, held Tuscany, with two millions of people ; and a fertile region on the west, fully as large as Massachusetts, locked in upon its northeastern borders by the smaller States of Parma and Modena, also ruled by princes of Austrian extraction and alliance, and with a combined population of about a million souls. MANUFACTURERS OF VAN-ALLEN'S PATENT PORTABLE SODA FOUNTAIN, TAKE great pleasure in calling the attention of Druggists, Confectioners, and others to this invention as its simplicity and economy can-

not fail to commend it to all who prepare the delightful and refreshing beverage for the Summer season. The Van-Allen Soda Fountain may truly be

regarded as invaluable. It enables any one to manufacture, with great facility, an indefinite supply of the most delicious Soda Water, at a cost of only about

THREE OR FOUR CENTS PER GALLONI The risk and expense of Copper Fountains are not incurred, and a lew moments only are re-quired to prepare the water. But little ice is needed to keep the fountain so cool as to render it unnecessary to use any in glasses. The two ingredients used are dissolved in seperate stone jars and are forced by action of a simple pump, in equal quantities into a lined cast-iron gasometer, where they become instantly united and the Soda is formed. No copper or brass comes in contact with any of the ingredients. No Mineral Water can be more delightful than that manu factured by this process ; and whilst it is, perhaps purer than any other, it has all the requisit

igency. No manufacturer of Foda Water who once in its simplest form ; but they will be manufactur-ed in many ornamental styles to suit the taste of He well also keep Plasterers Hair for sale ed in many ornamental styles to suit the taste of purchasers. It is not at all likely to get out of der, because of its great simplicity and durability ; besides being so portable as to be handled with ease, rendering it peculiarly valuable for PIC-NICS and other RURAL FESTIVALS. This little contrivance can be made attractive to the eye, no less than profitable to the pocket. No VILLAGE or CITY DRUG STORE or

HEALTH-GIVING FOUNTAINS, Nor can owners of large FACTORIES do a etter thing than to have one, to refresh their operatives during the hot summer months .--They can be introduced into private families to great advantage, as the expense is so trifling .--The ingredients used are to be had in any Drug Store, and a receipe for preparing syrups to flavor the Soda Water, will accompany each Fountain. The whole apparatus occupies but a small space -not more than an ordinary sized wash stand -and can be used on the corner of a street as well as in-doors. A full sized one can be seen
