

MY HOME.
BY MRS. E. HEDDON.
O, I have wandered earth around
On fancy's airy plume;
And sought to find some spot of ground
Where I might find a home!
And where I might find a home!
Where I might find a home!
Where I might find a home!
Where I might find a home!

Work for June.
CORN.—This crop requires the special care of the cultivator during the month of June. As soon as the "stand" is secure from the worm and bird, this to two or three plows to the hill according to the strength of your land. As we have repeatedly urged before, let the working of the crop be done early. After planting at proper distance on ground properly prepared and manured, the crop should be quickly worked and early let alone. There is more to be done in working after harvest than by all other districts together. Think of a man working and spending all his proper means to get a beautiful, luxuriant growth, and then, at the very time when it is most in need of ample supplies of nutriment, and when a thousand mouths are depending on the produce, to neglect the implement is put in to take up and destroy these channels of supply. "Surely, an enemy hath done this!"

POTATOES.—We ventured the opinion last month, in opposition to the very general advice upon the subject, that the best time for planting, for the main crop of potatoes, is not before the middle of June. As the sun has much power at that time, there are some cautions to be observed in planting, to insure the coming up of the seed. The plantings should be prepared in advance of the time of planting, and spread out where they will heat without being heated; unless you prefer planting whole potatoes of small size. The potatoes should not be exposed in the field, by being allowed to remain in the ho, in baskets or otherwise. They should be dropped in the furrow in advance of the time of planting, and spread out where they will heat without being heated; unless you prefer planting whole potatoes of small size. GENERAL CULTIVATION.—Millet, Hungarian Grass, Sugar, Millet, Pumpkin, Corn, Field Peas, Turnips, are all planted still, but the sooner the better. It is of the greatest importance to get your work in a state of forwardness. It is essential to the proper cultivation of every root crop that the grass be kept in the morning and stir it till it is warm enough to set your rising, and your corn, if you have followed our advice, "laid by."

POTATO BEEB RISING.—I have seen a great many bees about making good bread, and I have tried a great many ways, and none I like so well as with potato beer. Take a double handful of potatoes and boil them soft, and mash them through a strainer, and put a gallon of water with them, then set it in a stove jar, and after it is cool enough so as not to scald the yeast, add it a pint of good yeast. Do this the evening before you want to bake. It gets too cold through the night, set your jar in a bucket of warm water in the morning, and stir it till it is warm enough to set your rising, and your corn, if you have followed our advice, "laid by."

Scrofula, or King's Evil,
is a constitutional disease, a corruption of the blood, by which the blood becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, dirt, and filthy habits, the depressing vice, and, above all, by the venereal infection. What-ever its origin, it is hereditary in the constitution, descending "from parents to children, and from children to their posterity." Indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."
Its effects commence by deposition from the blood of crusts or ulcersous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which renders the blood impure, deprives the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have less power to withstand the attacks of other diseases, consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by this same cause.
One quarter of the population of this foul city are afflicted with scrofulous diseases; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood, and this we can do by purifying and invigorating it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla,
the most effectual remedy which the medical skill of our times can devise for this every where prevailing and fatal malady. It is combined from the most active remedies that have been discovered for the expurgation of this disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Eczema, Pimples, and SKIN DISEASES, ST. The popular belief in its efficacy in the cure of all these disorders is a strong evidence of its power. It is a purgative, and it is a blood purifier, and it is a tonic, and it is a restorative, and it is a preservative of health, and it is a preservative of life, and it is a preservative of honor, and it is a preservative of fame, and it is a preservative of glory, and it is a preservative of heaven, and it is a preservative of hell, and it is a preservative of everything in between.
