LINCOLN AND HAMLIN. Abraham Lincoln, who was nominated by the Republican Convention at Chicago for President was born in Harden county, Kentucky, February 12, 1809, and is now 51 years old. He is very probably of the race of the Massachusetts Liozolus, though his parents were of Quaker stock, that migrated from Pennsylvania to Virginia, whence his grand-father moved in 1781-2 to Kentucky, and was there surprised and killed by Indians while at work on his clearing. Like most pioneers left his family poor; and his son also died prematurely, leaving a widow and several children, including Abraham, then six years old. The family removed soon after to Southern Indiana, where Abraham grew to the stature of six feet and some inches, but enjoyed scarcely better opportunities for instruction than in Kentucky. Probably six months in all of the rudest sort of schooling comprehends the whole of his technical education. He was in turn a farm laborer, a common workman in a saw mill, and a boatman on the Wabash and Mississippi rivers .-Thus hard work and plenty of it, the rugged experiences of aspiring poverty, the wild sports and rude games of a newly and thinly peopled forest region-the education born of the log-cabin, the rifle, the axe, and the plow. combined with the reflections of an original and vigorous mind, eager in the pursuit of knowledge by every available means, and developing a character of equal resource and

proved himself. At 21, he pushed further West into Illinois, which has for the last thirty years been his home, living always near and for some years past in Springfield, the State Capital. He worked on a farm as a hired man his first year in Illinois; the next year he was clerk in a store ; then volunteered for the Black Hawk war, and was chosen a captain by his company; the next year he was an unsuccessful candidate for the Legislature; he was chosen the next, and served four sessions with eminent usefulness and steadily increasing reputation; studied law, meantime, and took his place at the bar ; was early recognized as a most effective and convincing advocate before the People of Whig principles and the Protective policy, and of their illus-trious embodiment, Henry Clay; was a Whig candidate for Elector in nearly or quite every Presidential contest from 1836 to 1852 in clusive ; was chosen to the XXXth Congress from the Central District of Illinois in 1846, and served to its close, but was not a candidate for re-election; and in 1849 measurably withdrew from politics and devoted himself to the practice of his profession until the Nebraska question of 1854 called him again into the political arena. He was the candidate of the Whge for U. S. Senator before Bigler, at Baltimore? the Legislature chosen that year; but they were not a majority of the body; so he de-elined and urged his friends to support Judge Trumbull, the candidate of the anti-Nebraska Democrats, who was thus elected.

In the gallant and memorable Presidential contest of 1856, Mr. Lilcoln's name headed

the Fremont Electoral Ticket of Illinois .-In 1858, he was unanimously designated by the Republican State Convention to succeed Mr. Douglas in the Senate, and thereupon canvassed the State against Mr. D. with an ability in which logic, art, eloquence, and thorough good nature were alike conspicuous, and which gave him a national reputation .-Mr. Douglas secured a predominance in the Legislature and was elected, though Mr. Lincoin had the larger popular vote.

HANNIBAL HANLIN, who was nominated by the Republican Convention at Chicago for Vice-President was born in Paris, Oxford Co., Maine, in August, 1809, and is now in member of the State Legislature, and the next year was chosen to fill a vacancy, octhe United States Senate. In 1851 he was but resigned on being chosen Governor of eix years, which office he accepted, resigning the Governorship. He is still a member of the Senate. This record is an evidence of the confidence with which he has always been regarded by his fellow-citizens in Maine.

GT THE LUMBER BUSINESS AT WILLIAMS: PORT .- The Lycominy Gazette, in a lengthy description of the recent flood in the West

"It is estimated that fifty million feet of lumber passed Williamsport—and the best lot of logs ever floated to this celebrated lumber depot-their value being about half a million of dollars. The mills are not running at present, and will not be in operation until the recent troubles are settled. There yet remains a portion of the logs in the booms and we learn that the majority of lumbermen will soon go on regularly with their business. The loss will be felt more or less by the whole community. Considering that there is less dry lumber in this market now than there has been at this season for many years, it will make the price of lumber advance very much. It is thought that there will be a sufficient quantity of logs in the booms to keep the mills running from a third to half of the manufacturing season. For bundreds of miles down the river many of the logs have been picked up. Crews of men have been sent on to take charge of them, and the tops will not be a total one, as the logs will be sold and sufficient money recovered, together at Thergaland's Wig and Toupee Manufactory. sent on to take charge of them, and the loss lumbermen to carry on their business.
