It is certainly one of the most extensive fertility track, in an almost level position, and samble e-astronous repleasant farming that we know of this side of the western prairies. We found some of the oldest farms upparently loss as profitably productives when first charted of ferest fitty or a bundred years ago.

The Goodogist would soon discover the course of this continued fertility. The whole country as marine deposit, and all through the soft we found evidences of a colear-roots substances, generally in the form or maintain alignments mark showing many distinct forms of ancient abeliar of the territory formation; and this mariy substance is scattered all through the soil, to a very communicated form, and in the exact condition most easily assumitated by such plants as the farmer desires to cultivate.

A few words about the quality and value of this land for entiration, of which we have some strong grout.

Our first visit was to William D Wilson. Franklin town the, Glomester county, who purchased some eight miles north of Mileville, about three years ago, for the purpose of establishing a steam mile, to work up the trader and implies, to send off by the new raifcoid, as well as the freewood and cont, for which he had a branch track a mile and a half long. He also furnished arguen miles of the read with ties, and has no death made the mill profitable, though in man object was to open a farm, having become convinced that the not was volusies for cultivation. In this he has no the track as a second convinced that the not was volusies for cultivation. In this he has not become under which the converse prove. For astence, has year the second time of crapping, 306 hashes or phanness on one arre worth 60 centra busiled in the field. This year, seven acros, without manner, produced 336. or peasaness on one arre worth to centra routed in the field. This year, seven acros, without manner, produced Jos bashes of outs. In one field, the first crop was postness, planted mong the routs, and yielded 75 bashels. The postness were ding and when a own, and yield 10 bushels; and the studdle turned under and sown to backwheat, weigh yielded Joj bushels; and then the ground was sawn to clover and timathy, which gave as a first crop 2j tons per acre

Mr. Wilson's growing crops, and the wheat stabble of the present seas-so, all indicate his land as productive as any part of the Sate.

At Many Barrow's an old style Jersey woman farmer, several miles seath of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corp, that we stopped to inquire of the latted has bown to was produced. We found that the land had been the year but one season, and last apring played once, with one "poor old."

we stopped to inquire of the bired min how it was produced. We found that the land had been the year but one general, and last apring played once, with one "poor old mag," and planted with cirn.

"Ves, but you manured high, we suppose?" We said interrogatively, and got this reply!—

"What, you see, we couldn't a done that; 'cause we han't hat forty much rae heads altegether, for 22 notes, and we wanted the most of the truck."

The track consisted who exist, carrier, cubbage, curumbers, nackous, &e., used a very productive patch of Limabeans, grown for marketing. So we were satisfied that the cold was not fertile, even unaided by clover, which had fed the corn, because the trick; patch? had at been elevated and had been in califyait in long carnigh to obline-late all agus of the forest.

Gut the atvisit was to the farm of Andrew Sharp, five mines such of Millville, from half to a mile cast of the failoud, and plat about in the centre of Vinciand. Mr. Sharp commanced work here in December, 1855, upon 270 week. In less than three years, he has got 224 acres cleared and a croop this senson, all wolf enclosed and divided in a story dwelling, about 26 by 40 feet, and a smaller home for the habovers, and a stable and granary and some other cut-baildings.

Sometimes it learst out in Ulers on my hands and arms; sometimes it turned inward and distressed for at the stomach. Two years ago it broke out on my hands and over oil my scalp and ears with one sore, which was painful and bathsome beyond description. I that many needs from any string. In fact, the disorder grew worse. At length I was rejected to read in the tiospel Messenger that you had prepared an alterative Garsaparilla, for I have from your reputation that any thing you made mast be good. I sent to Cincinnational get it, and used it till it cured me. I look it, as you advise, in shail decreased a haspeanthi over a month, and used almost three bettles. New and healthy skin soon began to form under the such which after a white fell off. My skin is rose feat, and I know by my feelings that the disease has gone from my system. 478 BROADWAY, NEW YORK. Should be in every family, School, Gymnasi-um, Asylum, and Hospital in the land. Are not DANGEROUS, like the common Rocking or now is the time to get your Lumber cheap.-Horse. Stands firm on its Pedestal, will not wear CARPETS, and has no Rockers to injure

FROM THE "HOME JOURNAL." "Of all the child-furniture we have ever seen to article combines so much of those two impor tant things—health and happiness—as the Ad-justable Patent Steel Spring Saddle Horse, in-vented by Jesse A. Crandall, It is not dangerous, like a common rocking-horse, to children's feet, cannot be upset, does not wear carpets, but stands firm on its base, and its action is so like the gallop of a live horse that the child never wearies of it. This atest of child-novelties is excoedingly elegant and artistic in design; and so adjustable, substantial, and durable, that it will last a lifetime. It is indispensable in every family where there are children. It should be in every primary school and gymnasium in the country, as it can be made large and strong anough to sustain grown persons. As a pedestal for photographic pictures, nothing is more beauti-

"Every Orphan Asylum and Institution where children are congregated, should be furnished with a number of these beautiful articles. They are fitted with side-saddles when required."

DIRECTIONS FOR ADJUSTING .- Open the after part of the base sufficiently to allow the axle to go in its place; then raise or lower the Horse to suit you. Screw the bolts in the side These Horses are WARRAFTED one
