In setting let one person hold the tree in its position while another tills in the mellow earth, pressing it firmly among the roots with the hand, taking care to leave no cavities underneath-and when the roots are all covered, pressing the whole down firmly with

Avoid deep planting—when all is finished the tree should be no deeper than when in the nursery.

Grapevines-should be cut back to two or eyes, and only one of these be permitted to grow the first year.

Raspberries and Blackberries should be

cut back to within one foot of the ground. Gooseberries and currents should be cut back to one or two eyes of the last season's

The time for planting in the autumn is after the first hard frost until the ground is closed, from the 20th of October to the last of November, in Ohio; or any time in the spring before the opening of the buds. Trees procured in the fail may be kept safely for planting in the spring by burrying them half their length in mellow earth, in a sloping position, where no water is liable to stand; a slight covering of brush or forest leaves over the tops will be of service in case the lington. Flor winter should prove severe. Small brushes and 5† P. M. like raspberries, grapes, &c., may be buried

Trees planted in the fall should have earth hilled up around the stems, six inches or more in heighth, to hold them firmly in position during winter, and protects the roots somewhat from frost and excess of wet. This is also a protection against injury by mice. In spring the earth should be leveled, and two or three inches of coarse manure or little spread on the surface over the roots for a space of four or five feet in diameter; this will keep the surface moist, prevent baking, and check the growth of weeds.

If planting is done rather late in spring, and in dry weather, it is well to give water freely, after setting the trees rud covering the roots with earth, letting it settle before finishing up; then if the surface is mulched as recommended, no further watering is

No grass or grain crops should be grown among fruit trees, at least until they have arrived at bearing size. Neglecting this precaution is the most common cause of the failure of young orchards. No farmer expects a hill of corn to flourish among grass or other crops, and without cultivation it is just as unreasonable to expect young fruit trees to grow well in such circumstances; yet how seldom do we see anything like common sense exhibted in any thing !-Batcham, Hanford, Sc.'s New Catalogue.

EXPERIMENT IN IRRIGATION .-- Hon. T. C. Peters contributes the following account of a recent experiment in irrigation in Major Dickinson's plan to the Country Gentle-

There is a little sink into which the surface water from perhaps ten acres is drained. When the field is plowed water is usually carried from this sink flown the slope of a slight hill, on one side of it, in a ditch; but when in meadow it is left to flow off without much let or hindrance. The field has been in meadow for some years and portions have run out by reasons of the worms and frost; and I have at times prepared to plow it, but other work being more urgent, and other portions yielding a fair crop of grass | Common Secrets, it has been left and for the last two years Liquorice, the experiment tried of making it a permanent meadow. A year ago last spring I bethought me of my friend the Major, and spending about an hour one day with a man and a spade, I turned the water flowing out of the sink round the face of the bill, as high up as I could make it flow, and let it out upon the grass. Last year a decided improvement was manifested wherever the water had flowed out upon the grass. Last fall I manured both above and below the little sluice that carried the water, and today I have mown the grass upon the ground on each side. I think that upon which the water was conducted will give at least two and a half tons to the acre-the man that mowed it says three tons-while the other will not yield half a ton; and both were in precisely the same condition before the experiment was begun, and, except the water, have been treated in the same manner. The experiment cost me perhaps in all fifty cents and a little personable supervisions which altogether would not be equal to two hours I get for it over five tons of hay extra this year, and with a little more trouble I shall cover nearly double the surface and make an increasing profit.

TURTLE SOUP FROM BEANS .- Take 3 pints of black Spanish bears, put them in a pot with the proper quantity of water, boil them until thoroughly cooked, then dip the beans out of the pot and press them through a colander. Then return this flour of the beans thus pressed into the pot in which they were boiled, tie up in a cotton cloth some thyme and let it boil in the mixture, add a little butter, and season with sait, pepper, parsley sweet basil and sweet marjorum. Have ready force-ment balls, 4 hard boiled eggs, quartered, and add to the soup, together with a sliced lemon—and wine to your taste just upon serving the soup. This will ap-proach so near in flavor to the real turtle soup that few would be able to distinguish the difference.

A little diluted liquid ammonia poured upon a hot iron plate in a greenhouse has wonderful effect in developing flowers and

THE ATLANTIC MONTHLY. BEGINNING OF A NEW VOLUME.

The number for January, 1853, begins the Eleventh Volume of the Atlantic Monthly. FROM the commencement, in 1857, the Atlantic has rapidly increased in circulation, and it now has the inrgest class of renders since its beginning, five years ago. Its prosperity steadily augments, and it continues, and all the fluctuations and dangers incident to our national crisis, to gain ground in the estimation of the public. At a time so pregnant with events which touch the future destinies of America in a case vital variables, the Pallinkers as I Edicated with events which touch the future destinies of America in every vital particular, the Publishers and Editors do not deem it necessary to promise that its pages will never swerve for the honest paths of loyal patriotism and universal freedom. Its opinions have always been on the side of Liberty, Progress and Right, and the course it first adopted in its early career, will ever be faithfully maintained.

The Staff of Writers, regularly contributing to the Atlantic Monthly, embraces all the best known authors in American literature, and warrants the Publishers in American literature, and warrants the Pubhors in American literature, and warrants the Pubishers in promising to its readers,

THE BEST ESSAYS. THE BEST STORIES. THE BEST POEMS. Which American talent can furnish.

LIST OF REGULAR CONTRIBUTORS. In Prost and Poetry the "Atlantic" Staff of Writers is unequalled. The following authors are still

among the regular contributors James Russell Lewelt, Henry W. Longfellow, Louis Agassiz, Relph Waldo Emerson, Oliver W. Holmes, John G. Whittier, E. P. Whipple, Bayard Taylor, Charles E. Norton, George S. Hillard, Henry Giles, Walter Mischell, Henry T. Tuckerman, John Weiss. Nathaniel Hawthorne, National Hawthorne, C. C. Hasewell, G. T. W. Hinginson, Author "Margret Howth," Mrs. Julia W. Howe, H. Mrs. A. D. T. Whitney, Jo. Mrs. H. B. Stowe, H. Charles Reade, "T. Rose Terry. Ha Harriet Martineau,

"The Country Parson,"
Harriet E. Prescott,
J. T. Trowbridge,
Professor A. D. White. labert T. Lowell,

To Consumptives. THE Advertiser, having been restored to health in a few weeks, by a very simple remedy, after having suffered several years with a severe long affection, and that dread disease. Consumption is now ince to make known to his fellow-suffers the means

cure. To all who derive it, he will send a copy of the recription need (free,of charge), with the directions To all who derive it, he will send a copy of the prescription nead (free,of charges, with the directions for proparing and using the same, which they will find a Stree Cran for Constarrion Astrona Ruonicettes. As the only object of the Advertiser in sending the Prescriptions is to benefit the afflicted, and spread information which he conserves to be invaluable, and he hopes every sufferer will try his remedy, as it will cost them nothing, and may prove a blusting.

Further wishing the prescription will picase ad-ires. Hev. El-WALD A. WILSON, William charg. Nov. 1, 1862 — Jan Kings County, New York,

HAVE YOU A COUGH! Then use JAYNE'S EXPECTORANT. Do not allow your cold to take its own course. Two thirds of the victims of consumption owe their afflictions to the fatal mistake of "waiting for a cough to get well of itself." Do not fall into this error, but avail yourself at once of a remedy which thirty years' experience has demonstrated is certain to procure a

overcome the spasmodic contraction of the wind tubes, and cause them to eject the mucuous or matter which clogs them up, and by an easy and free expec-toration remove all difficulty of breathing. HAVE YOU BRONCHITIS!

Then use JAYNE'S EXPECTORANT. This wide Then use JAYNE'S EXPECTORANT. This widespread disease which may generally be described as
an inflamation of the fine skin which lines the inside
of the wind tubes or sir vessels, spreading through
every part of the lungs, is often taken for consumption. The Expectorant subjues this inflamation,
relieves the attaching cough, pain, and difficulty of
breathing, and if the case is not of too long standing,
will certainly produce a cure.

HAVE YOU CONSUMPTION? Then use JAYNE'S EXPECTORANN. It clean-Then use JAYNE'S ENPECTORANN. It cleanses the lunge from all irritating matters, while at the same time it heels and invigorates them. Of all the remedies which have been offered to the public for this dread disease, none have stood the test of time or maintained so universal a popularity as this Expectorant. Thousands who have been given up by their physicians as incurable have been restored to perfect health by its use, and their testimony must carry enovietion to all who read it.

HAVE YOU PLEURISY? Then use JAYNE'S EXPECTORANT. By taking taking two or three large doses in the early stage of the disease in quick succession, and covering up warmly in bed, this preparation nets as a suderific or sweating medicine, and subdues the inflamation at the

HAVE YOU WHOOPING-COUGH. Then use JAYNE'S EXPECTORANT. There is Then use JAYNE'S EXPECTORANT. There is no remedy which so effectually overcomes this disease as the Expectorant. What parent can witness the sufferings of her children from this distressing complaint without doing all in her power for their relief? What medicine so pleasant to the taste, or so certain to produce immediate benefit? Give it a trial, and let it prove its efficacy. HAVE YOU CROUP?

Then use JAYNE'S EXPECTORANT. Children nre subject to no disense more sudden in its attacks, or, in the absence of prompt relief, none more fatal in its results than Croup. Parents, therefore, should keep at hand a remedy sure and thurough. Such a remedy may be found in the Expectorant, and every careful mother will keep a supply by her.

JAYNE'S EXPECTORANT. Is a standard medicine. For thirty years it has been before the public, and during this period its curative powers have been testified to by all classes of people in all quarters of the world. Physicians, elergymen, lawyers, merchants, and mechanics have experienced its remedial effects, and have furnished us with their testimony, and it may be found at length in our Almanac, to be had grains of all agents. To their convincing certificates we would refer the doubting.

The EXPRETERANT and all Dr. D. JAYNE & SON'S PAMILY MEDICINES are sold by all Druggists May 17, 1862.-3 m.

FINKLE & LYON SEWING MACHINE CO-, Descriptive Circulars, with Samples of Work,

will be sent Mail Free. OUR "FAMILY SEWING MACHINE," HAVING attained a well established and flattering reputation, as being of all machines yet introduced, the one best adapted to ALL Kinns of Fanily Sewing, and having met with a success in its sale beyond our greatest anticipation, so much so, that for three months our orders have been ahead of our capacity to supply, we would now announce that we have increased our manufacturing facilities, so that from this time forth, we shall be enabled to supply orders on demand.

interincessed our manufacturing facilities, so that from this time forth, we shall be enabled to supply orders on demand.

In the changes brought about by the war, no one thing has played a more important part than the "Sewing Machine." Without it three-fourths of our soldiers would to-day be clothed in anything but "Military Costume." All over the land army clothing has been the work required of our patriotic women, and nobly have they responded. Not content to make only so many garments as their hands could accomplish, they have called the "Sewing Machine" to their aid, and by it have rolled out the soldiers. Coats, Pants and Shirts, at a rate astonishing to themselves. Knowing that this work could not long continue, many thoughtful, prudent housewives, were exceed to select the machine of all others, which would do the heavy army work, and when done with that, then to be used as their Family Machine, and in selecting one of the "Finkle & Lyon Sawing Machine Company's Family Machines,"

FAMILY MACHINES,"

FINKLE & LVON SEWING MACHINE, COMPANY'S

FAMILY MACHINES,"

with which you may sew from the finest cambric to the heaviest cloth, without change of feed, needle, or tension—they have not been disappointed.

Thus having developed the adaptability of our machine for all kinds of work, we have made another step in advance, and by several important changes in our "No. 3 Medium," which we confidently also to be the "BEST TAILORING MACHINE," which we confidently also to be the "BEST TAILORING MACHINE" yet introduced, sewing the coarsest linen thread with as much ease as the common cotton—and when required may be used to do the very finest cambric work, with 150 or 260 cotton—thus combining in one compact form, every quality required in either a FAMILY OR MACHINE.

We have had our Machines before the public long enough to establish their reputation. Dozens of others who started with flying colors "have fallen by the wayside;" and "soon the places that knew them will know them no more." Step by step has the Finkle & LYON Machine won its way to public favor; its success is established, and henceforth our nim shall be, as it has in the past been, to still further improve, simplify and reduce the cost of our machines. We shall, in a few days, issue a new price list. For further particulars address.

THE MARKET.

By looking over the map the reader will perceive that it enjoys the best market in the Union, and has direct communication with New York and Philadelphia twice a day, being only thirty-two miles from the latter. Produce in this market brings double the price that it does in locations distant from the cities. In this location it can be put into market the same morning it is gathered, and for what the farmer soils he gets the highest price; whilst groceries and other articles he purchases, he gets at the lowest price. In the West, what he sells brings him a pittance, but for what he buys he pays two prices. In locating here the settler has many other advantages. He is within a few hours, by railroad, of all the great cities of New England and the Middle States. He is near his old friends and associations. He has shool for his children, divine service, and all the advantages of civilization, and he is near a large city.

na dean more than makewage ins improving it, and when it is done it is a certain independence and no loss. A few sores in fruit tree will insure a comfortable living. The land is put down to hard time prices, and all improvements can be made at a cheaper rate than any other time.

The whole tract, with six miles front on the Railroad, is being laid out with fine and spacious avenues, with a town in the centre—five acre lots in the town sell at from \$150 to \$200; two and a half acre lots, at \$50 to \$120 to \$200; two and a half acre lots, at from \$80 to \$120, and town lots 50 feet front by 150 feet deep, at \$100—payable one half cash and the balance within a year. It is only upon farms of twenty acres or more that four years' time is given.

To Manufacturers, the town affords a fine opening of the Shee manufacturing business, and other articles, being near Philadelphia, and the surrounding country has a large population, which affords a good market.

This settlement, in the course of several years, will be one of the most bautiful places in the country, and most agreeable for a residence.

It is intended to make a Vine and Fruit growing country, as this culture is the most profitable and the best adapted to market. Every aevantage and convenience for settlers will be introduced, and will insure the prosperity of the place. The hard times throughout the country will be an advantage to the settlement, as it compels people to resort to agriculture for all tiving.

Large numbers of people are purchasing, and peopple who desire the best location should visit the place. In proved land is also for sale.

ple who desire the best location should visit the placatones.

Improved land is also for sale.

Improved land is also for sale.

The mark.—Land can be bought with or without timber. The timber at market valuation.

The title is indisputable. Warrantee Deeds given, clear of all incumbrance, when the money is paid.

Boarding conveniences at hand.

Letters promptly answered, and Reports of Solon Robinson and Win. Parry, sent together with the Vineland Rural.

Route to the land:—Leave Walnut street wharf, Philadelphia, at 9 o'clock, A. M., and 4 P. M., (unless there should be a change of hour.) for Vineland, on the Glassboro and Miliville Raifcoad.—When you leave the cars at Vineland Station, just opened, inquire for

when you leave the care at Vibral Pestmaster, opened, inquire for UHARLES K. LANDIS. Pestmaster, Founder of the Colony, VIBRIAND, P. O., Cumberland county, N. J. P. S.—There is a change of cers at Glassboro',—
Also beware of sharpers on the cers from New York
and Philadelphia to Vineland, inquiring your business, destination, &c. PRICE TWO DALLARS. May be had of DrugZ gists, or will be sent by mad upon receipt of \$2, or by express everywhere, with an necessary institute than the principut office of the strong from the principut office of TRIBUNE, UPON THE VINELAND SETTLEMENT.

t & The following is an extract from the report of Soim Robinson, Esq., published in the New York Tribune, in reference to Vineland. All persons can read this report with interest:

Advantages of Farming near home-Vineland-Remarks upon Marl-Soil, its great Fertility-The Cause of Pertility-Amount of Crops

Produced-Practical Evidence. It is certainly one of the most extensive fertile tracts, in an almost level position, and suitable condition for pleasant farming that we know of this side of the western prairies. We found some of the oldest farms apparently just as profitably productive as when first cleared of forest fifty or a hundred years

The geologist would soon discover the cause of this The geologist would soon discover the cause of this continued fartility. The whole country is a marine deposit, and all through the soil we found evidences of calcarcous substances, generally in the form of indurated calcarcous mart, showing many distinct forms of ancientshells, of the tertinay formation; and this marly substance is cantered all through the soil, in a very comminuted form, and in the exact condition most easily assimilated by such plants as the farmer desires to cultivate.

Marl, in all its forms, has been used to fertilize crops in England, from the time it was occupied by the Romans; and in France and Germany a marl bed

the Romans; and in France and Germany a mari bed is counted on as a valuable bed of manure, that can be dug and carted and spread over the field. How much more valuable, then, it must be, when found already mixed through the soil, where new particles will be turned up and exposed, and transformed to the owner's use every time he stirs the carth. Having then satisfied our minds of the cause, they will not be excited with wonder at seeing indubitable evidence of fertility in a soil which in other situations. having the same general characteristics or at least appearances, is entirely unremunerative, except as its productiveness is promoted by artificial fertilization.

A few words about the quality and value of this land for cultivation, of which we have some strong proof. Our first visit was to William D. Wilson, Franklin Our first visit was to William D. Wilson, Franklin township, Gloncester county, who purchased some eight miles north of Millville, about three years ago, for the purpose of establishing a steam mill, to work up the timber into lumber, to send off by the new railroad, as well as the firewood and coal, for which he built a branch track a mile and a half long. He also furnished sixteen miles of the road with ties, and has no doubt made the mill profitable, though his indicated was to open a farm, having become convinced that the soil was valuable for cultivation. In this he has not been disappointed, as some of his crops prove. For instance, last year, thosecond time of cropping, 305 bushels of pointoes on one acre, worth 50 cents a bushel in the field. This year, seven acres, without manure, produced 356 bushels of oats. In one field, the first crop was potatoes, planted among the roots, and yielded 75 bushels. The potatoes were

the roots, and yielded 75 bushels. The potatoes were dug and wheat sown, and yielded 19 bushels; and the stabble turned under and sown to buckwheat, which yielded 332 bushels, and then the ground was sown to clover and timothy, which gave as a first crop of WALL PAPER, consisting of ONE HUNDRED AND SIXTY-THREE DIFFERENT STYLEL AND PATTERNS, varying in price from 6 cents upwards, all of which will be sold at the lowest cash prices, at the which will be sold at the lowest cash prices, at the lowest cash prices. At the lowest cash prices at the lowest cash prices. The fertilizers applied to these crops were, first, the lowest cash prices are consistent of the stable turned under the ground was a solution of the stable turned under the prices. The stable turned under the ground was a solution of the stable turned under the prices. The stable turned under the ground was a solution of the stable turned under the ground was a solution of the stable turned under the ground was a solution of the stable turned under the ground was a solution of the stable turned under the prices. The stable turned under the ground was a solution of the stable turned under the ground was a solution of the stable turned under the ground was a solution of the stable turned under the prices. The stable turned under the prices are the stable turned under the prices are the stable turned under the ground was a solution of the stable turned under the prices. The prices are the stable turned under the prices are the prices are the stable turned under the prices are the stable turned under the prices are the prices are the prices are the prices are the prices a

The fertilizers applied to these crops were, first, ashes from clearings; second, 225 peands of superphosphate of lime; third, 200 pounds Ferwinn guano; then 50 bushels of slaked time has been spread upon the clover since it was mowed, and turned in for wheat.

Mr. Wilson's growing crops, and the whoat stubble of the present season, all indicate his sand as productive as any part of the Siste.

At Mary Barrow's, an old sigle Jersey woman farmer, several miles south of Mr. Wilson's, we were so particularly struck with the fine appearance of a field of corn, that we stopped to impuire of the hired man how it was preduced. We found that the land had been the year but one before in wheat sawn with clover, and this cut one season, and insispring plowed once, with one "poor old nag," and planted with coin.

A REMEDY FOR HARD TIMES.

A Rare opportunity in the Best Market, and most Delightful and Healthful Climate in the Union. Only Thirty Miles South of Philadelphia, on a Railroad; being a rich, heavy soil, and highly productive wheat hand; amongst the best in the Garden State of New Jersey.

It consists of 20,000 acres of good land, divided into Farms of different sizes to suit the purchaser—from 20 acres and apwards—said is soid at the rate of velover, which had fed the core, because the circuit.

by clover, which had fed the corn, because the "truck patch" had not been clovered, and had been in cul-tivation long enough to obliterate all signs of the forest. Our next visit was to the farm of Andrew Sharp,

Is bushels per acre and \$10 worth of straw. The rye stubble turned, after knocking off a large growth of oak sprouts, and dressed again with gusno and seeded to wheat, gave 15 or 16 bushels. The crop which he was threshing while we were there promised more was threshing white we were there promised more, of a very plump grain, and the straw is very heavy. We went over the stubble and found the clover and timethy, from seed sowed in tspring, on the wheat, without harrowing, looking as well as we ever saw it upon any old cultivated farm, and with a little work done in the winter to clear off some roots and rotten stumps, and setting stakes to mark permanent ones, he will be able to cut the crop the next year with a mowing machine, and we will guarantee two tons per acre, if he will give the overplus if it overruns the estimate.

estimate.

Part of the land was planted with polatoes for a first crop, which yielded 120 bushels per acre. It was then timed with 50 bushels per, acre, and seeded with wheat and clover, yielding an average of over 15 bushels per acre, and the clover now looks beautiful.

THE CLIMATE

Is delightful: the winters being salubrious and open, whilst the animers are no warmer than in the North The location is upon the line of latitude with northern Virginia.

Persons wanting a change of ellmate for health would be much benefitted in Vineland. The mildness of the climate and its bracing influence, makes it excellent for all pulmenary affections, dyspepsia, or general debility. Visitors will notice a difference in a few days. Chills and favers are unknown.

CONVENIENCIES AT HAND.

Building material is plenty. Fish and Oysters are plentiful and cheap.

Visitors must expect, however, to see a new place. WHY THE PROPERTY HAS NOT BEEN SETTLED BEFORE.

This question the reader naturally sale. It is because it has been heid in large trace by families not dispeased to self, and being without railroad facilities they had few inducements. The railroad has just been opened through the property this season, for the first time.

Valuors are shawn over the land in a corriage, free of expease, and afforded lime and opportunity for of expease. This question the reader naturally asks. It is because is has been held in large traces by families not disposed to sell, and being without railroad families they had few inducements. The railroad has just been opened through the property this season, for the first time.

Visitors are shown over the land in a corriage, free of cape.ose, and afforded time and opportunity for theoremis in vestic, should brug meany to secure their purchases, as isocations are not held upon refusal.

The sajest thing in hard times, where people have been thrown out of employment or business mean little means or small income, is to fart the major as thrown out of employment or business are not been thrown out of employment or business are for himself, what may be seen within a two hours been thrown out of employment or business are not have a piece of hard a meal to all the force, which would be prederable in purchasers with the required to build out the purchasers with the required to build out. Comfortable houses, and eliter fouce, which would be prederable, business with the required to build out. Comfortable houses, and eliter fouce, which would be prederable, business with the required te build out. Comfortable houses, and eliter fouce, which would be prederable, business with the required te build out. Comfortable houses, and eliter fouce, which would be prederable, which means a good population will be secured, who mile establish abundance, and houses, and chier fouce, when we should hear will be secured with the purchase of extilized title.

If any one, and house house of American mechanic stores and houses, and houses, and houses, and houses, and ching tenth when w
