tles ought to contain some information as to how to do for these pests. When the worthy exhorter warns the sinner how to flee from the wrath to come, he is expected to show him where to get the grace to do it, and the law should be no less reasonable. But as we read our exchanges and see with our own eyes how people do, it is evidently few who know how to do it. One whom we have just read of, says do not plow them in early fall or spring; but in summer when the thistles are in bloom. It strikes us this summer treatment will prove no better than the other two. There is one way, however, that they can be got rid of, and that is by putting the foul land in corn, and then resolutely digging them out with a fork, as soon as the young teares appear in the spring, or any time through the summer. A spade cuts them and every piece left will grow; by loosening the ground with a fork they can be taken out more thoroughly than by a spude. They cannot be wholly taken out on the first attempt, but may sprout up this way several times a season, and must be followed up as often as they ap-

The next season put in corn again. A few will come up this season, but not many, and generally a single clearing the second year is all they require to destroy them for

SUNNYSIDE MEATER.

SUNNITEDE AT MANULAND STATE FAIR, BALTIMORE.—First premium for Fire-place Heaters
awarded the Sunnyside:

1. It is so constructed that one-third more of
the radiating surface extends into the room, giving that much more additional heat without extra feel.

2. It is the only Hot-Air Fire-place Heater in
the market. Like the regular built veilar heater,
it loses no heat, but confines it all to its legitipurposes.

purposes.

3. The fuel magazine is double the usual size, extending from the fire-box to the top of the stove, with capacity for twenty-four hours' supply of coal.

4. The patent double cover for coal magazine consumes the gas, prevents escape of gas into the room, and makes it impossible for any puf-fings or explosions to occur. This is an advant-age possessed by no other fire-place stove in the market.

nage possessed by no other fire-place stove in the market.

5. There are three air ceambers, wherein a brisk circulation is kept up, drawing the cold air in the room through heated flues into a large hot-air reservoir, at the back of the stove.

6 No side pipes are used, as the air is heated in a reservoir having double radiating flues and double back, supplying large quantities of hot airwithout waste of heat or fuel.

7. The Sunnysing utilizes the waste heat so thoroughly that we frequently heat an adjoining room on the first, besides heating the rooms in second and third stories.

8. A damper on top of the stove, connected with the hot air flues, controls the quantity of hot air required for the use of either the upper or lower rooms. All other fire-place stoves are very inconvenient in this respect.

9. The Grate is self-scaling, sud no dust can escape while shaking it.

GAS CHEAPER THAN KEROSENE. ORFICE OF THE SUNBURY GAS COMPANY. October 2d, 1871.

October 2d, 1871.

To the Citizens:—Recent investigations demonstrate that Gas of 14 Candies quality, can be sold at \$2.00 per 1000 cubic feet. The Directors of the Sunbury Gas Company have determined to adopt that price and 14 Candies as the standard of quality. This fixes the price of a 14 Candie burner at one cent an hour, or one-third less than Philadelphia gas.

A Kerosene lamp gives a light of seven to ten candies only—therefore, gas at the above price is much cheaper than kerosene, without cansidering cost of chimneys and liability to accident. Let all come forward and begome gass consumers. Make your applications for service pipes and fittings at once, as the season for introducing them is drawing to a close.

By Orden of the Board of Directors.

TERMS. The contractors for the Works will introduce pipes upon the following terms. Service pipes at 50 cents per running foot, measuring from centre of street. Upon Market Square, twenty dollars for entire service.

Interior fittings at 15 cents per running foot, in new buildings; 15 cents per running foot over plaster, and 20 cents per running foot under
