TEMPERANCE CRUSADE IN THE WEST -- A most extraordinary temperance campaign is being carried on in Ohio, which is rapidly gaining in intensity and force. The women are the main movers ir, it. Their manner of proceeding is this . . They organize praying companies, ar d go to the places where liquor is sold and if they are given room inside they naugurate a prayer meeting and continue it until the proprietor of the place, signs a pledge to stop his business. It they are not permitted to Cambria. enter, they have a temporary protection crected on the outside, as near the door as bracticable, where they carry on their re- Judge. ligious services and keep vigilant watch on those passing in and out of the place. At intervals, one praying company is relieved by another, so that there is no intermission until a surrender of the party being prayed for is obtained. So great interest is felt in the movement in some places, that at certain hours of the day all business is suspended and general prayer is engaged in."

The success of these ardent apostles of the new dispensation so far has been unexampled. Some such movement was begun in the State of New York some fifteen years ago and was reasonably successful. But no such wide-spread and fervent revival of religion and temperance as this has been witnessed of late in any part of Juniata. the United States. The cause commands the sympathy of vast multitudes; if the effects of the crusade are permanent, it may well take its place among the notable reforms of modern times.

OUR neighbor of the Democrat could not have pleased us better than he did in accusing us of being connected with a "nice little Court House Ring." Although we were not aware of it before, that such a Ring existed, we feel highly honored. If there is such a thing as a Ring now we are happy to observe that it is not following the course of Eichholtz's large Democratic Ring that kept robbing the tax-payers from year to year, and that they keep everything in such good order and condition as to make the contrast noticeable. So long as the offices in the county are conducted as now, we shall certainly feel proud of belonging to that nice Ring, and believe too that if the good management is continued by the Republican officers, that we shall not hear any complaints from the taxpayers in the county.

In its financial columns, the Philadelof currency and business. There seems to be, it says, a sort of general understanding that while there shall be no further direct inflation of the currency, the Secretary of the Treasury shall be permitted to issue the forty-four millions retired greenbacks. This means, in the mind of every man intelligent on the subject, permission to inflate just four times forty-four millions of dollars-or, perhaps, the expansion of bank credits four times that amount. What has been done in this way is already being felt on the various industries of the country. This action of the Treasury in the notes, aided by the 'letting loose the last month of seventy-five millions of dollars in the shape of dividends and interest payments, has given to business of all kinds a marked impetus, as is told in almost all prices. The present situation is underlaid of the same committee, which was read at with much of buoyancy, which may last length. for weeks to come.

Rosentine and Moody, the murderers of Mr. Behm, have both made confessions. They acknowledge their presence at the murder, but each accuses the other of having committed the act. They both say that Mr. Behm was killed by being struck on the head by a portion of a flail, but Moody says that Rosentine struck the blows, and eice versa. In Moody's confession, he says that he was instigated to the murder by another colored man named Preston, who told him that he had murthey swing.

THE CONTESTED ELECTION CASE .-The election contest between Messrs. Lovett and Ammerman was suddenly ended on Thursday last, by the action of the Legislature, as will be seen by the fol-

The annual meeting of the stockholders of the Philadelphia and Erie Railroad, on Monday, at Philadelphia was quite an excitable affair. For several years past the annual meeting of the Philadelphia and Erie railroad company have witnessed stronger and stronger expressions of disapproval on the part of stockholders because the road, alone in this respect among the great corporations, pays no dividends. At the annual meeting on Monday, decisive means were taken for receiving a thorough knowledge of the manner in which the company's affairs are conducted, and also for discovering where the leak, if one exists, really is. The report presented by the management shows a gross increase of \$3-842,967 20, a gross outlay of \$3,413,310 84, leaving for profit the sum of \$428,756 36, and this is \$139,685 67 less than was earnassessment of claims, "some of which be-21st District, Wayne, Pike, Monroe and cess of adjustment :" the opening of additional telegraph offices, and an advance in
