The MOON's INFLUENCE ON RAIN.— From the comparison of a series of obser- vations, continued for twenty eight years at Munich, Stuttgard, and Augsburg, it appears that the maximum number of rainy days takes place between the first parter and the new moon. The number of rainy days in the last of these intervals is to that in the first as 606 to 846, or in round numbers as 4 to 6. And this por- portion is not only true of the twenty years taken together, but also of the separate groups of four years, which give analagous numbers ; we therefore conclude that it tims more frequently during the wane of the moon. The results maintained receive support from a series of observation made at Vienna.
In , and the victim of this awful disease becomes a horid object of commissitation, till death puts a period to his dreadful suffering, by sending int to "that Undiscovered Country from whence no traveller returns." It is a melancholy fact that thousands DIE functions to this terrible disease, through falling into the hands of Ignorant or unskillful PRE-TENDERS, who, by the use of that deadly Poison, Mercury, &c., destroy the constitution, and incapable of caring, keep the unhappy suffers month after month taking their noxious or hurious compounds, and instead of being restored to a renewal of Life Vigor and Happiness, in departs it care this with rained Health to sign over its galing disappointment. The elevator had an open work roof—criss cross, you know, with quite large holes between the criss crossings. It was not dark ; we could see each other plainly. By-and-by we heard the bells ring in a distracted way, feet run- ning up stairs, and voices ; then the door at the top shot back, and some one called out : "Miss Blodget, are you here ?" 'Yes,' I said ; 'I wish I wasn't.' "What's the matter with the pulleys ?' called out James. "Oh, Alsop, you too ? It isn't the pul- leys, they say ; it's something else. But it's sure to be all right in a few minutes ; they've sent for a man to come and fix it.' "Was there ever anything so provoking since the world began ?' chimed in Mrs. Peyton. (I could just dimly see her profile through the open work.) Don't catch cold, Estella, whatever you do. Keep your cloak tightly around you. You'll see that she's wrapped up won't you, Mr. Alsop ? It's such a comfort that you are there to take care of her.' "Are you warm enough ?' asked James, in a formal voice. "Yes, indeed ;' and I showed him that my wrap was lined with fur. "That's well,' he said ; 'there is always a draught in a shaft like this.' "Well—of course nobody could keep on being stiff under such circumstances—we got to talking. The dinner party arrived, the Dalrymples and Sergeants. One by one they came to the glazed door to look down and pity us, and what between sym- pathy and the ludicrous nature of our fix, they laughed and we laughed, till we were in the merriest of moods. All this time	'I really don't think I shall,' said Ernes- tine, looking quite pale. 'It terrifies me to remember that only to day I came up in this of yours.' 'Oh, ours is the safest in the city now. You know the superstition about the can- non balls never entering twice at the same place. We have had our accident, and it is over. Besides Mr. Kelleran had the apparatus entirely changed, and they say now that such a thing could not Mappen.' 'So then and there your romance began ?' remarked her friend. 'Then and there. Of course James came to see me afterward, and kept coming, and I had quite got over being afraid of him, and so—and so. Ah, there he is at last,' as the door opened. 'James, dear, how late you are. Come here and be introduced to my Ernest.' <b>Miscellaneous</b> . A BRUTE.—Don't read the annexed ex- tract to your wife, young man, because it is likely to make her cry : The girl is generally educated on novels and her first disappointment comes in on the quiet indifference of the husband after the honeymoon. 'You love me no longer,' said a bridge of a few months to her better half in grown and slippers. 'Why do you say that, puss ?' he asked quietly, remov- ing a cigar from his lips. 'You do not caress me nor call me pet names; you no longer seek so anxiously for my company,' was the tearful answer. 'My dear,' con- tinued the aggravating wretch, 'did you ever notice a man running after a car ! How he does run—over stones, through mud, regardless of everything till he reaches the car and he seizes hold and swings on. The quietly seats himself and rends the paper.' 'And what does that	more potent than the logic of a Webster or a Clay. Polished manners have often made hundreds successful, while the best of men, by the hardness and coolness, have done themselves incalculable injury—the shell being so rough that the world could not believe there was a precious kernal within it. Had Raleigh never flung down his cloak in the mud for the proud Elizabeth to walk on, his career in life would scaree- ly have been worth recording. Scores of men have been successful in life by pleas- ing manners alone. It is a trait of char- acter well worth cultivating, lads. Never torget the value of true civility. THE MOON'S INFLUENCE ON RAIN.— From the comparison of a series of obser- vations, continued for twenty eight years at Munich, Stuttgard, and Augsburg, it appears that the maximum number of rainy days takes place between the first quarter and the new moon. The number of rainy days in the last of these intervals is to that in the first as 606 to 846, or in round numbers as 4 to 6. And this por- portion is not only true of the twenty years taken together, but also of the separate groups of four years, which give analagous mumbers; we therefore conclude that it rains more frequently during the wane of the moon. The results maintained receive support from a series of observation made at Vienna.

The elevator had an open work roof-criss cross, you know, with quite large holes between the criss crossings. It was not dark ; we could see each other plainly. By-and-by we heard the bells ring in a distracted way, feet run- ning up stairs, and voices ; then the door at the top shot back, and some one called out : "Miss Blodget, are you here ?" 'Yes,' I said ; 'I wish I wasn't.' "What's the matter with the pulleys?" called out James. "Oh, Alsop, you too ? It isn't the pul- leys, they say ; it's something else. But it's sure to be all right in a few minutes ; they've sent for a man to come and fix it.' "Was there ever anything so provoking since the world began ?' chimed in Mrs. Peyton. (I could just dimly see her profile through the open work.) Don't catch cold, Estella, whatever you do. Keep your cloak tightly around you. You'll see that she's wrapped up won't you, Mr. Alsop ? It's such a comfort that you are there to take care of her.' "Are you warm enough ?' asked James, in a formal voice. "Yes, indeed ;' and I showed him that my wrap was lined with fur. "That's well,' he said ; 'there is always a draught in a shaft like this.' "Well-of course nobody could keep on being stiff under such circumstances—we got to talking. The dinner party arrived, the Dalrymples and Sergeants. One by one they came to the glazed door to look down and pity us, and what between sym- pathy and the ludicrous nature of our fix, they hughed and we laughed, till we were in the merriest of moods. All this time confused sounds of scraping and sawing came from below, but we remained un- movable.'	'I really don't think I shall,' said Ernes- tine, looking quite pale. 'It terrifies me to remember that only to day I came up in this of yours.' 'Oh, ours is the safest in the city now. You know the superstition about the can- non balls never entering twice at the same place. We have had our accident, and it is over. Besides Mr. Kelleran had the apparatus entirely changed, and they say now that such a thing could not Mappen.' 'So then and there your romance began ?' remarked her friend. 'Then and there. Of course James came to see me afterward, and kept coming, and I had quite got over being afraid of him, and so—and so. Ah, there he is at last,' as the door opened. 'James, dear, how hat you are. Come here and be introduced to my Ernest.' <b>Miscellaneous</b> . 'You do not caress me nor call me pet names; you no longer seek so anxiously for my company,' was the tearful answer. 'My dear,' con- tinued the aggravating wretch, 'did you ever notice a man running after a car ! Polished manners have often made hundreds successful, while the best of men, by the hardness and coolness, have done themselves incalculable injury—the shell being so rough that the world could not believe there was a precious kernal within it. Had Raleigh never fung down is cloak in the mud for the prood Elizabeth owner and the end for the prood Elizabeth of weak on, his career in life would scarce- ing manners alone. It is a trait of char- acter well worth cultivating, lads. Never ing manners alone. It is a trait of char- ter well worth cultivating, lads. Never for the comparison of a series of obser- sations, continued for twenty eight years at Munich, Stuttgard, and Augsburg, it appears that the maximum number of rainy days takes place between the first quarter and the new moon. The number of rainy days in the last of these intervals is to that in the first as 606 to 846, or in round numbers as 4 to 6. And this por- portion is not only true of the twenty years aken together, but also of the separate groups of four years, which give analogous numbers ; we therefore conclude that it this more frequently during the wane of the moon. The results maintained receive apport from a series of observation made at vienna. Estella was looking more than pleased. She had kissed the lady in gray twice as they met, and now stood holding ber hands and speaking rapidly.</li> <li>'You brought your bag. Earnest ? You are going to stay ? I've set my heart on having you christen our spare room.'</li> <li>'Yes, the bag is outside. Never mind it now, or me. We shall have time for all that by-and-by, and you have your other friends to see to.</li> <li>'They are beginning to go. It is almost five. Run into my bedroom, Earnest, the one next this, and take off your bonnet.'</li> <li>The elevator !do tell me what you mean,'' persisted Alice Ordway, detaining Mrs. Dalrymple.</li> <li>'Come round for five o'clock tea to-mor- row, and you shall have the full, true, and particular history,' promised that lady. 'It is too late for story-telling now. I must go.'</li> <li>The last guest departed, and Estella ran back into the drawing room.</li> <li>'Now Earnest, dear old Earnest. I have you to myself at last. Isn't it cozy ?'</li> <li>'It is charming'look about the dainty chamber, with its walls and carpet of pale gray touched with blue, its fresh chintzes, and gay little fire. 'I never saw anything prettier or more complete. How do you like living on a flat, Stella ?'</li> <li>'Oh, very much. I don't know about flats, in general ; but this is delightful, quiet, convenient, and we are so high up that we have something like a view. James and I are very proud of our view. But we began with pleasant associations,you know. The Peytons used to live here. Such nice people ! And here it was that it all be- gun.' 'It ?'</li> <li>'Yes, our it. Dear old stupid, you know what I mean ; our engagement ? no, not our engagementthat came laterbut our finding each other out; the preliminary emotions, and all that.'</li> <li>'I want to hear about all that,' said Ern- estine, as they returned to the drawing-</li> </ul>	We were so near the Peytons' floor that we could see the light shining through the glazed door on the top. The elevator had an open work roof-criss cross, you know, with quite large holes between the criss crossings. It was not dark ; we could see each other plainly. By-and-by we heard the bells ring in a distracted way, feet run- ning up stairs, and voices ; then the door at the top shot back, and some one called out: "Miss Blodget, are you here ?" 'Yes,' I said ; 'I wish I wasn't." 'What's the matter with the pulleys ?' called out James. "Oh, Alsop, you too ? It isn't the pul- leys, they say ; it's something else. But it's sure to be all right in a few minutes ; they've sent for a man to come and fix it." 'Was there ever anything so provoking since the world began ?' chimed in Mrs. Peyton. (I could just dimly see her profile through the open work.) Don't catch cold, Estella, whatever you do. Keep your cloak tightly around you. You'll see that she's wrapped up won't you, Mr. Alsop ? It's such a comfort that you are there to take care of her." 'Are you warm enough ?' asked James, in a tormal voice. 'Yes, indeed ;' and I showed him that my wrap was lined with fur. 'Well-of course nobody could keep on being stiff under such circumstances-we got to talking. The dinner party arrived, the Dalrymples and Sergeants. One by one they came to the glazed door to look down and pity us, and what between sym- pathy and the ludicrous nature of our fix, they hughed and we laughed, till we were in the merriest of moods. All this time confused sounds of scraping and sawing came from below, but we remained un- novable.' 'Do go to dinner,'I called out, for I knew Mrs. Peyton's cook must be on tenter- hors. We don't care for soup; do we, Mr. Aslop ? We will come in for fish. 'No, neither of us eats soup,' echoed James. Pray begin without us, Mrs. Pey- ton. We'll make our appearance when	<sup>4</sup> I really don't think I shall,' said Ernestine, looking quite pale. 'It terrifies me to remember that only to day I came up in this of yours.' Oh, ours is the safest in the city now. You know the superstition about the camnon balls never entering twice at the same place. We have had our accident, and it is over. Besides Mr. Kelleran had the apparatus entirely changed, and they say now that such a thing could not Mappen.' 'So then and there your romance began?' remarked her friend. Then and there. Of course James came to see me afterward, and kept coming, and I had quite got over being afraid of him, and so—and so. Ah, there he is at hst,'as the door opened. 'James, dear, how hate you are. Come here and be introduced to my Ernest.' <b>Miscellaneous</b> . A BRUTE.—Don't read the annexed extract to your wife, young man, because it is likely to make her cry: The girl is generally educated on novels and her first disappointment comes in on the quiet indifference of the husband after the honeymoon. 'You love me no longer,'s aid a bridge of a few months to her better half in grown and slippers. 'Why do you say that, puss ?' he asked quietly, removing a cigar from his lips. 'You do not caress me nor call me pet names; you no longer seek so anxiously for my company,' was the tearful answer. 'My dear,' continued the aggravating wretch, 'did you ever notice a man running after a car! How he does run—over stones, through mud, regardless of everything till he reaches the car and be seizes hold and swings on. The quiet yeats himself and read sthe paper.' 'An illustration, my dear. The car is as important to the man after he gets in swhen he was chasing it, but manifestiation is no longer called for. I would now shot any one who would come between us, but as a proof of my love you insist upon running after the car. Learu to smoke, my dear, and be a phiceopher. The two poneris is as important to the man after he gets in the paper.' 'An illustration, my dear. The car is as important to the man	more potent than the logic of a Webster or a Clay.
