arose a few mornings ago, while the festive lark was still snoozing, and with a tin bucket under his arm went to the barn to milk the family cow. It was dark and rainy, and in fumbling about for old Brindle he got into the wrong pew and began to pail the off mule of his wagon team. He can't remember now which side of the roof he went out at, but his recollection of alighting on the picket fence is very vivid. He expects the bucket down in a few days.

It is very seldom you hear of a German having the asthma, but I know one who had this ailment. He sent for the doctor the other day, and he gave him a prescripempty stomach. But this part of the business he did not quite understand and consequently got no better from taking medicine. The next time the doctor called he found his patient in a high temper. 'I vas so sick ash never vas all night. Now, doctor. I don't vant no tam voolishness mit me ; I dells you dot right away.' 'But I am not fooling you,' replied the doctor. 'Have you taken the medicine ?' 'Yaw, but it vash no better ash vater.' 'But have you taken the walk on an empty stomach as I told you?' 'There, by tam, there ish vere ter voolins comes in. Lower Mahanoy twp., July 6, '75 .- 6t. THE LIGHT RUNNING "DOMESTIC."

The "Domestic."

The "DOMESTIC" is an exceedingly simple machine in all its parts and processes. It is easily understood; familiarity with its action is very quickly acquired, and it needs hardly any practice of special skill in the operator.

The superior advantages obtained in the "Do-MESTIC" are mainly: 1. Light Running. 2. Quietness-no Cams or Gear Wheels. 3. Perfect Stitch-Double-thread Lock Stitch 4. Durability-arising from Simplicity of Con-

5. Absence of all Friction. 6. Great range of Work.

We do not say that the "Domestic" is the only Machine worthy of public favor. We admit there are some possessing real and acknowledged merit . but we do claim, and are prepared to demonstrate, that the "Domestic" has many excellences that render it decidedly superior t any other Machine now before the public Let every woman, therefore, examine for herself into its merits when she buys a machine. This is an important purchase, not to be carelessly made; one that will influence her comfort, probably for a long time. With a "Domes-tic" in her possession, she will find her sewing become a pleasant exercise of skill and taste, instead of a slow manual drudgery; she will have the time and strength to add beauty and elegance to work in which before she has been obliged to content herself with bure utility.

HOPE. '8 O'clock.' HOPE.

"Behold I will stand before the there upon the rock in Horeb; and thou shall mite the rock and there shall come water out of it that the people may drink."-Ex Perhaps at no period of christian history from the days in which Christ astonished the multitude at the pool of Bethesda, has such an excite ment prevailed among the sick as is now created by the accidental discovery of a fountain of mineral water which beyond cavil celipses the whole fraternity of the learned faculty in restoring to original health almost every form of chronic disse. Finding it impossible to accommodate the sick, here the proprietors propose to furnish the concentrated medicine prepared by simply reducing the water by evaporation into a fine powder or Mass, which posesses all the wonderful virtues of the water in a cheap and convenient form. The Mass is a fine tonic, alterative and absorbent and is especially useful to ladies suffering from irregularitles and affections peculiar to their sex. It has been universally approved and endorsed by the Medical Profession wherever introduced, both as a dissideratum in their materia, and as the best popular remedy ever offered in the cure of Asth-ma, Billious Affections, Bronchitis, Chills, Coughs, Cancer, Asiatie Cholera, Cramp Cholic, Cutaneous Eruptions, Dyspepsia, Consumption, Dropsy Sore Eyes, General Debility, Diarrhoea, Effects o Debauchery, Female weakness, Gravel, Headache, Heart Disease, Hemorrhages, Kidney diseases icers, Loss of Appetite, Languor, Liver, diseases Tetter, Mental Depression, Nervous Debility, Neuralgia, Nocturnal Emissions, Night Sweats, rolapsus Uteri, Sexual weakness, Scrofula, Sum-Complaints, Venerial diseases, Worms, Whites, and all diseases which derive their origin rom the Blood, Liver or Kidneys. Dissolved in water it makes an excellent wash, gargle and injection, and incorporated with fresh ard, permanently cures the most obstinate case of Piles. The claims of this remedy cannot be over

stimated in the cure of the diseases mentioned bove. The Analysis of the Mass by Prof. Chas. . Chandler, Ph. D. of the College of Pharmacy, New York City, proves its perfect adaptation to every form of disease proceeding from the Stomach, the Liver the Kidneys, and the Blood. Sulphuric Acid. Oxide of Iron, Magnesia, As Sulphates. Potasa, Soda, Carbonic Acid,

Phosphoric Acid. Organic Matter. The Mass is harmless and may be used a will. Being fully aware of the popular prejudice existing against advertised remedies we offer the Mass under the following warrants, viz: 1st that the medicine shall be what is claimed for it. 2d. All money sent by Registered letters shall reach us. 3d, All medicines ordered by the public shall reach them in good condition and give satisfaction. 4th, That we hold ourselves responsible to forfeit \$500, if we violate any of these warrants. Uses FOR SWEET CORN ON THE FARM .- A correspondent writes: The finest fodder is raised from mammoth sweet corn sown for that purpose, it being of large growth and suckering freely on good soil. If to be fed during short pasturage in summer it should be wilted at least twenty-four hours before feeding. If for winter use it should be well cured before storing, as it contains so much sugar that it heats quickly. Our practice has been to wilt it two days, turn-5.00 p m | ing it on the second day, and then set it up in 8.55 p m large stocks and there let it stand until wanted 10.20 p m | load by load. We find it the best and cheapest 8.25 p m | feed, and on our rich garden lands as profitable 11.55 p in as most of our vegetable crops. We sow in fur-11.55 p m rows three feet apart, eight or ten kernels to a foot in length. After one or two workings the 9.45 a m | shade covers the ground. It can be cut with a 11.05 a m | bush hook, or what is better, with a stout reap-7.50 p m er, and left in bundles, if you have two smart men to remove them "lively." Some of our 10.55 a m largest pork raisers also grow largely of the 1.55 p m carlier sorts to begin laying on fat before the 3.15 p m dent corn is ready. It is especially serviceable 8.00 a m where clover does not flourish, so as to furnish 8.30 a m summer hog feed. As soon as it is fairly in the 1.25 p m milk they begin to feed, cutting up from near 6.10 p m 7.30 p m the ground. Scarcely a butt is left, while of field corn much of the stock is refused by the 6.40 p m hogs. By the time the early sorts are fed out 7.55 a m | the large evergreen sorts are ready. This feed 6.15 p m induces excellent thrift, prepares hogs nicely for 3.35 p m profitable feeding of the main crop, and brings 6.45 p m on earlier pork and more of it. "I beg leave to criticise remarks made by one produces too great a growth of straw at the exsuch land the crop is apt to lodge, and under the it has made a good start, it gets smothered out. raised in one crop 110 bushels of wheat, but surface slightly, and the next season there was green and fresh later in the season. For many success in most instances. I have an acquaintance, a young farmer in Hector, Tompkins county, who raises four crops in his course, all good. His clover is cut early for hav, then the second crop for seed, then barley and wheat and clover again. He uses plaster on the clover. I' the wheat is rather thin it will do to use plaster on that. It is my opinion that none of as sow

After that, take there out doors; put the hen in a coop with a board floor, and let the chickens run at large, giving them wheat screenings all the time, for wheat is invaluable for young chickens. About three times per day, give cracked corn, wet. About twice a week, give two tablespoonfuls of Cayenna pepper, mixed with the feed. Keep the chickens in the coop in wet weather, never allowing them Leave New York, 9.00 a. m., 12.40 and 5.15, to get wet, nor to have any foul place to peck in or any buttermilk to drink. Always give them plenty of good well water to drink, and do not let them drink the refuse water about the place. I have always followed up this plan, and never had a chicken get the gapes. But if a chicken gets the gapes, it may be cured as follows : Take up the chicken in one hand, and with the forefinger and thumb pinch or press as low down as possible on the windpipe, pinching and working up till the bill is reached. Then feed, as soon \* as possible, some meal mixed with Cayenne pep-

twenty-four hours, stirring occasionally; then strain the liquor into a cask, to every gallon adding two pounds of sugar; cork tight and let stand until the following October, and you will have wine ready for use without any further straining or boiling. Another method is to put the entire mixture in a kettle and bring it to a boil, skim and when cool till the keg threefourths full and let it ferment for one week; then fill up the eask with freshly made liquor, and when done fermenting bung up tight, set away in the ceilar, when it should remain until February or March, when it should be racked off, the kegs scalded out, and the liquor either returned to the keg to remain permanently or bottled for use.
