In Parvo Physic.

The novelty of modern Medical, Chemical and Pharmaceutical Science. No use of any longer taking the large, repulsive and nauscous pills, composed of chem, crade, and buiky ingredients, when we can by a careful application of chemical science, extract all the cathartic and other medicinal properties from the most valuable roots and herbs, and concentrate them into a minute Granule, scarcely larger than a mustard meed, that can be readily swahowed by those of the most sensitive stomachs and fastidious tastes. Each little Purgutive Pellet represents, in a most concentrated form, as much cathartic power in any of the large pills found for sale in the drug shops. From their wonderful cathartic power, in proportion to their size, people who have not tried them are apt to suppose that they are harsh or drastic in effect, but such is not at all the case, the different active medicinal principles of which they are composed being so harmonized and modified, one by the others, as to produce a most scarching and thorough, yet gently and kindly operating cathartic, in Parvo Physic.
