an important branch of manufacture in the hands of the Plating Company (limited) (by the assignees of Dr Adams' patent), both in Birmingham

and London. But to return to the point from which we started Eighteen months ago commercial nickel was 4s per pound, and now it is 6s per pound .--If, then, the projected employment of nickel in the coinage of Germany be realized, the bulk of all the nickel brought into the market-the sources and supplies being limited-will be almost entirely absorbed, and the price will become prohibitory, or neary so, for industrial purposes.

Nevertheless, as in many other branches of industry, it will doubtless result that the stimulus of scarcity and high prices will ultimately lead to the discovery and adaptation
