within the last ten years the progress of dis-very in every department of knowledge has ade a new work of reference an imperative and a new work of reference an imperative warms her hears The movement of political affairs has kept pace. The movement of pelli ical affairs has kept pace with the discoveries of science, and their rantial application to the industrial and useful arts, and this convenience and refinement of social life.

Givent wars and consequent revolutions have occurred, incotiving pational changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of consinerchal and industrial activity has been commenced.

Large accessions to our geographical knowledge have been made by the industrial activity and the construction of the property of the vision bright, the rosy light, in mingling shadows swim,

shadows swim.

The great political revelutions of the instituceate, with the natural result at the larges of time, have prompt into view a minimule of new men, whose manuscare in every one is envious to know the particulars. Great earlies have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the translett undirections of the day, but which ought now to ake their place in permanent and authentic his-
