MY OLD LOVE.

A PPLETONS AMERICAN CYCLOPÆDIA

NEW REVISED EDITION. Entirely rewritten by the ablest writers on every subject. Printed from new type, and illustrated with several thousand engravings and maps.

Miscellaneous.

The work originally published under the title of THE NEW AMERICAN CYCLOF EDIA was completed in 1853, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of science, literature, and art, have induced the editors and publishers to submit to an exact and thorough revision, and to issue a new edition entitled THE AMERICAN CYCLOR SULA.

CLOP.EDIA.

Within the last lien years the progress of discovery in every department of knowledge has made a new work of reference an imperative want.

The movement of political affairs has kept pace with the discoveries of science, and their truitful application to the industrial and useful arts, and the convenience and refinement of social life.—Great wars and consequent revolutions have joe curred, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to our geographical knowledge

Large accessions to our geographical knowledge ave been made by the indensityable explorers of great political revolutions of the last decade The great political revolutions of the last decade, which the natural result of the lapse of time, have brought into view a multitude of new men, whose mames are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and important sleges maintained, of which the details are as yet preserved only in the newspapers or in the transitent publications of the day, but which ought now to take their place in permanent and authentic history.

ln preparing the present edition for the press, it has according it been the aim of the editors to bring down the information to the latest possible dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest inventions in the practical sits, as well as to give a succinet and original recent of the progress or political and historical events.

The insurations which are introduced for the first time in the present entired personal center, but of the entired place of the first time in the present entired in the present entire age can deposit money in their own names, so that Loans Secured by Real Estate.
