A PPLETONS AMERICAN CYCLOPÆDIA

NEW REVISED EDITION. Entirely rewritten by the ablest writers on ever subject. Printed from new type, and illustrate with several thousand engravings and maps.

The work originally published under the title of The New American Unchoragota was completed in 1861, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of science, literature, and art, have induced the editors and publishers to submit to an eract and thorough revision, and to issue a new edition entitled The Assume as Cycler Edits. Within the last ten years the progress of dis-eovery in every department of knowledge has made a new work of reference an imperative want. The movement of political affairs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts, and the convenience and refinement of social life.—
Great wars and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our own country, which was at its beight when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial scitvity has been commercial.

Large accessions to our geographical knowledge

Large accessions to our geographical knowledge have been made by the indefatigable explorers of Africa.

The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and important steges maintained, of which the details are as yet preserved only in the newspapers seen the transient publications of the day, but which engist now to take their place in purmanent and authentic history.
