NEW REVISED EDITION.

Africa.

The great political revolutions of the last decade, with the manural result of the lasted of time, have brought into view a maintifude of new men, whose names are in every one smouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in permanent and authentic history.

In preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the latest possible dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in tellurature, and of the newest inventions in the practical arts, as well as to give a succeed and original record of the progress of political and historical events.

Hark to that shrill sudden shout—The cry of an applauding multitade
