the lunar year, which is the same as of the story and its conclusion. The to worship Him." a year on the earth; its seasons are prisoner was acquisted. therefore each but three days long, if what are properly called seasons can

occur on a planet where there is neither vegetation, wind, rain nor anow.

Astronomers have usually cegarded the surface of the moon as in a condition of entire rest, and that the volcanic action which caused its rugged appearance has long since ceased. This, however, may be a premature conclusion. The elder Harschel believed that he saw volcances in a state of eruption. The late Professor windext, of Cambridge Observatory, Windext, of Cambridge Observatory, Massachusetts, in 1869, watched for "Rebold the Rebold the Rebold
