AN UNFORTUNATE HABIT.—A "bundle of habits" that is; he old definition in context connotes a bundle of habits. It seems like a hopeless case to undertake a correction of these habits; for, ere one can be got rid of, another, or half a dozen more, are in the process of formation. So the bundle is not likely soon to be diminished. Yet it is not likely to make some effort in this direction, and let us call to mind that general attention to a common habit that is clear reprehensible.

All good people ought to let their light shine; that is according to Scripture, the world has never had too much light, and there is a moment to turn a light so placed that it will illuminate the world.

There's a light in the window for "brothers" after nightfall these few "brothers" who fall in the window to guide them home, if such help is needed. The use of the lamp originally was to give light to those who were in the dark, and to want to give light to those without. If every residence had a good lamp burning at the gate, the lamp at the window would not be so objectionable, and certainly, nothing can be more annoying to a person compelled to be out at night, than to see a light shining from a window placed so as to throw a narrow bit of light across his path.

In place of being helped, it is a nuisance to have a light shining from a window, and it is a nuisance to have a light shining from a window, and it is a nuisance to have a light shining from a window.
