

MRS. JONES' ELOPEMENT.

Mr. Jones came home that afternoon feeling cross and tired. Business was dull, and the clerks...

But Mrs. Jones was out, the girl said. She had been busy in her room all the afternoon; she didn't know what she was doing.

"Because, if she has," responded Mr. Jones, "she's gone off to have a good time, with some one she cares more for than she does for me."

Mr. Jones' brow was black as any thunder-cloud at the thought. He was in precisely the right frame of mind to make mountains out of mole hills.

But she hadn't worn any of her new dresses. "It can't be she's going to a party," he concluded Mr. Jones, "or she'd have rigged up more."

"I'll like to know what this means," he demanded. "I supposed this neighborhood was respectable, but I should think you've all gone crazy, or else turned high-way robbers."

"I'll like to know what this means," he demanded. "I supposed this neighborhood was respectable, but I should think you've all gone crazy, or else turned high-way robbers."

"I'll like to know what this means," he demanded. "I supposed this neighborhood was respectable, but I should think you've all gone crazy, or else turned high-way robbers."

"I'll like to know what this means," he demanded. "I supposed this neighborhood was respectable, but I should think you've all gone crazy, or else turned high-way robbers."

Tree Planting.

This is a subject that cannot be too often referred to as the season comes when the work should be done. Owing to the backwardness of the present season, tree planting may be done yet for a week or two.

Spring has its advantages over the fall for this work, though fall also possesses its advantages. As a rule, the better success attends spring planting; but the hurry of work is so much greater than in the fall, that it is sometimes overlooked, while fall admits of more leisure.

For transplanting large trees the fall is always to be preferred, and the trees should be made as soon as the tree for the season is done growing, which is readily seen by the turning of the leaves. In the fall especially, the trees should be firmly staked to prevent them from being disturbed and admitting down the stem too much water.

The soil can be assisted by hilling up the soil around the stem, thus furnishing the water. In the spring the soil can be removed and a little basin formed to catch the rains through the heated term.

By setting trees out early in the fall, the roots have a chance to take some hold and establish themselves, so that when the spring opens the tree can go right on growing.

In setting trees at any time, a large hole should be dug, the soil at the bottom loosened; and the roots should be carefully with the hands, so that they are not broken.

Male as well as female kleptomaniacs haunt our stores, and some male shoplifters operate in them, and some female thieves steal in them. They are now in New York last winter, and they operated in Philadelphia and Chicago until things became too hot for them there.

Wendell Phillips, in a lecture delivered in New York, cited some striking facts to show how wonderful has been the advance in journalism of late years.

The internal ear, says the Youth's Companion, is an exceedingly delicate and complicated organ, and is therefore especially susceptible to disturbing influences.

Ear troubles begin early. The child is inclined to put small things into it—such as beans, coffee-kernels, pebbles, etc. These, if they have been unnoticed, irritate and inflame and may become sources of most serious mischief.

Kleptomaniacs.

An employer in a large establishment in New York said to a reporter: The romances of a searcher in a big store would startle the public if they would be told.

The Goat.

The goat is a native of the vacant lots about the city, and there are lots of them.

The goat is omnivorous; he will eat anything he sees, and he will seize anything that he may get. His principal food, however, is play-bill. He is very fond of letters.
