THE President has steadily im proved during the last ten days, and there is general rejoicing throughout the country. While there is every hope of his recovery, it should not be forgotten that there are many hazards yet to be encountered. His physicians speak hopefully, but do not assert positive convictions of his recovery, his condition presents no alarming symptoms, but it must be remembered, that so far the location of the ball is a matter of conjecture, and that the danger of its extraction has yet to be encountered.
