It's the old year in politics, you know, consequently our Democratic brethren dream that lightning may strike some one on their side.

It has been discovered by the Postoffice Department that the Canadian authorities have been carrying nearly all their mails in "Uncle Sam's" pouches.

It is interesting to note that the retention of Hon. George V. Lawrence, of Washington county, from the contest for the Republican nomination for State Treasurer.

How would it do for the Cincinnati Commercial and the Tribunes of Chicago and New York to postpone "the funeral" of the Stalwarts until after the elections in Ohio and New York?

The stock gamblers of New York are making the President's chances of life and death the basis of stock gambling.

While the country is filled with detestation of Gutieau's crime, and the assassin is strictly confined, one of the assassins of the Car is swagging among our people boasting of the crime, and other citizens are manufacturing and shipping to Great Britain infernal machines, intended for murderous purposes.

How railway construction helps to develop both the mining and the manufacturing industries of a new country is illustrated in the establishment of the South Pueblo Steel Works in Colorado.

SENATOR PLATT is doing pretty well in a pecuniary way, though he is only an ex-Senator. He draws a good salary as the President of the United States Express Company, a position which he has no idea of resigning.

LUMBER made of straw is a recent invention. An exchange, describing it, says: "The new material appears to be capable of being worked under the plane and other tools of the carpenter, and has the special advantage of being free from knots and not liable to shrinkage, swelling, warping and splitting."
