

At Gibson's distillery, in Westmoreland county, there are 42,000 barrels of whisky in bond.

The statistics of South Carolina show that out of fifty-three newspapers published in that State, fifty are Democratic.

On Monday of last week the President sent a special message to Congress recommending the passage of a law making vaccination compulsory.

The widow of President Lincoln last week drew from the Pension Agency at Chicago, \$15,000, the amount of the pension lately granted her by Congress.

PETITIONS for the pardon of Sergeant Mason are daily pouring in on the President, and a nickle subscription for the support of his wife and child has been started in Baltimore.

At the next election in Nebraska, a vote will be taken on the Constitutional amendment giving women the ballot. It is said the dear creatures are actively electing their husbands, brothers and sweethearts in favor of the amendment.

The State Executive Committee of the Greenback-Labor party of Pennsylvania has been called to meet at Harrisburg, on the 29th of this month, to fix the time and place of holding the next State Convention. "Hark from the tomb."

COMMISSIONER RAUM has offered a reward of three hundred dollars each for the arrest of the men engaged in the assassination of Collector James W. Davis. He has also authorized the expenditure of \$500 in efforts to obtain the necessary information.

The miners of the Cumberland coal region to the number of three thousand, are out on a strike. This means a loss to them of at least \$6,000 per day, not including the wages of the hundreds of railroad and canal hands, who will be thrown out of employment.

It is estimated that the war between the trunk-line railroads of the country, which is now being settled, has cost these corporations over \$100,000,000. Now that living through rates are about being restored, it is to be hoped that the process of skinning shippers of local freights will cease.

ACCORDING to the statement of Treasurer Butler the balance in our State Treasury on the first day of this month, was one million, two hundred and thirty-one thousand, six hundred and sixty-two dollars and thirty cents, (\$1,231,662.40). Besides this, there was also in hand \$535,310.40 applicable to debts then due.

The Republican Congressional caucus last week decided to antagonize the proposed reduction of the tax on whisky and tobacco. In view of the enormous sums required for pensions, the restoration of our navy, and other extraordinary expenses, and the further fact that the public has not demanded such a reduction, this action will be commended by an intelligent people.

ROBERT CONKLING and Senator Edmunds having declined the appointment of Associate Justice of the Supreme Court, the President has nominated Judge Blatchford, of New York, for the position, and he has accepted. The nominee is widely known and respected, and he is heartily endorsed by all the leading papers of New York and of the country. He is at present a Judge of the United States Circuit Court, and was appointed to that position by Abraham Lincoln.

A REPORT having been circulated in New York and in the West, last week, that Jay Gould was in a "tight place," and that he was selling certain telegraph and other stocks, and that a crash was coming, he called three gentlemen into his office, and there exhibited to them fifty-three millions of the stocks in question, all in his own name, and held by him as investments. Evidently Gould is one of the "bloated bondholders" the Democrats talked so much about a few years since.

A HALF-DOZEN of bosses of the "Wolfe Independents" held a meeting at the Girard House, Philadelphia, last week, and agreed to designate one Independent Republican from each of the fifty Senatorial districts of the State "to supervise the preliminaries of the primary elections throughout the State, and to see that one delegate from each Senatorial and Representative district shall be elected and attend the Convention, month after next."

The names of the fifty committees were not published, and therefore we cannot as yet announce who is to play Captain General in organizing the Independent army, in which the gentleman who held the primary election in this county to select the Representative delegate, will have a lonely time of it in most of the election precincts. However, "largo canis" with little "acorn grow," and who can say what the next six weeks may bring forth, Statesmen are born now-a-days.

The strike in the Cumberland coal region ought to be water on the mill of the operators and miners in this country, unless the latter are bitten by the same tarantula as their brethren in the Cumberland region. The vast deficit in the output, caused by closing the Cumberland mines must be supplied elsewhere, and as the B. & O. railroad will now have plenty of idle motive power, it can well afford to furnish to the operators in this country additional and cheaper facilities for transportation. Of course, every inducement will be used to prevail on the miners in this county, and in the Clearfield region, to join hands with the Cumberland strikers, but if they are making fair wages, and are wise, they will "let well enough alone." When the Cumberland miners were employed at wages with which they were content, they took little heed of the wages and facilities for transportation afforded the miners and operators in this county, and now that they have become dissatisfied, and have quit work, is no reason why the miners here should be guilty of committing harri-kari to please them. This may be deemed a selfish policy, but self-preservation is the first law of nature. The Cumberland men had the unquestioned right to quit work when they pleased, but they have no right to dictate to, or fix the price of labor for others. The Clearfield miners have resolutely refused to join in this strike, and it will be the height of folly for the miners of this county to do so, if they have been getting and still receive wages satisfactory to themselves. Cumberland's loss is their gain, and not a mere temporary, but a permanent one, if they properly appreciate the present condition of affairs. A largely increased output of Somerset county coal means equally increased business prosperity for the community and in adjacent to the mining regions, and a prosperity that will come to stay, if all pull together for the common good.

REVENUES of strikes and manifestations of dissatisfaction among workmen reach us from all parts of the country. At Omaha railroad laborers are on a strike and already rioting has occurred and the military have been called out. At Pittsburgh the iron workers in some of the mills are on a strike, and in a spirit of lawlessness are trying to intimidate others from taking their places. In the Cumberland district three thousand coal miners have struck against a reduction of wages. In the Lehigh district the miners have been reduced to half time, and signs of a strike are apparent. In Lawrence, Massachusetts, and at Fall River, the cotton spinners and operatives in the mills are on a strike, and there is a disposition shown among the Trades' Union everywhere to test their strength with employers. There is no disguising the fact that the business interests of the country are seriously threatened, as general strikes are always disastrous. It has been expected for some time that there has been an over production in many departments of industry, and an under production in others. Mining and manufacturing have been pushed to their utmost capacity, while the cost of living has been increased by the short crop of last year. Laborers want increased wages to meet the increased cost of living, while their employers find the market dull and prices falling, because of the over production, and of course, begin to curtail productions and reduce expenses; then the operatives, instead of curtailing their expenses and trying to tide over until the surplus stock is worked off, and there is again an active demand for their labor at good prices, rush into strikes, and thus deprive themselves of the wages they are earning, the mills and mines close, and months of distress and want follow; meantime the over production is consumed, a demand springs up, wages go up to the old standard, and employment and content again reign for a season, and apparently no thought is given to the millions that have been wasted and lost during the time of enforced idleness. Nothing appears to have been learned from experience. The losses, and crimes, and misery, and disgrace of 1877 are apparently forgotten, and it looks as if the country will be called upon again to endure the deprivations of lawless hordes of idle men, without work and without bread.

CHILDREN in the primary classes of the Cincinnati public schools are urged and even commanded by their teachers to take their books and slates home at night and study, whereas the *Enquirer* very truthfully remarks that "this is a kind of cramming that helps to populate the idiot asylums." The admonition need not be confined to Cincinnati. As to certain a method as can be devised of ruining a child both intellectually and physically is to confine it too closely to books and the school room.

A PROMINENT cattle man at St. Louis from the Indian Territory, estimates the Texas cattle drive this season at about \$300,000,000, including those which will come from the Indian Territory. This enormous army of cattle will be shipped from Kansas prairies by rail to Chicago, Kansas City and St. Louis. The 3 and 4-year old cattle will be scarce. The average price of cattle already contracted for is, for yearlings, \$13, and for 2-year-olds, \$16. Although the outlook for a prosperous cattle business in the summer of 1882 is unusually good, the extent of the cattle trade during the next few years will exceed the wildest predictions of the most sanguine. Great as it has been in the past, the future no doubt will far exceed it, and that immense unoccupied territory comprising the Indian Territory, Western and South western Kansas, Texas and the Pan-Handle of Texas will soon become and for years remain the great meat center of the world.

How the Wolfe Independents Will Get Delegates.

The committee of seven appointed by the Wolfe Independent Conference met at the Girard House yesterday and agreed upon a plan of membership in their State Convention, which meets here on the 25th of May next. The committee of seven agreed to select one person in each Senatorial district, and then to empower the committee of fifty to supervise the election of delegates to the State Convention, and one person for each Representative. Primary elections are to be held the same as other parties. This will make the convention consist of 251 members. The list of those selected for the Senatorial districts was kept secret, because letters were sent out last night notifying them of their appointment, and their names will not be revealed until their acceptances are at hand.

"QUITS, QUITS DOWN."

TIME was when the paper "founded by Horace Greeley" was leader of Republican sentiment, the whole and vigorous disseminator of party doctrines, the sturdy defender of party discipline, and the successful, fearless and honest exponent of party principles. At all times strove to be just and truthful, and never knowingly published a slander even against its political opponents, much less could it be induced to assail, vilify and slander those of its own political faith and household. This was the character of the *Tribune*. What is it now, and what it has been of late years, very many Republicans know well. It is no longer the safe counsellor and conscientious guide, conducted upon the high plane of truth and honesty in dealing with political affairs. It is run in the narrow groove of faction, catering to the meanness of all passions and personal animosities, individual vindictiveness and selfish ambitions. It lies like an auctioneer on the slightest pretext, a notable instance being its attempt to hold Stalwart responsible for the direct assaults which the Democrats are indulging in against the *Tribune*. It has long, however, made up its memory of Garfield in connection with the Chase letter. Again, when it meddles in the politics of this State, it is only to slander the party with which it claims to affiliate, and to indulge in forebodings of defeat. Here is a sample:

"There is said to be much anxiety felt by Pennsylvania Republicans concerning the outlook for their party. It all springs from the evident determination of the machine to nominate General Beaver for Governor, and the party favors the choice or not. With a free expression in the convention there would be little chance of General Beaver's nomination. While he is a popular man, his blunder in misrepresenting his district at Chicago by voting first, last and all the time for the third term, made him many political enemies who refuse to approve his treachery by giving him the highest office in the State. This is his chief cause of weakness. Another cause is the choice of him by the machine as its candidate, and is a recognized authority and writer of several valuable books on mental diseases."

St. Louis, March 17.—Yesterday a horrible accident occurred at St. Joseph. Some boys were digging a tunnel through a hill on the outskirts of the town for boyish purpose. They took turns in small parties, first and all the time, until the third term, made him many political enemies who refuse to approve his treachery by giving him the highest office in the State. This is his chief cause of weakness. Another cause is the choice of him by the machine as its candidate, and is a recognized authority and writer of several valuable books on mental diseases."

This is his chief cause of weakness. Another cause is the choice of him by the machine as its candidate, and is a recognized authority and writer of several valuable books on mental diseases."

St. Louis, March 17.—Yesterday a horrible accident occurred at St. Joseph. Some boys were digging a tunnel through a hill on the outskirts of the town for boyish purpose. They took turns in small parties, first and all the time, until the third term, made him many political enemies who refuse to approve his treachery by giving him the highest office in the State. This is his chief cause of weakness. Another cause is the choice of him by the machine as its candidate, and is a recognized authority and writer of several valuable books on mental diseases."
