To-day there will be a sale of more silken skirts and whispered quite since 1872, have at last come to occupy so much valuable room, that there must be a complete house leaning. They have been kept by the Government in some cases for the Government in some cases for leaning in a half suppressed their feelings in a half suppressed laugh and then went on without taking further interest.

All this increased the boy's emwars have been too indifferent to end for them. As may be supposed

silken skirts and whispered quite audibly:

with ease what the usual prescriptions and treatment for that miserable malady failed wholly to bring about. I am also glad to state that the Tonic has greatly relieved me personally of a troublesome atonic condition of the stomach of long standing. It is the ideal purifier and invigorant."

All this increased the boy's embarrassment. He stooped to pick up barrassment. He stooped to pick up attention to the feet that after A pril attention to the feet that miserable was said to be malady failed wholly to bring about. I am also glad to state that the Tonic has greatly relieved me personally of a troublesome atonic condition of the stomach of long standing. It is the ideal purifier and invigorant."

Messrs. Hiscox & Co. call special his ministerial friend took their po-

corrigible balker, went off like a machine when the charge was applied. A very ingenious little ma-chine is in case No. 4. It is the invention of a woman. It-consists within the last five years a large number of patents granted to women. Their patents consist to a large extent of improvements in articles of wearing apparel, but they have secured patents in many other classsuch as household furniture, devices peculiar to the laundry and to the dairy, surgical instruments, and medicines. Case No. 5 also possesses interest to those who care for the curious. It contains measuring instruments, and is generally devoted to horology and optics. There are some very ingenious in
or milking cows quite as much as in any other occupation or profession. This is demonstrated in masses as shown in the census tables as clearly as in the case of individuals in any neighborhood. Thus the State of Iowa employs 50,000 fewer farm hands than Missouri, but employs There are some very ingenious in
or milking cows quite as much as in any other occupation or profession. The price was twenty-five dollars. On the day named Mrs. Beecher called for the new suit. It was not ready, but would be ready the next morning in season for the opening of the convention.

This is demonstrated in masses as shown in the census tables as clearly as in the case of individuals in any neighborhood. Thus the State of Iowa employs 50,000 fewer farm hands than Missouri, but employs more machinery and brains because in the day named Mrs. Beecher called for the new suit. It was not ready, but would be ready the next morning in season for the opening of the convention.

As the doctor started for the city "Yes sir."

"Yes sir." struments for measuring time, liquids, counting money, changing it, and performing similar functions generally supposed to be done only with the fingers. A prominent object is a night clock, consisting of a white glass globe with the hours marked upon it. It is illuminated, and slowly revolves past a certain upight bar of mare. strociously put together. It would elves were enough to condemn the At the last sale, about eleven years ago, the total amount realized was about \$235, representing seven-teen different purchases, and varying in amount from \$2 to \$124.50. On

A common mistake in the cultiva-

when the first bunch of buds has fairly made its appearance, nip off the whole of the shoots growing between the stem and branches, but allow the main stem to grow on until four or, at most, five bunches of buds are formed. Then, the plant being probably three feet high, pinch off the main stem three inches from the highest bunch, and continue to nip off the shoots as before as fast off the shoots as before, as fast they make their appearance, just in the cultivation of tobacco.

Davis's Pain Killer was used for re-lief, with the happiest effect. In these Summer months of suddenly varying tempeture, everybody ought to keep a bettle of this valuable

owly revolves past a certain up-riority in the citizens of the one ght bar of metal, thus enabling State over those of the other. It is to tell at a glance the hour of the difference between intelligence and stupidity and general ignorance. The general estimate is that farming his old clothes, for he had forgotten "But it will be hard to watch two "But it will be hard to watch two "But it will be hard to watch two

amount from \$2 to \$124.50. On sale of lamps and sewing manuch about ventilation, or, indeed, believed much in its importance; chines \$107.50 was realized, while chemicals, metallurgy, and chromos brought \$28.50. Many of the items ranged about \$10 and \$15, only three being over \$50. As no record is kept of the rejected cases, it is not known how the number on hand will compare with that sold in 1872. The cases in which are the models to be sold to-day stand on the north side of the model room under the gallery, and in the centre of the room, and are numbered from one to fourteen.

Tomatoes.

It is importance; and a crusade in favor of fresh air money could be hidden, but no money could be found.

"Now, husband," with no little tremor of anxiety, "what have you done with that money?"

It was a great sum in those days for a Lane Seminary professor's wife to have. The docter was innocent as a lamb. He had no recollection, he said, of having had any money. And there they stood; both were allike confounded.

No new clothes and no money, what could be done? A great Western convention of ministers and laymen in session at his own church, better the difference in soil becomes appoint the difference in soil becomes appoint the difference in soil becomes appoint that it areas so

is allowed to wander at its own reet will, it will occupy a great deal ground. But this is not at all the sweet will, it will occupy agreat deal of ground. But this is not at all the best way to get ripe fruit, though any amount of leaves, stalks and green tomatoes may be produced by it. Please give the following plan a fair trial. Set the plants in rows two feet apart, and fifteen inches apart in the street of the dust of our large cities. These intelligent gentlemen draw near the open window, they inhale the winged odors of the streets, they murmur their formula, "a little fresh air," they have cleared their consciences, and are happy. And in traveling, what do we not suffer from this ignorant conception of fresh air. We

If this is properly done, the greatest amount of ripe fruit that the climate is capable of producing will be secured. Stakes about four feet long will be required to tie the plants to. They should be driven firmly into the ground, and the stems should not be too tightly bound. I have practiced this mode of growing to matoes for twelve years and have never failed to obtain an early crop of well matured fruit. Keep the ground well stirred and mulch with half rotten dung. Lots of liquid manners are the for the cooling sea breeze. Our domesture, the manners are the former and the sea of the mountain air or the cooling sea breeze. Our domesture, and like it better than any mow.

Horses that have worked constantly arising the family darwing his pistol."
