(Continued from last week.) How Watch Cases are Made.

In buying a silver watch case great care should be taken to secure one that is solid silver throughout. The cap of most chesp silver cases is made of a composition known as albata, which is a very poor substitute for silver, as it turns black in a short time. The backs of such cases are made much thinner than those of an all silver case, being robbed in order to make the cap thicker and get in as much as possible of the cheap metal. Another important point A DOUBLE-STEEL FEED! in a silver case is the joints or hinges, which should be made of gold. These of most cheap cases are made of silver, which is a surger space unser the arm than any other fam ily machine made, doing a larger cartety and greater range of work than any family machine. Simplest constructed, easiest managest, most thorough build and best machine in the world Solid on the upon the case and admitting the dust and Keystone Silver Watch Cases are only made with silver caps and gold joints.
