> (Continued from last week.) How Watch Cases are Made.

The many great improvements intro-Flour, Meal and Chop. duced in the manufacture of the Jas. Boss' Gold Watch Case, have led to similar improvements in the making of silver cases. Under the old methods, each part of a ilver case was made of several pieces of metal soldered together, requiring a great mount of cutting and soldaring, which oftened the metal and gave it the pliability of lead rather than the elasticity of silver Under the improved methods, each part of the Keystone Silver Watch Case is a mile of one solid piece of metal lannmered into inpe. The advantages are readily appar ent, for every one knows that hammed

hardens the metal while soldering soltens it. To test the superiority of the Keystone Silver Watch Case, take one of 3 oz. weight, press it squarely in the center when classed and it will not give, while a case of same weight of any other make will give enough to break the crystal. The Keystone Silver Watch Case is made only with silver cup and gold joints. Send 3 rent stamp to Keystene Watch Care Factories, I'delphie, Pr., for handsome Illustrated Phosphiet show and James Illustrated Phosphiet show and Keystene Watch Cases are make.
