CHEAP!

The most attractive word in the business vocabula, ry is CHEAP, because the price tells, and everybody tells the price. The merchant whose superior advantages in trade enables him to offer a better article, or as good an article for less money than his weighbor has the inside track in the race for business, and as long as the people believe his is "the cheapest store in town," just so long will he lead every other trades. man in his line. Famous for Low Prices, means success: notorious for High Prices, means failure. Ask a man more than he thinks a thing is worth and he revolts, and with many it is an insult. But offer a man a Bargain, and straightway the purse-strings relax. and you will have a customer on the spot. He leaves the store and tells the first acquaintance he meets of "the Cheapest Store in Town." The best advertising medium is a pleased customer. The small profit plan, under intelligent management, never fails. The masses must be attracted, if a large trade is ever to be realized. The merchant must impress the people with the fact that he can and will serve them best The man who does the most for the community receives the largest share of favors from every member of it. CHEAP is the word, because the price tells. and everybody tells the price.
