CLOD CRUSHER and LEVELER.

The only complete pulverizor and leveler in the world. All wrought iron and steel. The front coulters turn to the left, and rear to the right. By this arrangement the whole surface of the ground is cut, lifted and turned. The coulters work like so many small plows, and do not tear up zod or rubbish. Can be adjusted in an instant by means of the lever, to work deep or shallow. The principle dods, and level uneven surfaces. It will pay any farmer to come so miles to see the Acase and its work. It is the only implement that can do the work thoroughly in hard or tough soil, or newly plowed sod.

Bay Stallion, fifteen hands high, weight 1,100.
