FROM THE FATHER: "It is both a a duty for me to state to you the benefit I have derived from the use of

Ayer's Sarsaparilla.

Six months ago I was completely covered with a terrible humor and scrofulous sores. The humor caused an incessant and intolerable itching, and the skin eracked so as to cause itching, and the skin eracked so as to cause
the blood to flow in many places whenever
I moved. My sufferings were great, and my
life a burden. I commenced the use of the

They are the Best in the CLOD CRUSHER and LEVELER. ket. Sole Agency for The only complete pulverizer and leveler in the world. All wrought from and steel. The front coulters turn to the left, and rear to the right. By this arrangement the whole surface of the ground is cut, lifted and turned. The coulters work like so many small plows, and do not tear up sod or rubbish. Can be adjusted in an instant by means of the lever, to work deep or shallow. The principle of the Aeme is to cut, lift and turn—pulverize chais, and level uneven surfaces. It will pay any farmer to come 10 miles to see the Aeme and its work. It is the only implement that can do the work thoroughly in hard or tough soil, or newly plowed sod. ALABA TIN
