THE REPORT

but natives. How to Get Early Garden Crops. There are many ways of getting early crops, or of trying to get them, such as starting the plants in the house or hot-bed, and covering them with glass, etc., after they are set out. But when these methods are not adopted, there is still a chance not adopted, there is still a chance you have taken in my case, and for gave him to understand that her body that wears this badge will stand to have early vegetables, and a good the great benefit received from your guests should not drink wine.

garden. It is simply to select the treatment. warmest and driest soil, and sow or plant early. It is not desirable or Cured. on a small scale, we can well afford to run a little risk of losing our seed

Editor News : by too early sowing. One thing, however, should not be overlooked. Do not depend on this early sow-ing, but sow or plant again, a little DEAR SIR :-- I ask you to insert ing, but sow or plant again, a little later, when the soil and weather are more favorable. If the first sowing succeeds, you are so much ahead; if it fails, you have lost only the seed and your labor. You can well af-ford to run this risk. There are some groups which can be an each of the seed and your labor. You can well afford to run this risk. There are some crops which can be sown the moment the frost is out of the soil, with little or no risk. Among these we may mention peas, cabbage, cauliflower, spinach, onion, lettuce, cel-ery, beet, carrot, parsnip, etc. It is charge from my nose. They treated As they appeared on the scene flow.
